Accurate GH-900 Prep Material, GH-900 Valid Test Blueprint

In accordance with the actual exam, we provide the latest GH-900 exam dumps for your practices. With the latest GH-900 test questions, you can have a good experience in practicing the test. Moreover, you have no need to worry about the price, we provide free updating for one year and half price for further partnerships, which is really a big sale in this field. After your payment, we will send the updated GH-900 Exam to you immediately and if you have any question about updating, please leave us a message on our GH-900 exam questions.

Microsoft GH-900 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Privacy, Security, and Administration: This domain measures skills of Security Administrators and Organization Managers in securing and administering GitHub environments. It covers ensuring repository security through branch protection rules, using security tools like Dependabot, managing access and permissions at repository and organization levels, creating and managing organizations, setting up organization-level security, and overseeing teams and members.

Topic 2	<ul style="list-style-type: none"> • Modern Development: This domain assesses abilities of DevOps Engineers and Continuous Integration Specialists in implementing modern development practices. It emphasizes understanding DevOps principles and leveraging GitHub Actions for automation and CI • CD pipeline implementation. Candidates also learn GitHub's tools and best practices for conducting and managing code reviews.
Topic 3	<ul style="list-style-type: none"> • Working with GitHub Repositories: This domain targets Repository Administrators and Content Managers, focusing on managing repository settings and permissions. Candidates learn to configure repositories, use templates, and effectively manage files by adding, editing, and deleting. The domain also addresses versioning of files and the use of GitHub Desktop for streamlined file management tasks within repositories.
Topic 4	<ul style="list-style-type: none"> • Introduction to Git and GitHub: This section of the exam measures skills of Junior Developers and Platform Support Specialists and covers the basic understanding of Git and GitHub. It explains what Git is and why it is used, the fundamental Git workflow, and concepts related to repositories including their local and remote distinctions. Candidates learn essential Git commands such as initializing and cloning repositories, adding and committing changes, pushing and pulling updates, and branching and merging. It also covers navigating GitHub by creating accounts, managing repositories, understanding its interface, and working with issues and pull requests.
Topic 5	<ul style="list-style-type: none"> • Benefits of the GitHub Community: This section targets Community Managers and Open Source Contributors, focusing on engaging with the GitHub community. Candidates learn to participate in open source projects, utilize GitHub Discussions for collaboration and support, and contribute meaningfully to community-driven projects.
Topic 6	<ul style="list-style-type: none"> • Project Management: This section is designed for Project Coordinators and Product Managers and focuses on using GitHub Projects for project management. Candidates learn to create and manage GitHub Projects, utilize project boards for organizing tasks, and integrate project workflows with issues and pull requests to maintain project visibility and progress.

Microsoft GitHub Foundations Sample Questions (Q32-Q37):

NEW QUESTION # 32

Which of the following best describes cloning a repository?

- **A. It creates a copy of the repository on your local machine.**
- B. It creates a copy of the repository on GitHub.com
- C. It retrieves code updates from the remote repository.
- D. It imports your source code into a new repository.

Answer: A

Explanation:

Cloning a repository in GitHub refers to creating a copy of the repository on your local machine . This allows you to work on the project offline, make changes, and later push those changes back to the remote repository.

It does not involve creating a copy on GitHub.com (which would be forking), retrieving updates (which would be pulling), or importing source code into a new repository (which is done differently).

NEW QUESTION # 33

As a user, what feature can you use to add an issue to the top of the Issues page for easier visibility?

- **A. Pin the issue.**
- B. Star the issue.
- C. Subscribe to the issue.
- D. Label the issue.

Answer: A

NEW QUESTION # 34

After 30 minutes of inactivity, a GitHub Codespace will:

- A. Be deleted
- B. Commit changes
- **C. Time out**
- D. Restart

Answer: C

Explanation:

After 30 minutes of inactivity, a GitHub Codespace will time out. This is designed to conserve resources when the Codespace is not being actively used. The session will be paused, and you'll need to reconnect to resume your work. However, the Codespace is not deleted, and any unsaved changes might not be lost but should be committed or saved to prevent data loss.

NEW QUESTION # 35

What are the key areas of focus for GitHub? (Choose three.)

- **A. Building a technology platform for secure code sharing and collaboration**
- **B. Nurturing a community that supports open source principles**
- C. Hosting video calls with other developers
- **D. Providing access and opportunities for developers**
- E. Providing a social media platform for project managers

Answer: A,B,D

Explanation:

GitHub focuses on several key areas that align with its mission to support developers and foster collaboration:

Nurturing a Community That Supports Open Source Principles:

Option A is correct. GitHub is a major advocate for open-source software development, providing tools and platforms that enable open collaboration. GitHub hosts millions of open-source projects and supports a community-driven approach to software development.

Providing Access and Opportunities for Developers:

Option B is correct. GitHub provides a wide range of resources, such as GitHub Education, GitHub Actions, and GitHub Marketplace, to empower developers. These tools and opportunities help developers of all levels to learn, contribute, and improve their skills.

Building a Technology Platform for Secure Code Sharing and Collaboration:

Option D is correct. GitHub's core function is to provide a platform where developers can securely share code and collaborate. Features like private repositories, branch protections, and GitHub Actions for CI/CD (Continuous Integration/Continuous Deployment) workflows highlight this focus.

NEW QUESTION # 36

Which of the following information is available by default in a user's GitHub profile?

- A. A list of the user's private repositories
- **B. Personal biography and profile picture**
- C. Email address and password
- D. Public Secure Shell Protocol (SSH) keys

Answer: B

Explanation:

A user's GitHub profile typically includes public information such as a personal biography, profile picture, and a list of public repositories. More sensitive information, like email addresses and passwords, is not publicly displayed.

* Personal Biography and Profile Picture:

* Option A is correct because these are standard elements displayed on a user's public GitHub profile. This information is meant to provide a brief introduction to the user and their interests or skills.

* Incorrect Options:

* Option B is incorrect because public SSH keys may be associated with a user's account but are not displayed by default on the

profile page.

* Option C is incorrect because private repositories are not listed on a public profile.

* Option D is incorrect because a user's email address and password are private information and not displayed on their public profile.
