Microsoft Power Platform Solution Architect Sample Questions (Q143-Q148):

NEW QUESTION # 143

You need to recommend methods to resolve the organization's issues.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Explanation:

Box 1: Add users to Microsoft 365.

Scenario: Users cannot view Power BI reports within the Power Platform apps.

Issue: The people you share with may see a locked tile in a dashboard, or a "Permission required" message when they try to view a report.

Solution: You need to grant them permission to the underlying dataset.

- * Go to the All or the Datasets + dataflows tab in your content list.
- * Select More options (...) next to a dataset, then select Manage permissions.
- * Select Add user.
- * Enter the full email addresses for individuals, distribution groups, or security groups.
- * Select Grant access.

Box 2: Configure an on-premises data gateway.

Scenario: The company plans to reference historical data in the [on-premises] existing system. The records held in these systems will not be migrated to the new solution except for medication information.

The on-premises data gateway acts as a bridge to provide quick and secure data transfer between on-premises data (data that isn't in the cloud) and several Microsoft cloud services. These cloud services include Power BI, PowerApps, Power Automate, Azure Analysis Services, and Azure Logic Apps. By using a gateway, organizations can keep databases and other data sources on their on-premises networks, yet securely use that on-premises data in cloud services.

NEW QUESTION # 144

You are designing a Power Platform solution for a company. The company issues each employee a tablet device.

The company wants to simplify the opportunity management processes and automate when possible. The company identifies the following requirements:

- * Users must have a visual guide to know which data to enter in each step of the opportunity management process.
- * The system must automatically assign the opportunity to a manager for approval once all data is entered.
- * The system must notify an assignee each time an opportunity is assigned to them by using push notifications.
- * When a user selects a push notification, the associated opportunity must display.

You need to recommend the Power Platform components that will meet their requirements.

Which three Power Platform components should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Power Apps mobile apps
- B. Power Automate desktop flows
- C. Business process flows
- D. Power Automate cloud flows
- E. Power Virtual Agents chatbots

Answer: A,C,D

Explanation:

A: Use business process flows to define a set of steps for people to follow to take them to a desired outcome.

These steps provide a visual indicator that tells people where they are in the business process.

B: Push notifications are used in Power Apps mobile to engage app users and help them prioritize key tasks. In Power Apps, you can create notifications for Power Apps mobile by using the Power Apps Notification connector. You can send notifications to any app that you create in Power Apps.

E: Create a cloud flow when you want your automation to be triggered either automatically, instantly, or via a schedule.

Automated flows: Create an automation that is triggered by an event such as arrival of an email from a specific person, or a mention of your company in social media.

NEW QUESTION # 145

You are a Microsoft Power Platform architect gathering solution requirements for a customer. Management uses three different systems to locate asset inventory and contract details.

Management must view inventory with the ability to select assets and view additional details. Sales representatives have issues

locating assets based on specific features in a timely manner when working with customers.

You need to prioritize the requirements.

Which priority should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 146

A customer plans to use Microsoft Power Platform integration capabilities to migrate its on-premises sales database to Microsoft Dataverse. The database has more than 10 years of sales data with complex table relationships. The data is used to generate real-time sales reports and predictive analytics.

The customer requires a data migration strategy that implements the following:

- * ensures minimal downtime
- * maintains data integrity
- * allows for validation of migrated data before switching to the new system
- * ensures that the historical data is preserved accurately in the Dataverse environment

Which two strategies should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Perform a full migration and perform a test run on Dataverse to simulate real-time activity.
- B. Perform a full migration and start using Dataverse after migration.
- C. **Develop a phased migration plan in which data is moved in chunks based on years.**
- D. **Map the data schema to Dataverse and validate integrity through trial loads.**
- E. Migrate historical data to Azure Data Lake to reduce migration complexity.

Answer: C,D

NEW QUESTION # 147

You need to recommend a solution for integrating luggage information.

What should you recommend? To answer, drag the appropriate types to the correct tables. Each type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Luggage: Custom activity table

An activity can be thought of as any action for which an entry can be made on a calendar. An activity has time dimensions (start time, stop time, due date, and duration) that help determine when the action occurred or will occur. Activities also contain data that helps determine what action the activity represents, for example, subject and description.

Passenger: Customer table

The account and contact tables in Microsoft Dataverse are essential for identifying and managing customers, selling products and services, and providing superior service to the customers. A customer address table is used to store address and shipping information for a customer.

Scenario: The company has a custom app for managing and tracking passenger luggage. The app uses Microsoft Dataverse. Agents need to view which pieces of luggage match to each passenger, and then need to add the total on the passenger record.

NEW QUESTION # 148

.....

For some candidates, a good after-sale service is very important to them, since they may have some questions about the PL-600 exam materials. We have the both live chat service stuff and offline chat service, if any question that may bother you , you can ask

for a help for our service stuff. They have the professional knowledge about the PL-600 Exam Materials, and they will give you the most professional suggestions.
