# JN0-637 Book Free - JN0-637 Test Assessment

P.S. Free & New JN0-637 dumps are available on Google Drive shared by BootcampPDF: https://drive.google.com/open?id=1vF7BQMsLXxuEkI_LRSBNLH3D4pIp49MO

JN0-637 exam training allows you to pass exams in the shortest possible time. If you do not have enough time, our study material is really a good choice. In the process of your learning, our study materials can also improve your efficiency. If you don't have enough time to learn, JN0-637 test guide will make the best use of your spare time, and the scattered time will add up. The service of JN0-637 Test Guide is very prominent. It always considers the needs of customers in the development process. There are three versions of our JN0-637 learning question, PDF, PC and APP. Each version has its own advantages. You can choose according to your needs.

Juniper JN0-637 Exam Syllabus Topics:

Topic	Details
Topic 1	• Advanced IPsec VPNs: Focusing on networking professionals, this part covers advanced IPsec VPN concepts and requires candidates to demonstrate their skills in real-world applications.
Topic 2	• Layer 2 Security: It covers Layer 2 Security concepts and requires candidates to configure or monitor related scenarios.

Topic 3	• Logical Systems and Tenant Systems: This topic of the exam explores the concepts and functionalities of logical systems and tenant systems.
Topic 4	• Multinode High Availability (HA): In this topic, aspiring networking professionals get knowledge about multinode HA concepts. To pass the exam, candidates must learn to configure or monitor HA systems.

JN0-637 Test Assessment | Interactive JN0-637 Practice Exam

If you are going to prepare for the JN0-637 exam in order to get the related certification and improve yourself, you are bound to be very luck. With the joint efforts of all parties, our company has designed the very convenient and useful JN0-637 study materials. More importantly, the practices have proven that the study materials from our company have helped a lot of people achieve their goal and get the related certification. The JN0-637 Study Materials of our company is the study tool which best suits these people who long to pass the JN0-637 exam and get the related certification.

Juniper Security, Professional (JNCIP-SEC) Sample Questions (Q74-Q79):

NEW QUESTION # 74
Exhibit:

You are asked to ensure that Internet users can access the company's internal webserver using its FQDN. However, the internal DNS server's A record only points to the webserver's private address. Referring to the exhibit, which two actions are required to complete this task? (Choose two.)

- A. Disable the DNS ALG.
- B. Configure destination NAT for both the DNS server and the webserver.
- C. Configure proxy ARP on ge-0/0/3.
- D. Configure static NAT for both the DNS server and the webserver.

Answer: C,D

NEW QUESTION # 75
Exhibit:

Referring to the exhibit, which two statements are true? (Choose two.)

- A. Hosts in the Local zone can be enabled for control plane access to the SRX.
- B. You can configure security policies for traffic flows between hosts in the Local zone.
- C. An IRB interface is required to enable communication between the Trust and the Untrust zones.
- D. Hosts in the Local zone can communicate with hosts in the Trust zone with a security policy.

Answer: A,D

Explanation:
Explanation:

NEW QUESTION # 76
Referring to the exhibit,
which two statements are correct about the NAT configuration? (Choose two.)

- A. Any external host will be able to initiate a session to the reflexive address.
- B. Only a specific host can initiate a session to the reflexive address after the initial session.
- C. Both the internal and the external host can initiate a session after the initial translation.
- D. The original destination port is used for the source port for the session.

Answer: B,D

Explanation:

The NAT setup allows only specific external hosts to reach the internal network post-initial session, providing controlled access.

Reflexive NAT preserves the source port from the original request, maintaining continuity.

More on this can be found in Juniper NAT Configuration Documentation.

Looking at the NAT configuration, we observe the use ofpersistent NATwith the keywordpermit target-host

. Here's a detailed breakdown:

* Persistent NAT (Correct: Option B):Whenpersistent NATis configured with thepermit target-host option, it allows the internal host (from the 172.16.1.0/24 network) to initiate communication with an external host. After the initial session is established, only the specific external host (target host) is allowed to initiate subsequent sessions to the internal host using the reflexive address. This ensures that random external hosts cannot initiate sessions, which enhances security.

* Original Destination Port Reuse (Correct: Option D):In this configuration, theinterface-based source NATuses the original destination port of the incoming session as the source port for the outbound session. This maintains port transparency for NATed traffic, which can be crucial for certain types of applications that depend on consistent port numbers.

* Incorrect Options:

* Option Ais incorrect because persistent NAT with target-host does not allow both internal and external hosts to initiate sessions freely. Only the specific external hostcan initiate a session after the initial session is established by the internal host.

* Option Cis incorrect because only the specific external host can initiate subsequent sessions, not any random external host.

Juniper References:

* Juniper NAT Documentation: Describes the behavior of persistent NAT and how target-host restrictions work for enhanced security.

NEW QUESTION # 77

Which two statements are correct about automated threat mitigation with Security Director? (Choose two.)

- A. It works with SRX Series devices.
- B. It provides endpoint protection by running a Juniper ATP Cloud agent on EX Series devices.
- C. It works with third-party switches.
- D. It provides endpoint protection by running a Juniper ATP Cloud agent on the servers.

Answer: A,C

NEW QUESTION # 78

What are three requirements to run OSPF over GRE over IPsec? (Choose Three)

- A. The OSPF interface must be placed in a zone and must have GRE configured
- B. The GRE interface must be configured in OSPF Area 0.
- C. The GRE interface must be placed in a zone and must have OSPF configured in is host
- D. Overlapping addresses should exist between remote networks.
- E. Overlapping addresses should not exist between remote networks.

Answer: A,C,E

NEW QUESTION # 79

......

When you are preparing JN0-637 practice exam, it is necessary to grasp the overall knowledge points of real exam by using the latest JN0-637 pass guide. Our experts written the accurate JN0-637 test answers for exam preparation and created the study guideline for our candidates. We promise you will get high passing mark with our valid JN0-637 Exam Torrent and your money will be back to your account if you failed exam with our study materials.
