

Free PDF 2026 Reliable CIPS L4M1: Pdf Scope and Influence of Procurement and Supply Pass Leader

CIPS Level 4 Diploma in Procurement and Supply

Module title: Scope and Influence of Procurement and Supply [L4M1]

Leading global excellence in procurement and supply

Learning Outcome 1: Understand and analyse the added value that can be achieved through procurement and supply chain management

- 1.1 Describe the categories of spend that an organisation may purchase
- 1.2 Analyse the different sources of added value in procurement and supply
- 1.3 Compare the concepts of procurement and supply chain management
- 1.4 Differentiate the stakeholders that a procurement or supply chain function may have

P.S. Free 2026 CIPS L4M1 dumps are available on Google Drive shared by TestPassed: <https://drive.google.com/open?id=1ZuhjSPt8KQTKwg4SX2oXGVyRYfzJT6-W>

To obtain the L4M1 certificate is a wonderful and rapid way to advance your position in your career. In order to reach this goal of passing the L4M1 exam, you need our help. You are lucky to click into this link for we are the most popular vendor in the market. We have engaged in this career for more than ten years and with our L4M1 Exam Questions, you will not only get aid to gain your dreaming certification, but also you can enjoy the first-class service online.

CIPS L4M1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Understand and analyse the need for compliance: This section measures skills of compliance officers and sector-specific procurement managers in understanding different economic and industrial sectors such as
Topic 2	<ul style="list-style-type: none">Understand and analyse the key steps when procuring goods or services: This section measures that skills of purchasing managers and procurement officers in identifying and evaluating stages in the sourcing process, planning, supplier selection, and contract management.
Topic 3	<ul style="list-style-type: none">Procedures, strategies, manuals, and internal function involvement.

Topic 4	<ul style="list-style-type: none"> Understand and analyse the added value through procurement and supply chain management: This section of the exam measures skills of supply chain managers related to identifying added value outcomes in procurement and supply and evaluating cost savings, service improvements, and innovationsu contributions.It also measures procurement and supply processes that contribute to added value.

Most CIPS L4M1 Reliable Questions & L4M1 New Dumps Sheet

People always want to prove that they are competent and skillful in some certain area. The ways to prove their competences are varied but the most direct and convenient method is to attend the L4M1 certification exam and get some certificate. Passing the L4M1 certification can prove that you are very competent and excellent and you can also master useful knowledge and skill through passing the L4M1 test. Purchasing our L4M1 guide torrent can help you pass the L4M1 exam and it costs little time and energy.

CIPS Scope and Influence of Procurement and Supply Sample Questions (Q11-Q16):

NEW QUESTION # 11

In the supplier selection part of the Procurement Cycle, what criteria can a Procurement Manager use to ensure they award to the best supplier? (25 points)

Answer:

Explanation:

See the solution inExplanation partbelow.

Explanation:

How to approach this question:

- This is quite an open question and there are many different things you could mention. One way to approach it would be to use Carter's 10 Cs- discuss a couple of these. OR just give a couple of criteria in different paragraphs. Some ideas include: Supplier financial status, Reputation / References, Quality, Availability, CSR Policies / Ethics / Environmental considerations, Accreditations, Added Value. This list is not exhaustive.
- If you're going for Carter's 10 Cs you could name a couple of these: competency, consistency, capability, control, cost, cash, clean, communication, culture, commitment
- I don't think either approach is better or worse. Choose the criteria you know the most about and write about those.
- The question doesn't tell you how many criteria to name, so you have to make a judgement call here. I would aim for 5-6. But if you can only remember 4 that's fine. The main thing they're looking for is that you explain for each one 1) what it is 2) how procurement can check 3) why procurement would look at that criteria 4) an example. If you do too many you risk not going into enough detail on each. It's a balance. 5 is always a good number to aim for if the question doesn't state.

Example Essay

In the procurement cycle, the supplier selection phase is a critical juncture that demands consideration.

Procurement Managers shoulder the responsibility of identifying and awarding contracts to suppliers who not only meet immediate needs, but contribute to the long-term success of the organization. This essay explores various criteria a Procurement Manager can employ to ensure the selection of the best supplier: financial stability, reputation, quality, availability, CSR policies, and added value. Financial stability is a foundational criterion in supplier selection. Assessing a supplier's financial status involves a multifaceted evaluation, with liquidity and gearing ratio taking center stage. The acid test, comparing short-term assets to liabilities, offers insights into a supplier's ability to settle debts promptly, with a ratio exceeding 1 indicating financial health. Meanwhile, the gearing ratio, reflecting the proportion of capital funded by loans, aids in gauging financial risk, with a ratio below 50% considered low-risk. Relying on published Profit and Loss statements and income statements, along with financial credit checks from platforms like Dun and Bradstreet, empowers Procurement Managers to make informed decisions. This financial scrutiny is imperative to avoid entering contracts with suppliers facing imminent financial struggles, safeguarding against potential disruptions to the supply chain. Reputation and references are another pivotal criterion. Seeking references from previous contracts allows Procurement Managers to gauge a supplier's track record in successfully delivering on similar commitments.

Independent reviews and informal market inquiries supplement this information, providing a holistic understanding of a supplier's performance. However, caution is advised in overreliance on past performance, as variables like personnel changes or contract scale differences may impact outcomes. Recognizing that past shortcomings may have been addressed internally further emphasizes the need for a balanced approach to reference evaluation.

Thirdly, Quality. Beyond the product itself, considerations extend to the supplier's technological capabilities, manufacturing

processes, and relevant accreditations such as ISO 9001. Physical visits to supplier sites may be warranted, especially for products like raw materials where samples can be requested. Adhering to recognized safety standards and assessing factors like fire retardancy ensures that the quality of manufactured goods aligns with established benchmarks.

Next, Availability is another important criteria to consider. Procurement Managers must evaluate a supplier's capacity and capability to meet specific requirements. Inquiries about existing contracts and flexibility in response to demand fluctuations provide insights into a supplier's commitment and responsiveness. Assessing the supplier's workload and the significance of the buyer in their client portfolio helps determine the level of attention and service the buyer can expect. A buyer may wish to avoid working for a supplier who is already stretched very thinly with other contracts.

Corporate Social Responsibility (CSR) policies and ethical considerations have gained prominence in supplier selection. Beyond legal compliance, Procurement Managers may scrutinize a supplier's history for convictions or negative press related to corruption, bribery, or fraud. The presence of a Modern Slavery Policy and Environmental Policy, along with relevant accreditations like ISO14001 or Fair Trade certification, attests to a supplier's commitment to ethical and sustainable practices. Procurement would likely seek to appoint a supplier whose CSR vision aligns with their own company's.

Lastly, added value is an important criteria to consider. This is particularly so for Public Sector Organizations governed by the Social Value Act. In addition to meeting contractual requirements, suppliers may offer knowledge sharing, training, improved processes, or contribute to social value by employing local community members or providing apprenticeships. This criterion aligns procurement decisions with broader organizational goals, enhancing the overall impact of supplier relationships and benefitting the local community.

In conclusion, a careful combination of financial scrutiny, reputation assessment, quality evaluation, availability considerations, CSR policies, and added value analysis forms the bedrock of effective supplier selection in the procurement cycle. Procurement Managers, armed with a holistic understanding of these criteria, should seek not only to fulfil immediate needs, but also consider the long-term impact of supplier appointments.

Tutor Notes

- A 'good' scoring answer (50-70%) will explain the criteria well and give examples. If you're looking for a distinction level answer (70%+) you could also mention advantages, disadvantages and risks associated with each of the criteria. For example, when looking at references and reputation it's important to know that a supplier would only ever provide a good reference to you, they would never tell you of a contract that failed.

Another example is that financial data may be skewed- a supplier may have a low score if they are just starting up or have recently remortgaged a property. It's therefore important to get a commentary as well as the figures

/ scores.

- You could also mention that criteria could be weighted e.g. more importance given to quality than financial status and also consider how easy or difficult it would be to get the information e.g. a supplier may say they have lots of availability to deliver the service you require, but they may just be saying this to win business.

How do you know for sure?

- Social Value Act isn't in this syllabus. If you work in Public Sector procurement it's something you'll be very familiar with. If you don't or you're outside of the UK do not worry about this. I've just included it to show how you can bring in your own knowledge to questions like this. You could think of particular criteria that's important to your industry and write about that. The Social Value Act: What is it, and why is it important? (samtaler.co.uk)

- Study guide p.77

NEW QUESTION # 12

(a) Outline FIVE procedures that could be included in the procurement policy manual. (15 marks)

(b) Analyse how TWO Of these procedures can positively influence procurement activities and organisational outcomes for BetaCo. (10 marks)

BetaCo Inc.

BetaCo Inc. is a medium-sized electronics design and manufacturing company that sells audio equipment to event management customers for use in stadiums and festivals. BetaCo has significantly increased its sales over the last five years and is now looking to establish more contracts with new customers. BetaCo Inc. is aware that new customers will require it to have robust procurement processes in place that minimise organisational risk.

Currently, all procurement activities are dealt with by BetaCo's small, customer-orientated project teams. Each project team makes its own procurement decisions with limited central oversight and does not follow standardised processes. This type of activity has resulted in BetaCo frequently encountering overspending on projects, and senior management is concerned that there is a lack of control over what products and services the project teams buy. In addition, suppliers regularly complain that their invoices are not paid on time, which has caused issues for future purchases.

To address these challenges, BetaCo has decided to create a centralised procurement and supply management department. BetaCo has recently appointed Pat Kennedy as its procurement and supply manager. BetaCo has also recruited three senior buyers, five

buyers and two assistant buyers, who will join the company in the next few months.

Pat's first task is to establish a procurement policy manual. The manual will contain a set of procedures that can be followed by the new procurement team and it will control the company's procurement activities to ensure that the issues BetaCo is facing are effectively managed.

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

(a) Five Procedures to Include in BetaCo's Procurement Policy Manual

- * Purchase Requisition and Approval Procedure

- * All procurement requests must be formally submitted through standardized purchase requisition forms and approved by designated authorities before any purchase action is taken.

- * This ensures control over spending and adherence to budgets.

- * Supplier Selection and Evaluation Procedure

- * A structured process to identify, assess, and approve suppliers based on criteria such as quality, reliability, price, and compliance with BetaCo's standards.

- * Supplier performance should be regularly reviewed to maintain quality and reliability.

- * Purchase Order (PO) Management Procedure

- * Clear guidelines on raising, issuing, and tracking purchase orders to suppliers, ensuring orders are placed only after necessary approvals and conform to agreed terms.

- * Purchase orders serve as formal contracts protecting both BetaCo and suppliers.

- * Invoice Processing and Payment Procedure

- * Defines steps for receiving, verifying, and authorizing supplier invoices, followed by timely payment according to agreed payment terms.

- * This avoids late payments and maintains good supplier relationships.

- * Conflict of Interest and Ethics Compliance Procedure

- * Policies requiring employees to declare any conflicts of interest and adhere to ethical standards in procurement activities to ensure transparency and fairness.

- * This prevents fraud, corruption, and protects BetaCo's reputation.

(b) Analysis of How TWO Procedures Positively Influence Procurement Activities and Organisational Outcomes for BetaCo

1. Purchase Requisition and Approval Procedure

- * Positive Influence on Procurement Activities: Introducing a formal purchase requisition and approval procedure provides BetaCo with much-needed control and oversight over spending, addressing the current issue of overspending by project teams. It ensures that all procurement requests are validated against project budgets and company policies before any purchase commitment is made.

- * Impact on Organisational Outcomes: This procedure supports financial discipline and accountability, reducing uncontrolled expenditures and improving cost management. It also creates a clear audit trail for procurement decisions, helping senior management monitor and enforce compliance, thus reducing organisational risk.

2. Invoice Processing and Payment Procedure

- * Positive Influence on Procurement Activities: By implementing a standardized invoice verification and timely payment procedure, BetaCo can resolve the existing problem of late payments to suppliers.

This ensures invoices are matched to purchase orders and delivery notes, approved promptly, and paid within agreed terms.

- * Impact on Organisational Outcomes: Timely payments strengthen supplier relationships, enhancing trust and reliability in supply continuity, which is critical for BetaCo's growing customer base and production needs. It also helps avoid disputes or disruptions caused by delayed payments, contributing to smoother operations and better supplier cooperation.

Conclusion:

For BetaCo, incorporating structured procurement procedures into the policy manual is essential for centralising control, improving transparency, and reducing risks associated with decentralized procurement activities. Specifically, purchase requisition and approval alongside invoice processing procedures will directly address current challenges, leading to improved financial control, supplier relationships, and operational efficiency, ultimately supporting BetaCo's growth ambitions and reputation.

NEW QUESTION # 13

What is a P2P system (5 points)? Explain the impact that using IT systems can have on the way the Procurement department of an organisation functions (25 points).

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

- Definition of P2P - Purchase to Pay or Procure to Pay is the process an organisation takes from ordering a product to paying for it. The main stages of this process are product ordering, supplier requisition to pay, budget authorisation, receipt of delivery, and invoice processing.
- Impact of using IT Systems - can include the use of these systems: EPOS, barcodes/ RDIF, e-commerce systems such as POs and invoicing, and electronic communications such as email. Impacts can be; increased productivity, quicker processes, higher levels of visibility, increased responsiveness to demands, cost savings, less paper used, supplier relationships are managed virtually rather than in person. Generally the impacts are positive, but you could also discuss some disadvantages or challenges a department might face as the question is quite open.

Example Essay

A Procure-to-Pay system is a comprehensive solution that automates and integrates the procurement process within an organization, covering the entire lifecycle from requisitioning goods or services to making payments to suppliers.

The P2P process includes the following: a buyer requests an item, they put in a requisition, it is accepted by the supplier, the item is delivered and the item is then paid for. The order of the steps may be different depending on the industry / requirement (e.g. sometimes payment is made before delivery), or sometimes there are additional steps such as getting the requisition approved by a manager.

Nowadays the P2P process is mainly digitalised- orders are made online or via a PO system and payment is made via BACS. It is not common to pay for items in cash or by cheque any more. This digitalisation has had many effects on the way the procurement department functions. The P2P system streamlines and standardizes the purchasing process, enhancing efficiency, transparency, and control.

The integration of Information Technology (IT) systems has a profound impact on the functioning of the Procurement department within an organization. This digital transformation brings about significant improvements in efficiency, transparency, collaboration, and decision-making processes. Some of the key impacts include:

- Raised productivity - using IT systems results in quicker processes and they're often more accurate and consistent than humans doing the tasks manually. For example, an electronic requisition system can flag when a requisition isn't completed properly (e.g. part of the requisition is missing or a supplier name has been spelled incorrectly). When doing this manually the errors may not be spotted.
- Innovation - the use of IT means new avenues can be explored in terms of new product markets and new supply chains. Without the use of IT, procurement may be limited to working with local suppliers or those they can find in the phone book. Using IT systems such as e-auctions and even just the internet to complete research, opens up more opportunities to make purchases. This could involve working with international supply chains and result in cost savings for the business.
- Improved business processes - the use of IT means there is more transparency as everything is recorded and it is easier for managers to oversee. This results in less risk exposure for the business, particularly in fraud.

The use of IT also standardises processes which makes it easy for everyone to know what to do.

- When IT is used, there is an increased responsiveness of the procurement function - it allows for 24/7/365 ordering compared to making purchases in person in a shop which may only be open 9-5. Moreover, there are paperless communications when IT is used- this has a positive environmental impact
- Supplier Relationship Management (SRM) - IT systems support Supplier Relationship Management by providing tools to assess and manage supplier performance. This can include logging KPIs and tracking supplier performance. SRM functionalities enhance communication, collaboration, and visibility into supplier relationships.

In summary, the integration of IT systems into the Procurement department transforms traditional practices, making processes more streamlined, data-driven, and strategically focused. The impact is not only on operational efficiency but also on the ability of the procurement function to contribute strategically to the organization's overall objectives.

Tutor Notes

- The word impact is quite vague. I've mainly talked about advantages but you could discuss the impact that the use of IT has had on the department, not just in how it functions, but in how it is perceived. IT has professionalised the procurement industry as a whole- it's no longer seen as 'purchasing' but as a vital function within a business that contributes to added value and strategic goals.
 - You could also talk about the impact it's had on ways of working. The use of IT has allowed for innovative procurement and manufacturing techniques such as Just-In-Time. The use of IT also ends silo-working, instead allowing for more collaboration with other business departments and the supply chain as a whole.
- LO 3.4 P. 171

NEW QUESTION # 14

Describe regulation that govern the Public Sectors and explain how this may impact upon procurement activities (25 marks).

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

How to approach this question

- You do need to know some legislation for public sector here. This may be difficult if you don't work in the Public Sector. If you're struggling with this, you could also talk about general legislation that governs all types of organisations such as the Equalities Act and Modern Slavery Act.
- This is also a tough question if you're not British. CIPS is a UK based organisation and the syllabus therefore only talks about British legislation. If you're in a different country you could talk about the legislation in your own country, providing the question doesn't specifically mention UK Law.
- Either way I would recommend knowing a couple of pieces of British Legislation. You don't need to be an expert but just state what they are and what the purpose is should be enough to get you a pass.

Example essay

The public sector, which encompasses various governmental and state-owned enterprises, plays a pivotal role in the governance and provision of essential services. This sector operates under a strict framework of regulations and policies, ensuring that its operations are fair, transparent, and accountable. Among the most critical aspects of these operations is procurement, the process through which the public sector acquires goods, services, and works. This essay will explain key regulations governing the public sector, focusing on the Public Contracts Regulations (PCR) 2015, Late Payment Regulations 2016, Equalities Act 2010, and Public Services (Social Value) Act 2012, and explores how these regulations impact procurement activities.

The Public Contracts Regulations (PCR) 2015

The PCR 2015 plays a foundational role in public sector procurement in the UK. It sets out the procedures for procuring contracts, aiming to ensure fairness and transparency in the process. The regulations mandate that all procurement processes must be conducted in a manner that prevents discrimination and allows equal access to potential contractors, regardless of their size or location. For example, the open tendering process under PCR

2015 has enabled a more diverse range of companies, including small and medium-sized enterprises, to participate in government contracts, enhancing competition and innovation. The four 'pillars' of the PCR are derived from EU Procurement Directives and are: non-discrimination, free movement of goods, equality of treatment and transparency.

Late Payment Regulations 2013

The Late Payment Regulations 2013 address a critical aspect of procurement: the timely payment for goods and services. This regulation ensures that public sector organizations pay their suppliers within a stipulated time frame, significantly impacting the financial stability of these suppliers. For instance, the regulation has been particularly beneficial for small businesses that rely on prompt payments to maintain cash flow. The introduction of these regulations has improved the trust between public sector entities and their suppliers, leading to more efficient procurement processes.

Equalities Act 2010

The Equalities Act 2010 is another crucial piece of legislation impacting public sector procurement. This Act prohibits discrimination in the workplace and in the provision of services, extending its influence to the procurement process. Public sector entities must ensure that their procurement decisions do not discriminate against any group and that they promote equality. For instance, when a public sector organization issues a tender, it must ensure that the selection criteria do not unfairly disadvantage any potential supplier based on irrelevant characteristics. This approach not only fosters a more inclusive procurement environment but also helps to tap into a wider talent and supplier pool, enhancing the quality and effectiveness of public services.

Public Services (Social Value) Act 2012

The Public Services (Social Value) Act 2012 marks a significant shift in how procurement is approached in the public sector. This Act requires public sector organizations to consider how the services they procure can improve the economic, social, and environmental well-being of their area. This means that when a public sector entity procures goods or services, it must consider factors beyond just the price and quality. For example, a local government might prioritize suppliers who can demonstrate a commitment to environmental sustainability or who offer employment opportunities to local residents. This approach to procurement encourages a more holistic view of value for money, factoring in the wider impact of procurement decisions on society.

Public Accountability and Freedom of Information Requests

In addition to these specific regulations, the concept of public accountability and the mechanism of Freedom of Information requests play a crucial role in the public sector, especially in procurement activities. Public accountability ensures that entities are answerable to the public and their actions are transparent. Freedom of Information requests enable individuals and organizations to access information held by public authorities, which includes details of procurement decisions and contracts. This transparency is critical in ensuring that procurement activities are conducted ethically and responsibly, deterring corruption and mismanagement.

In conclusion, the regulation of the public sector, particularly in the realm of procurement, are complex.

Regulations such as the PCR 2015, Late Payment Regulations 2016, Equalities Act 2010, and the Public Services (Social Value) Act 2012, along with the principles of public accountability and transparency, ensure that procurement activities are conducted in a fair, transparent, and socially responsible manner. These regulations not only safeguard the interests of suppliers, especially smaller businesses, but also ensure that the public sector remains a model of integrity and efficiency and that taxpayers' money is well spent.

Tutor Notes

- Okay this is important: The PCR 2015 regulations are being rescinded in 2024. They're based on EU Law and the UK has left the EU. I know we left a while ago now but it's taken us a long time to address the issue and figure out what we want to do about it. There was also a pandemic that got in the way of people making any decisions in parliament that weren't to do with Covid. The PCR 2015 will be replaced in late 2024 with new 'British' rather than European rules.
- At the time of writing this (December 2023) we don't 100% know what the new rules are going to look like and if you're taking

this exam from November 2024 onwards, I recommend doing a bit of research into the new regulations.

- Now the complicated bit- the CIPS syllabus is valid from 2024-2028 and doesn't address that legislation is changing. I therefore don't really know what they're going to expect when students are taking this exam and the study guide information is out of date. If you're not working in the Public Sector, how are you to know the legislation has changed?

- My advice is this- briefly learn PCR 2015- the four pillars in particular, and when the new legislation comes out, have a quick google and see if these pillars are still the same. The regs aren't going to change THAT much - things like transparency and equal treatment are still going to be really important, but there may be some slight language changes. Plus, if you're able to mention in an essay that there's new legislation, it's going to make you sound super clever.

- LO 4.2 p.211

NEW QUESTION # 15

Industry Sectors can be classified as Primary, Secondary and Tertiary. What is meant by an 'industry sector'?

Describe the main characteristics of and types of business you will find in these. (25 marks)

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

How to approach this question

- The first question can be a simple introduction with a bit of extra detail. The main 'meat' to your essay is going to be explaining the three sectors, their characteristics and example businesses.

- Aim for three well explained characteristics as a minimum

Example essay

An industry sector refers to a broad category or grouping of businesses and economic activities that share similar characteristics and functions in the production and distribution of goods and services. These sectors are often classified into three main categories:

Primary, Secondary, and Tertiary. Here are the main characteristics and types of businesses you will find in each of these industry sectors:

1. Primary Sector:

*Characteristics: The primary sector involves activities related to the extraction and production of raw materials and natural resources directly from the environment. This sector relies on nature and weather patterns: businesses in the primary sector are highly dependent on natural factors such as climate, weather, soil quality, and geographic location. These factors can significantly impact the productivity and profitability of primary sector activities. Extreme weather such as floods can severely impact this sector. Moreover there is a seasonality to this sector and many activities in the primary sector require a significant amount of manual labour, particularly in agriculture, fishing, and forestry. However, modern technology has also been integrated into some primary sector activities to increase efficiency.

*Types of Businesses: a. Agriculture: This includes farming, crop cultivation, livestock raising, and forestry. b.

Mining and Extraction. c. Fishing and Aquaculture: Forestry and Logging: Includes the harvesting of timber and related activities.

2. Secondary Sector:

*Characteristic: The secondary sector focuses on the transformation of raw materials and intermediate goods into finished products. The main characteristic of the sector is that it requires high levels of machinery and industrial techniques. There is a reliance on technology. Secondly, the secondary sector adds significant value to the products compared to their raw material form. This value addition is achieved through processing, assembly, and quality control processes. The third main characteristic is standardisation: Manufacturing processes often involve standardization of components and processes to ensure consistency and quality in the final products. Standardization helps in economies of scale.

*Types of Businesses: a. Manufacturing: This sector includes factories and plants that produce tangible goods such as automobiles, electronics, textiles, and machinery. b. Construction: Involves the building and construction of structures like buildings, bridges, and infrastructure. c. Utilities: Companies providing essential services like electricity, gas, and water supply fall into this category.

3. Tertiary Sector:

*Characteristic: The tertiary sector is also known as the service sector and involves businesses that offer various services to consumers and other businesses. The main defining characteristic of this sector is Intangibility: Services are intangible and cannot be touched or held. They are often experienced directly by consumers through interactions with service providers or through the use of technology. Secondly, High Human Involvement: The tertiary sector relies heavily on a skilled and often highly educated workforce to deliver services effectively. This can include professionals such as doctors, lawyers, teachers, and customer service representatives. Lastly, Customization: Many services are customized to meet the specific needs and preferences of individual clients or customers. This personalization is a key characteristic of the tertiary sector.

For example Legal Advice will always be different depending on the specific needs of the client.

*Types of Businesses: a. Retail and Wholesale: Businesses engaged in the sale of goods to consumers or to other businesses. b.

Healthcare and Education: This includes hospitals, clinics, schools, colleges, and universities. c. Financial Services: Banks, insurance companies, and investment firms are part of this sector. d.

e. Professional Services: Legal, accounting, consulting, and IT services are part of the tertiary sector.

- I've gone overboard on naming the types of organisation in the different sectors. You don't have to remember all of these. 3 examples is sufficient to get good marks. I've just named them all so you can see what could be considered a right answer.

1.

*Quinary Sector: The quinary sector comprises high-level decision-making and leadership roles in areas such as government, academia, healthcare, and top-level corporate management.

NEW QUESTION # 16

It is acknowledged that there are numerous L4M1 learning questions for candidates for the L4M1 exam, however, it is impossible for you to summarize all of the key points in so many materials by yourself. But since you have clicked into this website for L4M1 practice materials you need not to worry about that at all because our company is especially here for you to solve this problem. We have a lot of regular customers for a long-term cooperation now since they have understood how useful and effective our L4M1 Actual Exam is.
