And the ISTQB Certified Tester Advanced Level - Test Manager CTAL-TM-001 price is affordable. With 365 days updates.

## ISTQB Certified Tester Advanced Level - Test Manager Sample Questions (Q129-Q134):

### NEW QUESTION # 129

You are the Test Manager on a new project. The schedule is aggressive and will require the team to work at peak efficiency. The requirements are not well defined yet, but it is clear that the project will be using new technologies. To help the developers meet the development schedule, an offshore group will be added to the development team.

At this time there is not enough budget to add more testing resources. The project stakeholders are very concerned about the quality of the delivered product and will be watching the project closely, particularly during the testing cycles. The exit criteria from the system test level require no open high priority/severity defects, 100% pass rate for all test cases covering risks that are classified as "high" or "very high", 95% pass rate for all "medium" risks and 75% pass rate for all "low" and "very low" risks.

Given this information, which of the activities of the standard test process are the most critical for the Test Manager to perform? [3]

- A. Test execution
- **B. Test monitoring and control**
- C. Requirements reviews

- D. Project management, particularly regarding scheduling and budgeting

**Answer: B**

Explanation:

The most critical activity of the standard test process for the Test Manager to perform in this scenario is test monitoring and control. This is because test monitoring and control involves measuring and evaluating the test progress, quality, and risks, and taking corrective actions when necessary. Given the aggressive schedule, the unclear requirements, the new technologies, the offshore development team, the limited testing resources, and the high stakeholder expectations, the Test Manager needs to closely monitor and control the testing activities to ensure that the test objectives and exit criteria are met, and that any deviations or issues are identified and resolved in a timely manner. ### NEW QUESTION # 130

When is the metric for the percentage of requirements coverage defined?

- A. Test execution
- B. Test completion
- C. Test monitoring
- **D. Test planning**

**Answer: D**

Explanation:

\* Context Analysis:

\* Requirements coverage must be defined during test planning to ensure tests align with all requirements from the start of the project.

\* Evaluation of Options:

\* A. Test planning:

\* Correct. Coverage goals are established during planning to define test objectives and scope.

\* B. Test monitoring:

\* Incorrect. Monitoring tracks progress but doesn't define coverage.

\* C. Test execution:

\* Incorrect. Execution measures coverage but doesn't define it.

\* D. Test completion:

\* Incorrect. Completion reviews coverage metrics but doesn't define them.

\* Syllabus Alignment:

\* Test planning (TM-1.1.1) includes defining coverage goals and ensuring alignment with requirements.

### NEW QUESTION # 131

A test log is one of the documents that need to be produced in this domain in order to provide evidence of testing. However, the level of detail of test logs can vary. Which of the following is NOT an influencing factor for the level of detail of the test logs being produced? 1 credit

- A. Test level
- **B. Experience level of testers**
- C. Level of test execution automation
- D. Regulatory requirements

**Answer: B**

Explanation:

### NEW QUESTION # 132

You are responsible for porting a performance testing tool to a new operating system. You are at what stage in the tool's lifecycle?

- A. Acquisition
- **B. Evolution**
- C. Retirement
- D. Support and Maintenance

**Answer: B**

Explanation:

According to the tool lifecycle model, the evolution stage is when the tool is adapted to new requirements or environments, such as a new operating system. This stage involves modifying the tool to meet the changing needs of the users and the system. The evolution stage is followed by the retirement stage, when the tool is no longer used or supported. ### NEW QUESTION # 133

Which two of the following are considered to be advantages when specifying detailed test conditions?

- a) They may influence development activities.
- b) They form the basis for vertical traceability
- c) They are suited to agile methodology
- d) They can aid defect prevention
- e) They are quick and easy to deliver

SELECT ONE OPTION

- A. a and c.
- B. b and c.
- **C. a and G.**
- D. d and e.

**Answer: C**

### NEW QUESTION # 134

.....

How can you quickly change your present situation and be competent for the new life, for jobs, in particular? The answer is using CTAL-TM-001 practice materials. From my perspective, our free demo is possessed with high quality which is second to none. This is no exaggeration at all.
