Reliable JS-Dev-101 Cram Materials, JS-Dev-101 Reliable Exam Vce

Our design and research on our JS-Dev-101 exam dumps are totally based on offering you the best help. We hope that learning can be a pleasant and relaxing process. If you really want to pass the JS-Dev-101 exam and get the certificate, just buy our JS-Dev-101 Study Guide. Our simulating exam environment will completely beyond your imagination. Your ability will be enhanced quickly. Let us witness the miracle of the moment!

Salesforce Certified JavaScript Developer - Multiple Choice Sample Questions (Q85-Q90):

NEW QUESTION # 85
A developer is setting up a new Node.js server with a client library that is built using events and callbacks.
The library:
* Will establish a web socket connection and handle receipt of messages to theserver
* Will be imported with require, and made available with a variable called we.
The developer also wants to add error logging if a connection fails.
Given this info, which code segment shows the correct way to set up a client with two events that listen at execution time?

- A. try{ws.connect (( ) => {console.log('connected to client'); });} catch(error) { console.log('ERROR' ,error); };}
- B. ws.on ('connect', ( ) => {console.log('connected to client'); ws.on('error', (error) => { console.log('ERROR' ,error); });});
  C. ws.on ('connect', ( ) => { console.log('connected to client'); }}; ws.on('error', (error) => { console.log('ERROR' , error); }};
- C. ws.connect (( ) => {console.log('connected to client'); }).catch((error) => { console.log('ERROR' , error); }};

Answer: A

NEW QUESTION # 86

A developer needs to debug a Node.js web server because a runtime error keeps occurring at one of the endpoints.
The developer wants to test the endpoint on a local machine and make the request against a local server to look at the behavior. In the source code, the server.js file will start the server. The developer wants to debug the Node.js server only using the terminal.
Which command can the developer use to open the CLI debugger in their current terminal window?
(With corrected typing errors: node_inspect → node inspect, node_start_inspect → node start inspect.)

- **A. node inspect server.js**
- B. node start inspect server.js
- C. node -i server.js
- D. node server.js --inspect

Answer: A

Explanation:
Comprehensive and Detailed Explanation From Exact Extract JavaScript knowledge:
Node.js includes a built-in command-line (CLI) debugger. To use it directly in the terminal, the standard command is:
node inspect server.js
This:
Starts server.js under the Node.js inspector.
Opens the CLI debugger right in the terminal window where you ran the command.
Lets you interactively:
Step through code
Set breakpoints
Inspect variables
Continue execution, etc.
Why B is correct:
Option B (corrected to node inspect server.js) is exactly the standard Node.js command to run a script under the CLI debugger in the current terminal.
It does not rely on any external GUI tools.
You stay entirely in the terminal to debug.
Why the other options are incorrect:
A . node start inspect server.js
There is no start subcommand like this in standard Node.js CLI.
This is not a valid Node.js debugging command.
C . node server.js --inspect
This starts Node.js with the Inspector protocol enabled and is typically used to connect external tools like Chrome DevTools or VS Code.
It does not open the CLI debugger in the current terminal. Instead, it opens a debugging port that other tools attach to.
The question specifically says "only using the terminal" and "open the CLI debugger in their current terminal window", which points to node inspect, not --inspect.
D . node -i server.js
-i starts Node in interactive REPL mode, optionally after running a script.
This is for an interactive shell, not the Node debugger.
It does not provide breakpoint/step/next/continue debugging features like the CLI debugger.
Therefore, the only option that opens the Node.js CLI debugger in the current terminal is:
JavaScript / Node.js knowledge / Study Guide references (concept names only, no links):
Node.js CLI debugger: node inspect <script>
Node.js inspector protocol: node --inspect
Difference between CLI debugger and DevTools-based debugging
Node.js command-line options and subcommands

_____

NEW QUESTION # 87

Refer to the code below:
const car = {
price:100,
getPrice:function(){

```
return this.price;
}
};
const customCar = Object.create(car);
customCar.price = 70;
delete customCar.price;const result = customCar.getPrice();
```
Whatis the value of result after the code executes?

- A. undefined
- B. 0
- C. 1
- D. null

Answer: C

NEW QUESTION # 88

A developer has a formatName function that takes two arguments, firstName and lastName and returns a string. They want to schedule the function to run once after five seconds.
What is the correct syntax toschedule this function?

- A. setTimeout ('formatName', 5000, 'John', "Doe');
- B. setTimeout (formatName('John', "Doe'), 5000);
- C. setTimeout (formatName(), 5000, "John", "BDoe");
- D. setTimout(() => { formatName("John', 'Doe') }, 5000);

Answer: A

NEW QUESTION # 89

Given the code below:
`const copy = JSON.stringify([ newString(' false '), new Bollean( false ), undefined ]);` What is the value of copy?

- A. -- [false, { }]--
- B. -- [\"false\" , false, undefined]--
- C. -- [\"false\", { }]--
- D. -- [\"false\" ,false, null]--

Answer: D

NEW QUESTION # 90

......

Perhaps now you are one of the candidates of the JS-Dev-101 exam, perhaps now you are worried about not passing the exam smoothly. Now we have good news for you: our JS-Dev-101 study materials will solve all your worries and help you successfully pass it. With the high pass rate as 98% to 100%, you will find that we have the best JS-Dev-101 learning braindumps which contain the most accurate real exam questions.

Reliable JS-Dev-101 Cram Materials: https://www.2pass4sure.com/Salesforce-Developers/JS-Dev-101-actual-exam-braindumps.html

Salesforce JS-Dev-101 Updated Demo High-efficiency Form of Review, Therefore, how to pass Salesforce JS-Dev-101 exam and gain a certificate successfully is of great importance to people, 2Pass4sure guarantees you pass Salesforce Salesforce Developers JS-Dev-101 exam at first attempt, 2Pass4sure offers comprehensive and upgraded JS-Dev-101 exam questions to prepare the Salesforce Certified JavaScript Developer - Multiple Choice Exam, Before getting ready for your exam, having the ability to choose the best JS-Dev-101 practice materials is the manifestation of wisdom.

If you're open to new networking opportunities, JS-Dev-101 the Open Profile feature makes it easier for other LinkedIn members to contact you, In the case of studies, this translates to if you can't Reliable JS-Dev-101 Cram Materials attack the study methods or results, attack the researchers andor the research backers.

100% Pass 2026 Salesforce JS-Dev-101: Salesforce Certified JavaScript Developer - Multiple Choice –Professional Updated Demo

High-efficiency Form of Review, Therefore, how to pass Salesforce JS-Dev-101 Exam and gain a certificate successfully is of great importance to people, 2Pass4sure guarantees you pass Salesforce Salesforce Developers JS-Dev-101 exam at first attempt.
