

CDFOM受験料過去問 & CDFOM復習内容

どんなに宣伝しても、あなたの自身体験が一番重要なことです。我々社のFast2testからEXIN CDFOM問題集デモを無料でダウンロードできます。多くの受験生は試験に合格できたのを助けるEXIN CDFOMソフト版問題はあなたの大好きになります。CDFOM問題集を使用してから、あなたはIT業界でのエリートになります。

EXIN CDFOM 認定試験の出題範囲:

| トピック | 出題範囲 |
|--------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| トピック 1 | <ul style="list-style-type: none">The Data Centre Organization: Addresses organizational structure, roles and responsibilities, shift management, performance management, training, career development, and succession planning. |
| トピック 2 | <ul style="list-style-type: none">MonitoringReportingControl: Addresses performance oversight through monitoring, escalation procedures, reporting, and trend analysis. |
| トピック 3 | <ul style="list-style-type: none">Environmental Sustainability: Focuses on minimizing environmental impact through power efficiency, waste management, and renewable energy integration. |
| トピック 4 | <ul style="list-style-type: none">Data Centre Operations: Focuses on daily operational activities and procedures supporting continuous facility functioning. |
| トピック 5 | <ul style="list-style-type: none">Governance, Risk and Compliance: Covers management framework including compliance, risk management, document control, financial management, and vendor oversight. |
| トピック 6 | <ul style="list-style-type: none">Managing Safety & Statutory Requirements: Focuses on workplace safety compliance, including safety policies, training, Permit to Work systems, PPE, emergency preparedness, and safety audits. |
| トピック 7 | <ul style="list-style-type: none">Organizational Resilience: Addresses business continuity, facility redundancy, Business Impact Analysis, and disaster recovery preparedness. |

EXIN Certified Data Center Facilities Operations Manager 認定 CDFOM 試験問題 (Q20-Q25):

質問 # 20

The needs analysis has been completed and the data center organization is tasked with the capability assessment.

Which of the below is a mandatory activity as part of the capability assessment?

- A. Identify applicable safety requirements
- B. Review the security needs
- C. Determine the availability requirements
- **D. Create inventory of skills, knowledge and capacity**

正解: D

解説:

A capability assessment evaluates whether the data center organization is capable of delivering the defined services.

The mandatory activity is to:

Create an inventory of skills, knowledge, and capacity of the workforce and resources.

This includes:

- * Current staff technical skills
- * Certifications
- * Experience
- * Availability (capacity)
- * Backup and contingency roles
- * Alignment with service demands and SLAs

Why other options are incorrect:

- * A: Security needs are part of service requirements, not capability assessment.
- * C: Availability requirements are determined during needs analysis, not capability assessment.
- * D: Safety requirements belong to statutory and compliance analysis, not capability assessment.

Thus, B is the correct answer.

EPI DCFOM-Aligned Reference Concepts (Paraphrased)

- * Capability assessment requires determining skills, competencies, and available capacity.
- * Ensures the organization can meet defined services and SLAs.

質問 # 21

What is the purpose of a weight factor in a Request for Proposal (RFP) evaluation matrix?

- A. To allow for full negotiation once vendors are shortlisted
- **B. To reflect the importance of the selection criteria**
- C. To control the prices of the various offerings received
- D. To provide an overview of the number of employees working for the vendor

正解: B

解説:

In an RFP evaluation matrix, weight factors are applied to highlight the relative importance of each evaluation criterion.

Examples of weighted criteria include:

- * Technical compliance
- * Response time
- * Cost
- * Vendor capability
- * Warranty terms
- * SLA performance

The weight factor ensures that more critical criteria influence the final score more heavily, enabling an objective and structured vendor selection.

Why the other options are incorrect:

- * A: Weighting does not control prices.

- * C: Negotiation comes after scoring.
 - * D: Workforce size is not the purpose of weighting.
- Thus, B is correct.
- EPI DCFOM-Aligned Reference Concepts (Paraphrased)
- * Weighted scoring ensures high-priority criteria significantly influence vendor selection.
 - * Supports objective and transparent procurement.

質問 # 22

Heavy equipment needs to be moved to another side of the computer room so that the three (3) workers can continue their drilling and cutting off the wall for a new cable tray. Four (4) staff members are required to move the equipment so there is one extra staff member required to assist. The safety manager who is overseeing the works is asked to help moving the equipment. Is the safety manager allowed to step in and assist with the move?

- **A. No**
- B. Only when the total weight per person does not exceed the maximum allowed by local regulations
- C. Yes
- D. Only if this does not create a security vulnerability

正解: A

解説:

In EPI's safety and statutory requirements framework, the Safety Manager's role is strictly supervisory during ongoing work activities. They are responsible for monitoring, verifying compliance, ensuring safe practices, and intervening only to correct unsafe conditions—not to physically participate in the hazardous task.

Key safety principles include:

- * Independence of the Safety Function The Safety Manager must remain impartial and fully observant.

If they participate directly in labor activities (such as lifting equipment), they can no longer maintain oversight of:

- * ongoing safety compliance

- * worker actions

- * environmental hazards

- * risk escalation

- * Conflict of Responsibilities By physically engaging in the task, the Safety Manager becomes distracted and loses supervisory visibility, which introduces risk to the entire operation.

- * Competency and Authorization Requirements Personnel assigned to physically move heavy equipment must:

- * be authorized workers

- * be trained in manual handling

- * have been briefed for the specific PTW-controlled activity

The Safety Manager is not part of the operational lifting team unless specifically assigned beforehand, which is not the case here.

- * EPI's Supervisory Separation Principle The safety oversight role must remain dedicated and unbroken during all hazardous or controlled work activities.

Therefore, the Safety Manager must not step in to replace or supplement labor resources.

Correct answer: A - No.

EPI DCFOM-Aligned Reference Concepts

- * Safety oversight must remain independent and uninterrupted.

- * Safety Manager responsibilities do not include participating in physical hazardous activities.

- * Supervisory personnel cannot assume operational roles during high-risk work.

質問 # 23

Who is accountable for the outcome of a project?

- A. The supplier
- B. The user/customer
- **C. The business**
- D. The project manager

正解: C

解説:

In EPI's project management framework, responsibility and accountability are clearly defined. While the project manager is

responsible for planning, coordinating, executing, monitoring, and controlling the project, accountability for the outcome rests with the business-the entity that sponsors the project. The business initiates the project, approves its objectives, allocates resources, provides governance, and ultimately benefits from or is impacted by the results. Therefore, success or failure of the project ties directly back to the business rather than the project manager or any other stakeholder.

The project manager has operational responsibility, but the business owns the strategic outcomes, investment risks, and long-term impact. The user/customer contributes requirements and feedback but is not accountable for overall delivery. The supplier delivers contracted components or services but does not own the full project lifecycle or outcome.

EPI emphasizes that accountability must reside with the sponsoring business to avoid gaps in ownership, unclear decision-making, and governance failures. This structure ensures that the project aligns fully with organizational objectives and that decisions support long-term value.

Thus, the correct answer is C - The business.

質問 # 24

Of the below, which is a power efficiency indicator?

- A. nil, w
- B. uw
- C. CPU
- **D. PUE**

正解: D

解説:

Power Usage Effectiveness (PUE) is the most widely recognized and adopted energy efficiency indicator for data centers globally and is emphasized heavily within the EPI sustainability framework. PUE measures how effectively a data center uses power and is calculated by dividing the Total Facility Power by the IT Equipment Power. The purpose of this indicator is to show how much of the energy consumed by the facility actually reaches IT equipment (servers, storage, network gear) versus how much is consumed by support infrastructure such as cooling, UPS losses, lighting, and building systems.

A lower PUE indicates a more efficient data center, with values approaching 1.0 representing ideal efficiency-where nearly all consumed power is being used for IT load. PUE is essential for benchmarking, energy-saving initiatives, identifying efficiency improvement opportunities, and measuring the success of infrastructure optimization projects. The other options listed-nil, w; CPU; and uw-are irrelevant to facility energy efficiency metrics. CPU relates to computing processors, not facility efficiency; the others are incorrect units or meaningless terms in this context.

Thus, PUE is the correct and industry-standard power efficiency indicator.

質問 # 25
