100% Pass Quiz Microsoft - Trustable DP-700 - Implementing Data Engineering Solutions Using Microsoft Fabric Exam Cram Review

The Implementing Data Engineering Solutions Using Microsoft Fabric (DP-700) questions are being offered in three easy-to-use and different formats. These formats are Microsoft Dumps PDF, desktop-based Microsoft DP-700 practice test software, and web-based DP-700 practice exam. All these three DP-700 Exam Dumps formats contain real, valid, and updated DP-700 exam questions that surely repeat in the upcoming DP-700 exam and you can easily pass the Microsoft DP-700 exam on the first attempt.

Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric Sample Questions (Q57-Q62):

NEW QUESTION # 57

You have a Fabric warehouse named DW1 that contains four staging tables named ProductCategory, ProductSubcategory, Product, and SalesOrder. ProductCategory, ProductSubcategory, and Product are used often in analytical queries.

You need to implement a star schema for DW1. The solution must minimize development effort.

Which design approach should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 58

You have a Fabric workspace that contains a Real-Time Intelligence solution and an eventhouse. Users report that from OneLake file explorer, they cannot see the data from the eventhouse. You enable OneLake availability for the eventhouse. What will be copied to OneLake?

- A. only the existing data in the eventhouse
- B. no data
- **C. both new data and existing data in the eventhouse**
- D. only new data added to the eventhouse
- E. only data added to new databases that are added to the eventhouse

Answer: C

Explanation:

When you enable OneLake availability for an eventhouse, both new and existing data in the eventhouse will be copied to OneLake. This feature ensures that data, whether newly ingested or already present, becomes available for access through OneLake, making it easier for users to interact with and explore the data directly from OneLake file explorer.

NEW QUESTION # 59

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a KQL database that contains two tables named Stream and Reference. Stream contains streaming data in the following format.

Reference contains reference data in the following format.

Both tables contain millions of rows.

You have the following KQL queryset.

You need to reduce how long it takes to run the KQL queryset.

Solution: You change project to extend.

Does this meet the goal?

- **A. No**
- B. Yes

Answer: A

Explanation:

Using extend retains all columns in the table, potentially increasing the size of the output unnecessarily. project is more efficient because it selects only the required columns.

NEW QUESTION # 60

You have a Fabric workspace named Workspace1 that contains a warehouse named Warehouse1.

You plan to deploy Warehouse1 to a new workspace named Workspace2.

As part of the deployment process, you need to verify whether Warehouse1 contains invalid references. The solution must minimize development effort.

What should you use?

- **A. a Python script**
- B. a deployment pipeline
- C. a T-SQL script
- D. a database project

Answer: A

Explanation:

A deployment pipeline in Fabric allows you to deploy assets like warehouses, datasets, and reports between different workspaces

(such as from Workspace1 to Workspace2). One of the key features of a deployment pipeline is the ability to check for invalid references before deployment. This can help identify issues with assets, such as broken links or dependencies, ensuring the deployment is successful without introducing errors. This is the most efficient way to verify references and manage the deployment with minimal development effort.

NEW QUESTION # 61

You have a Fabric workspace that contains an eventhouse and a KQL database named Database1. Database1 has the following:

A table named Table1

A table named Table2

An update policy named Policy1

Policy1 sends data from Table1 to Table2.

The following is a sample of the data in Table2.

Recently, the following actions were performed on Table1:

An additional element named temperature was added to the StreamData column.

The data type of the Timestamp column was changed to date.

The data type of the DeviceId column was changed to string.

You plan to load additional records to Table2.

Which two records will load from Table1 to Table2? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A.
- B.
- C.
- C.

Answer: A,C

Explanation:

Changes to Table1 Structure:

StreamData column: An additional temperature element was added.

Timestamp column: Data type changed from datetime to date.

DeviceId column: Data type changed from guid to string.

Impact of Changes:

Only records that comply with Table2's structure will load.

Records that deviate from Table2's column data types or structure will be rejected.

Record B:

Timestamp: Matches Table2 (datetime format).

DeviceId: Matches Table2 (guid format).

StreamData: Contains only the index and eventid, which matches Table2.

Accepted because it fully matches Table2's structure and data types.

Record D:

Timestamp: Matches Table2 (datetime format).

DeviceId: Matches Table2 (guid format).

StreamData: Matches Table2's structure.

Accepted because it fully matches Table2's structure and data types.

NEW QUESTION # 62

.....

DP-700 exam training allows you to pass exams in the shortest possible time. If you do not have enough time, our DP-700 study material is really a good choice. In the process of your learning, our DP-700 study materials can also improve your efficiency. If you don't have enough time to learn, DP-700 Test Guide will make the best use of your spare time. The professional tailored by DP-700 learning question must be very suitable for you. You will have a deeper understanding of the process. Efficient use of all the time, believe me, you will realize your dreams.
