Es kann den Erfolg erleichtern, wenn Sie den kürzen Weg und die Geschicke benutzen. Wenn Sie die Garantie für einmaligen Erfolg zur CheckPoint 156-587 Zertifizierungsprüfung, ist CheckPoint 156-587 Dumps von ExamFragen Ihre einzig und beste Wahl. Die Dumps werden von Ihnen immer gut bewertet. Und es ist unmöglich für Sie, bessere Dumps zu finden. Sie können Ihnen die Prüfungsinhalten zeigen, damit Sie mit dem Ziel die Kenntnisse lernen. Außerdem können Sie alle Prüfungsfragen und -antworten im Gedächtnis halten, wenn Sie nicht genug Zeit für die Vorbereitung haben. Die Dumps beinhalten viele Prüfungsfragen in aktuellen Prüfungen. Damit können Sie die CheckPoint 156-587 Prüfung bestehen.

CheckPoint 156-587 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Advanced Client-to-Site VPN Troubleshooting: This section of the exam measures the skills of CheckPoint System Administrators and focuses on troubleshooting client-to-site VPN issues.
Thema 2	Introduction to Advanced Troubleshooting: This section of the exam measures the skills of Check Point Network Security Engineers and covers the foundational concepts of advanced troubleshooting techniques. It introduces candidates to various methodologies and approaches used to identify and resolve complex issues in network environments.
Thema 3	Advanced Troubleshooting with Logs and Events: This section of the exam measures the skills of Check Point Security Administrators and covers the analysis of logs and events for troubleshooting. Candidates will learn how to interpret log data to identify issues and security threats effectively.
Thema 4	Advanced Access Control Troubleshooting: This section of the exam measures the skills of Check Point System Administrators in demonstrating expertise in troubleshooting access control mechanisms. It involves understanding user permissions and resolving authentication issues.

Thema 5	• Advanced Identity Awareness Troubleshooting: This section of the exam measures the skills of Check Point Security Consultants and focuses on troubleshooting identity awareness systems.
Thema 6	• Advanced Site-to-Site VPN Troubleshooting: This section of the exam measures the skills of Check Point System Administrators and covers troubleshooting site-to-site VPN connections.
Thema 7	• Advanced Gateway Troubleshooting: This section of the exam measures the skills of Check Point Network Security Engineers and addresses troubleshooting techniques specific to gateways. It includes methods for diagnosing connectivity issues and optimizing gateway performance.

156-587 Quizfragen Und Antworten - 156-587 Prüfungs

Gegenüber der CheckPoint 156-587 Prüfung ist jeder Kandidat verwirrt. Jeder hat seine eigene Idee. Aber für alle ist diese Prüfung schwer. Die CheckPoint 156-587 Prüfung ist eine schwierige Zertifizierung. Ich glaube, alle wissen es. Mit ExamFragen ist alles einfacher geworden. Die Dumps zur CheckPoint 156-587 Prüfung von ExamFragen sind der Grundbedarfsgüter jedes Kandidaten. Sie können sicher die CheckPoint 156-587 Zertifizierungsprüfung bestehen. Wenn Sie nicht glauben, gucken Sie mal unsere Website. Sein Kauf-Rate ist die höchste. Sie sollen ExamFragen nicht verpassen, fügen Sie ExamFragen schnell in den Warenkorb hinzu.

CheckPoint Check Point Certified Troubleshooting Expert - R81.20 156-587 Prüfungsfragen mit Lösungen (Q89-Q94):

89. Frage

Check Point Access Control Daemons contains several daemons for Software Blades and features. Which Daemon is used for Application & Control URL Filtering?

- A. cprac
- B. pdpd
- C. pepd
- **D. rad**

Antwort: D

Begründung:

<https://support.checkpoint.com/results/sk/sk97638>

90. Frage

Which of these packet processing components stores Rule Base matching state-related information?

- A. Handlers
- B. Manager
- C. Classifiers
- **D. Observers**

Antwort: D

Begründung:

The Terraform Registry allows any user to publish and share modules. Published modules support versioning, automatically generate documentation, allow browsing version histories, show examples and READMEs, and more. Public modules are managed via Git and GitHub, and publishing a module takes only a few minutes.

Once a module is published, releasing a new version of a module is as simple as pushing a properly formed Git tag.

References = The information can be verified from the Terraform Registry documentation on Publishing Modules provided by HashiCorp Developer.

91. Frage

URL Filtering is an essential part of Web Security in the Gateway. For the Security Gateway to perform a URL lookup when a client makes a URL request, where is the sync-request forwarded from if a sync-request is required?

- A. RAD Kernel Space
- B. RAD User Space
- C. URLF Online Service
- D. URLF Kernel Client

Antwort: C

92. Frage

What Check Point process controls logging?

- A. FWD
- B. CPVVD
- C. CPD
- D. CPM

Antwort: C

Begründung:

The CPD process controls logging on the Security Management Server or the Log Server. It is responsible for receiving logs from the Security Gateways, storing them in the log files, and forwarding them to the SmartLog and SmartEvent servers. It also handles the communication with the SmartConsole clients and the CPM process. The CPD process runs on the Security Management Server or the Log Server as part of the Management High Availability module.

References:

* 1: Check Point Processes and Daemons - CPD

* 2: Troubleshooting Check Point logging issues when Security Management Server / Log Server is not receiving logs from Security Gateway

* Troubleshooting Expert R81.1 (CCTE) Course Outline) - Module 9: Logging and Status Troubleshooting.

93. Frage

Which of the following commands can be used to see the list of processes monitored by the Watch Dog process?

- A. fw ctl get str watchdog
- B. cpwd_admin list
- C. cpstat fw -f watchdog
- D. ps -ef| grep watchd

Antwort: B

Begründung:

To see the list of processes monitored by the WatchDog process (CPWD), you use the cpwd_admin list command.

Option A (cpstat fw -f watchdog): Shows firewall status and statistics for the "fw" context, not necessarily the list of monitored processes.

Option B (fw ctl get str watchdog): Not a valid parameter for retrieving the list of monitored processes; "fw ctl" deals with kernel parameters.

Option C (cpwd_admin list): Correct command that lists all processes monitored by CPWD, their status, and how many times they have been restarted.

Option D (ps -ef| grep watchd): This will list any running process that matches the string "watchd" but will not specifically detail which processes are being monitored by CPWD.

Therefore, the best answer is cpwd_admin list.

Check Point Troubleshooting Reference

sk97638: Explains Check Point WatchDog (CPWD) usage and the cpwd_admin utility.

R81.20 CLI Reference Guide: Describes common troubleshooting commands including cpwd_admin list.

Check Point Gaia Administration Guide: Provides instructions for monitoring system processes and verifying CPWD.
