ITIL4-DPI更新, 最新ITIL4-DPI考證

我們VCESoft培訓資料可以測試你在準備考試時的知識，也可以評估在約定的時間內你的表現。為你獲得的成績以及突出的薄弱環節給出指示，從而改善了薄弱環節，VCESoft ITIL的ITIL4-DPI考試培訓資料向你介紹不同的核心邏輯的主題，這樣你不僅學習還瞭解各種技術和科目，我們保證，我們的培訓資料是通過實踐檢驗了的，我們VCESoft為你的考試做足了充分的準備，我們的問題是全面的，但價格是合理的。

最新的 ITIL 4 Strategist ITIL4-DPI 免費考試真題 (Q37-Q42):

問題 #37

Which BEST describes a value stream?

- A. Steps that add value to a unit of work being processed in the service value chain
- B. A structured approach to organizational change, so that staff members feel valued
- C. The way an organization applies specific resources to tasks
- D. A flexible and simple guide that supports improvement initiatives

答案: A

解題說明:

DPI defines a value stream as "a series of steps an organization undertakes to create and deliver products and services to consumers." It describes how value is created and flows through the service value chain. Option A directly reflects this definition. Options B, C, and D refer to resources, guidance, or change management, not the definition of value streams. (Reference: ITIL 4 Strategist DPI, section on "Value stream mapping - definition and purpose")

問題 #38

A manager is planning which interfaces will be needed across the value stream when a new service is created. Which of these steps should be carried out FIRST?

- A. Identify and involve stakeholders in the service
- B. Identify utility and warranty requirements for the service
- C. Identify tools that will be used to develop and deploy the service
- D. Identify practices that will be used to create and manage the service

答案: A

解題說明:

According to DPI, the first step in value stream planning is to involve stakeholders. Stakeholders help identify requirements, expectations, and dependencies, ensuring the value stream design supports utility (fit for purpose) and warranty (fit for use). Tools and practices (A and B) come later, once needs are clarified. Utility and warranty requirements (C) are critical, but they must be established with stakeholder input, not in isolation. (Reference: ITIL 4 Strategist DPI, section on "Value stream mapping - stakeholder involvement in design")

問題 #39

A service provider has developed a strategy to increase its revenue by launching a new cloud storage service. This strategy is being cascaded down to the technical teams. Which is a relevant objective that will support the strategy?

- A. Increase profit by launching new wi-fi services into new geographic markets
- B. Achieve a 10% increase in service requests fulfilled in the target time
- C. Design and implement new infrastructure by the end of quarter 2
- D. Average number of storage access failures per month

答案: C

解題說明:

ITIL DPI emphasizes that objectives must cascade logically from strategy into actionable plans. Since the strategic goal is to launch a new cloud storage service, the technical objective must directly support that initiative. "Design and implement new infrastructure by the end of quarter 2" is aligned, measurable, and time-bound. The other options either do not directly relate to the cloud service (B, C) or are ongoing operational metrics (A), not strategic enablers. (Reference: ITIL 4 Strategist DPI, section on "Cascading objectives and alignment with strategy")

問題 #40

A small service provider is experiencing growth and success. Currently, all important decisions are made by a small executive group. This creates delays because some members of the group are often unavailable. Which is the BEST approach for establishing an authority structure for decision-making within the service provider organization?

- A. Keep high-risk decisions within the executive group, but define a policy for delegating other decisions

- B. Refer decisions to line managers, who will escalate cases to the executive group when appropriate
- C. Allow people to make decisions about their work, and use training and automation to mitigate the risks
- D. Ensure that technical decisions are made by the operational staff who can define the risks

答案： A

解題說明：

DPI emphasizes governance by defining clear decision-making authority. High-risk or strategic decisions should remain with executives, but less critical decisions must be delegated through policies to appropriate levels of management. This prevents bottlenecks and ensures accountability while balancing governance oversight. Options A and B may reduce delays but lack structured governance, while D risks insufficient control.

(Reference: ITIL 4 Strategist DPI, section on "Delegation of decision-making and governance structures")

問題 #41

An internet service provider has recently acquired a smaller competitor and has performed an analysis of internal and external factors affecting both companies. The competitor was acquired because of their popularity in the market due to excellent service levels. The management are about to integrate the staff and practices of the two organizations and would like to ensure that this is successful. Which assessment method is BEST for them to adopt?

- A. Change readiness
- B. SLA achievement
- C. Customer/user satisfaction
- D. Strengths, weaknesses, opportunities, threats (SWOT)

答案： D

解題說明：

DPI highlights SWOT analysis as a key assessment tool for mergers, acquisitions, or major integrations.

SWOT helps organizations understand internal capabilities (strengths/weaknesses) and external market factors (opportunities/threats).

This is critical when combining practices and cultures to ensure strengths are leveraged and weaknesses are mitigated. Customer satisfaction (B) and SLA analysis (D) are narrow operational measures. Change readiness (C) is useful but does not fully assess strategic alignment.

(Reference: ITIL 4 Strategist DPI, section on "Assessment methods - SWOT analysis in organizational change")

問題 #42

.....

很多IT人士都想通過ITIL ITIL4-DPI 認證考試，從而在IT行業中獲取更好的提升機會，使他們的工資生活水準都有所提升。但是好多人為了通過ITIL ITIL4-DPI 認證考試花了大量時間和精力來鞏固相關知識卻沒有通過考試。這樣是很不划算。如果你選擇VCESoft的產品，你可以為你節約很多時間和精力來鞏固知識，但是卻可以通過ITIL ITIL4-DPI 認證考試。因為VCESoft的關於ITIL ITIL4-DPI 認證考試的針對性的資料可以幫助你100%通過考試。如果你考試失敗，VCESoft會全額退款給你。
