

# AZ-104 Exam Discount, AZ-104 PDF Questions

Exact Questions

Microsoft - AZ-104

• Create a storage account named storage5 and configure storage replication for the Blob service.

• Create an NSG named NSG1 that will have the custom inbound security rules shown in the following table.

| Priority | Port | Protocol | Source      | Destination    | Action |
|----------|------|----------|-------------|----------------|--------|
| 500      | 3389 | TCP      | 10.0.2.0/24 | Any            | Deny   |
| 1000     | Any  | ICMP     | Any         | VirtualNetwork | Allow  |

• Associate NSG1 to the network interface of VM1.

• Create an NSG named NSG2 that will have the custom outbound security rules shown in the following table.

| Priority | Port | Protocol | Source      | Destination    | Action |
|----------|------|----------|-------------|----------------|--------|
| 200      | 3389 | TCP      | 10.0.0.0/16 | VirtualNetwork | Deny   |
| 400      | Any  | ICMP     | 10.0.2.0/24 | 10.0.1.0/24    | Allow  |

• Associate NSG2 to VNET1/Subnet2.

**Technical Requirements**

Contoso must meet the following technical requirements:

- Create container1 and share1.
- Use the principle of least privilege.
- Create an Azure AD security group named Group4.
- Back up the Azure file shares and virtual machines by using Azure Backup.
- Trigger an alert if VM1 or VM2 has less than 20 GB of free space on volume C.
- Enable User1 to create Azure policy definitions and User2 to assign Azure policies to RG1.
- Create an internal Basic Azure Load Balancer named LB1 and connect the load balancer to VNET1/Subnet1
- Enable flow logging for IP traffic from VM5 and retain the flow logs for a period of eight months.
- Whenever possible, grant Group4 Azure role-based access control (Azure RBAC) read-only permissions to the Azure file shares.

**QUESTION NO 1 HOTSPOT**

You need to create container1 and share1.

Which storage accounts should you use for each resource? To answer, select the appropriate options in the answer area.

each AZ-104 practice torrent in our online store before the listing, are subject to stringent quality checks within the company. Just focus on spending the most practice to use our AZ-104 test materials. After careful preparation, I believe you will be able to pass the exam. This is a wise choice, after using our AZ-104 Exam Question, you will realize your dream of a promotion. Therefore, when you are ready to review the exam, you can fully trust our AZ-104 practice torrent, choose our learning materials. If you don't want to miss out on such a good opportunity, buy it quickly!

## The Importance of Microsoft AZ-104 Certification Exam

Microsoft Certified Solutions Associate (MCSA): Microsoft Azure Solutions Architect Certification is an exam that measures your knowledge of Azure services and solutions. Units of measurement and country and regional settings for various Azure regions are also tested. Including this knowledge in your resume, cover letter, and other job application materials gives you an advantage over others. Harder to find candidates are more desirable candidates to employers. Smarter candidates learn faster and have a better chance of getting a job with big organizations. Upgrade your career with the Microsoft AZ-104 certification exam.

Paying for materials to take practice exams and improve your chances of achieving Microsoft AZ-104 certification is often an unnecessary expense. **Microsoft AZ-104 Exam Dumps** include questions and answers to help you learn everything you need to know. Test material is useful, but these free materials will give you the same level of knowledge. Endpoint Data Services, Azure Admin Center, Azure Portal, Blob Storage, Data Lake Store, Data Warehouse, Encryption Gateway, Elastic Load Balancer, Event Hubs and Event Hubs Queues are the technologies tested. Easy to use tools are available to help you create, read, edit, and update Azure resources. Feel confident about your Microsoft AZ-104 exam preparation. Node Manager, Key Vault, Log Analytics, Machine Learning Studio, Network Watcher Replication, OMS Workspace Portal and Operations Management Suite Workload are all included in this practice exam.

## Top AZ-104 Exam Discount | Professional AZ-104 PDF Questions: Microsoft Azure Administrator

The Microsoft wants to become the first choice for quick and complete Microsoft AZ-104 exam preparation. To achieve this objective the Microsoft has hired a team of experienced and qualified AZ-104 Exam trainers. They have years of experience in verifying Microsoft Azure Administrator exam practice test questions.

### Microsoft Azure Administrator Sample Questions (Q361-Q366):

#### NEW QUESTION # 361

You have an Azure Storage account named storage1 that uses Azure Blob storage and Azure File storage.

You need to use AzCopy to copy data to the blob storage and file storage in storage1.

Which authentication method should you use for each type of storage? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The screenshot shows two dropdown menus. The first is labeled 'Blob storage:' and the second is labeled 'File storage:'. Both menus have a list of five options: 'Azure Active Directory (Azure AD) only', 'Shared access signatures (SAS) only', 'Access keys and shared access signatures (SAS) only', 'Azure Active Directory (Azure AD) and shared access signatures (SAS) only', and 'Azure Active Directory (Azure AD), access keys, and shared access signatures (SAS)'. A watermark 'real4prep.com' is visible across the image.

#### Answer:

#### Explanation:

Blob storage:

The screenshot shows the 'Blob storage:' dropdown menu with the following options: 'Azure Active Directory (Azure AD) only', 'Shared access signatures (SAS) only', 'Access keys and shared access signatures (SAS) only', 'Azure Active Directory (Azure AD) and shared access signatures (SAS) only', and 'Azure Active Directory (Azure AD), access keys, and shared access signatures (SAS)'. The third and fourth options are highlighted with a red border.

File storage:

The screenshot shows the 'File storage:' dropdown menu with the following options: 'Azure Active Directory (Azure AD) only', 'Shared access signatures (SAS) only', 'Access keys and shared access signatures (SAS) only', 'Azure Active Directory (Azure AD) and shared access signatures (SAS) only', and 'Azure Active Directory (Azure AD), access keys, and shared access signatures (SAS)'. The second option is highlighted with a red border.

<https://docs.microsoft.com/en-us/azure/storage/common/storage-use-azcopy-v10>

#### NEW QUESTION # 362

You have an Azure subscription that contains the resources shown in the following table.

| Name   | Type                    | Resource group | Location |
|--------|-------------------------|----------------|----------|
| Vault1 | Recovery services vault | RG1            | East US  |
| VM1    | Virtual machine         | RG1            | East US  |
| VM2    | Virtual machine         | RG1            | West US  |

All virtual machines run Windows Server 2016.

On VM1, you back up a folder named Folder1 as shown in the following exhibit.

You plan to restore the backup to a different virtual machine.

You need to restore the backup to VM2.

What should you do first?

- A. From VM2, install the Microsoft Azure Recovery Services Agent.
- B. From VM2, install the Windows Server Backup feature.
- C. From VM1, install the Windows Server Backup feature.
- D. From VM1, install the Microsoft Azure Recovery Services Agent.

**Answer: A**

Explanation:

<https://docs.microsoft.com/en-us/azure/backup/backup-azure-restore-windows-server>

### NEW QUESTION # 363

You have an Azure subscription that contains an Azure Availability Set named WEBPROD-AS-USE2 as shown in the following exhibit.

```
PS Azure:\> az vm availability sets list --resource-group WEBPROD-AS-USE2 --location eastus2 --output json
[
  {
    "id": "/subscriptions/8372f433-2dcd-4361-b5ef-5b188fed87d0/resourceGroups/RG1/providers/Microsoft.Compute/availabilitySets/WEBPROD-AS-USE2",
    "location": "eastus2",
    "name": "WEBPROD-AS-USE2",
    "platformFaultDomainCount": 2,
    "platformUpdateDomainCount": 16,
    "proximityPlacementGroup": null,
    "resourceGroup": "RG1",
    "sku": {
      "capacity": null,
      "name": "Aligned",
      "tier": null
    },
    "statuses": null,
    "tags": {},
    "type": "Microsoft.Compute/availabilitySets",
    "virtualMachines": []
  }
]
Azure:/
```

You add 14 virtual machines to WEBPROD-AS-USE2.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

When Microsoft performs planned maintenance in East US 2, the maximum number of unavailable virtual machines will be [answer choice].

Dropdown menu with options: 2, 7, 10, 14

If the server rack in the Azure datacenter that hosts WEBPROD-AS-USE2 experiences a power failure, the maximum number of unavailable virtual machines will be [answer choice].

Dropdown menu with options: 2, 7, 10, 14

Answer:

Explanation:

Microsoft

When Microsoft performs planned maintenance in East US 2, the maximum number of unavailable virtual machines will be [answer choice].

If the server rack in the Azure datacenter that hosts WEBPROD-AS-USE2 experiences a power failure, the maximum number of unavailable virtual machines will be [answer choice].

**NEW QUESTION # 364**

You have an Azure subscription that contains three virtual networks named VNET1, VNET2, and VNET3. Peering for VNET1 is configured as shown in the following exhibit.

VNET1 | Peerings

Virtual network

Search (Ctrl+/) Add Refresh

Search peerings

| NAME     | PEERING STATUS | PEER  | GATEWAY TRANSIT |
|----------|----------------|-------|-----------------|
| Peering1 | Connected      | VNET2 | Disabled ...    |
| Peering2 | Connected      | VNET3 | Disabled ...    |

Peering for VNET2 is configured as shown in the following exhibit.

VNET2 | Peerings

Virtual network

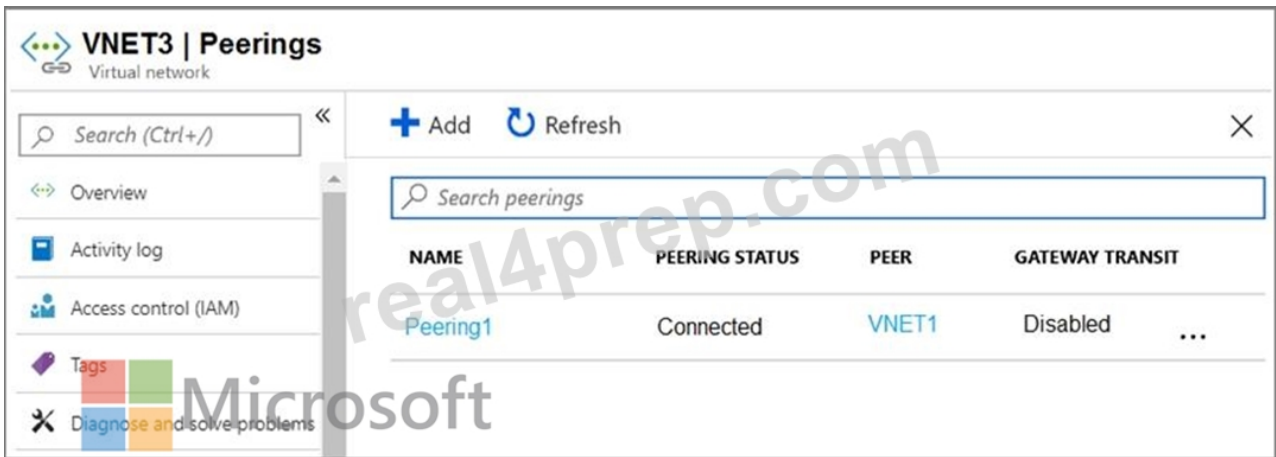

Search (Ctrl+/) Add Refresh

Search peerings

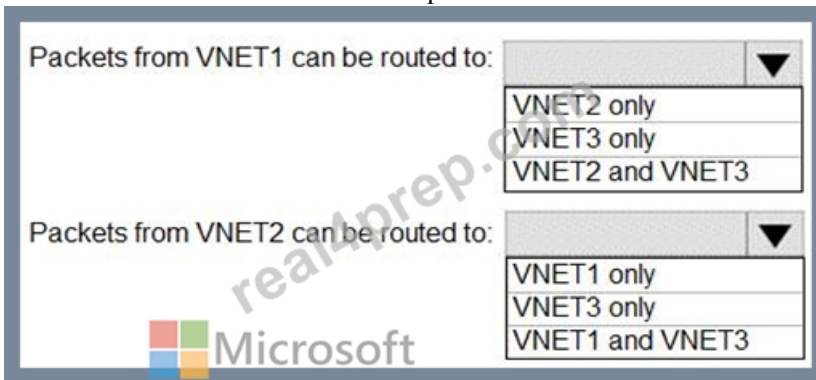

| NAME     | PEERING STATUS | PEER  | GATEWAY TRANSIT |
|----------|----------------|-------|-----------------|
| Peering1 | Connected      | VNET1 | Disabled ...    |

Microsoft

Peering for VNET3 is configured as shown in the following exhibit.

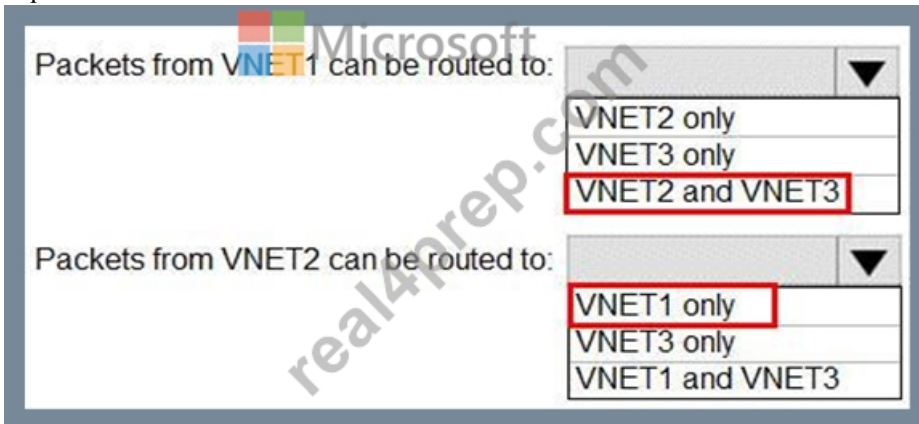

How can packets be routed between the virtual networks? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-network/virtual-network-peering-overview>

**NEW QUESTION # 365**

You plan to create an Azure Storage account in the Azure region of East US 2.

You need to create a storage account that meets the following requirements:

Replicates synchronously

Remains available if a single data center in the region fails

How should you configure the storage account? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

## Answer Area

Replication:

|  |
|--|
| Geo-redundant storage (GRS)                |
| Locally-redundant storage (LRS)            |
| Read-access geo-redundant storage (RA GRS) |
| Zone-redundant storage (ZRS)               |

Account kind:

|                                |
|--------------------------------|
| Blob storage                   |
| Storage (general purpose v1)   |
| StorageV2 (general purpose v2) |

**Answer:**

Explanation:

The screenshot shows the 'Answer Area' with two dropdown menus. The 'Replication' dropdown has 'Zone-redundant storage (ZRS)' selected and highlighted with a red box. The 'Account kind' dropdown has 'StorageV2 (general purpose v2)' selected and highlighted with a red box. The Microsoft logo is visible in the top right corner of the answer area.

Explanation:

Box 1: Zone-redundant storage (ZRS)

Zone-redundant storage (ZRS) replicates your data synchronously across three storage clusters in a single region.

LRS would not remain available if a data center in the region fails

GRS and RA GRS use asynchronous replication.

Box 2: StorageV2 (general purpose V2)

ZRS only support GPv2.
