SAP C-S4CPR-2502 Exam Syllabus Topics:

Topic	Details

Topic 1	• Data Migration and Business Process Testing: This section of the exam measures skills of a SAP Data Migration Analyst and covers the tools and processes used to migrate legacy data into SAP S • 4HANA Cloud. It includes preparation, validation, execution of data loads, and conducting business process testing to ensure data accuracy and system readiness.
Topic 2	• System Landscapes and Identity Access Management: This section of the exam measures skills of a SAP System Administrator and covers basic understanding of the SAP S • 4HANA Cloud system architecture, including identity and access management concepts. It focuses on setting up user roles, managing authorizations, and maintaining secure system access within the SAP landscape.
Topic 3	• Introduction to Cloud Computing and SAP Cloud ERP Deployment Options: This section of the exam measures skills of a Cloud ERP Consultant and covers foundational knowledge of cloud computing and SAP S • 4HANA Cloud deployment options. It provides insights into multi-tenant vs single-tenant models and helps determine the best fit for customer requirements.
Topic 4	• Extensibility and Integration: This section of the exam measures skills of a SAP Integration Consultant and covers the basic principles of system extensibility and integration in SAP S • 4HANA Cloud. It touches upon in-app and side-by-side extensions as well as integrating with external systems through APIs and standard tools.
Topic 5	• Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of a SAP Implementation Specialist and covers how to configure and personalize the SAP Fiori Launchpad. It includes understanding app management, tile groups, catalogs, and business roles to ensure a user-friendly and efficient experience for end users.
Topic 6	• Implementation and Configuration for Sourcing and Procurement: This section of the exam measures skills of a SAP Sourcing and Procurement Consultant and covers the core configuration tasks required to set up sourcing and procurement processes in SAP S • 4HANA Cloud. It includes implementing purchase requisitions, purchase orders, approvals, sourcing, and invoice management while ensuring alignment with organizational procurement needs.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q16-Q21):

NEW QUESTION # 16
You need to create purchasing groups in your SAP S/4HANA Cloud Public Edition system that are relevant to your company. Which of the following assignments for purchasing groups is required?

- A. You must assign the purchasing group to the company code
- B. You must assign the purchasing group to the plant
- C. Purchasing group is not assigned to any organizational unit in the company structure
- D. You must assign the purchasing group to the responsible purchasing organization

Answer: D

Explanation:
InSAP S/4HANA Cloud Public Edition,purchasing groupsare organizational units that represent individuals or teams responsible for procurement activities. To ensure proper integration into the procurement process, purchasing groups must be assigned to theresponsible purchasing organization.
* You must assign the purchasing group to the responsible purchasing organization (Option D):
Purchasing groups are linked to purchasing organizations to define which group is responsible for procurement within a specific purchasing organization. This assignment ensures that procurement processes are properly managed and executed. TheSAP Organizational Structure Guideconfirms this requirement.
* A. Purchasing group is not assigned to any organizational unit in the company structure:
Purchasing groups must be assigned to a purchasing organization to function effectively. Leaving them unassigned would disrupt procurement processes.

* B. You must assign the purchasing group to the plant:Plants are part of the logistics structure and are not directly linked to purchasing groups.
* C. You must assign the purchasing group to the company code:Company codes are financial organizational units and do not have a direct relationship with purchasing groups.
* SAP Organizational Structure Guide:Explains the relationship between purchasing groups and purchasing organizations in SAP S/4HANA Cloud Public Edition.https://help.sap.com
* SAP S/4HANA Cloud Procurement Guide:Provides details on configuring purchasing groups and their assignments.
Why Option D is Correct:Why the Other Options Are Incorrect:Key References:

NEW QUESTION # 17
Which of the following specifications are valid for review activities in Purchase Requisition Approval Workflow? Note: There are 2 correct answers to this question.

- A. Only one reviewer per workflow can be assigned
- B. Deadlines can be configured for reviewer tasks
- C. Assigned reviewer can reject or approve the workflow
- D. Reviewer receives notifications on the reviewer tasks

Answer: B,D

NEW QUESTION # 18
What activities are applied to the entire system and cannot be changed after confirmation in SAP Central Business Configuration? Note: There are 2 correct answers to this question.

- A. Fiscal year variant
- B. Group currency
- C. Scoping
- D. Configuration activities

Answer: B,C

NEW QUESTION # 19
Which of the following systems are used to implement SAP S/4HANA Cloud Public Edition for a customer? Note: There are 3 correct answers to this question.

- A. Sandbox system
- B. Trial system
- C. Development system
- D. Starter system
- E. Test system

Answer: C,D,E

Explanation:
In the implementation of SAP S/4HANA Cloud Public Edition, specific systems are utilized to ensure a structured and successful deployment process. These systems are part of the SAP lifecycle management approach and serve distinct purposes during the implementation. Below is an explanation of the correct answers:
* Test System (A):The test system is used for quality assurance and user acceptance testing (UAT). It allows customers to validate configurations, customizations, and integrations in an environment that mirrors the production system. Testing ensures that all business processes function as expected before going live.
* **Development System (C):The development system is where configuration, customization, and extension activities are performed. This system is used by developers and key users to build and adapt the solution to meet the customer's specific business requirements. It serves as the foundation for implementing new functionalities and integrating with other systems.
* Starter System (D):The starter system is a preconfigured system provided by SAP during the initial phases of implementation. It contains standard business processes and best practices tailored to the customer's industry. The starter system helps accelerate the implementation process by providing a baseline configuration that can be further customized.
* Trial System (B):A trial system is typically used for demonstration or evaluation purposes, allowing potential customers to explore

the capabilities of SAP S/4HANA Cloud Public Edition. However, it is not part of the formal implementation process for a customer.

* Sandbox System (E):A sandbox system is an optional environment provided for experimentation and learning purposes. It allows users to explore the system without impacting the actual implementation.

While useful for training and testing ideas, it is not a mandatory system in the implementation lifecycle.

NEW QUESTION # 20

What tools enable non-developers to create low/no-code extensions? Note: There are 2 correct answers to this question.

- A. SAP Business Application Studio
- B. SAP Fiori extensibility apps
- C. SAP Cloud SDK
- D. SAP Build

Answer: B,D

Explanation:
SAP provides low-code/no-code tools to enable non-developers to create extensions without requiring extensive programming knowledge. Below is an explanation of the correct answers:

* SAP Build (B):SAP Build is a suite of tools designed for citizen developers, allowing them to create applications, automate processes, and design user interfaces using drag-and-drop functionality.

* SAP Fiori extensibility apps (D):SAP Fiori extensibility apps, such as theCustom Fields and Logic app, allow non-developers to extend standard SAP Fiori apps by adding custom fields, logic, or UI elements without coding.

* SAP Business Application Studio (A):SAP Business Application Studio is a development environment for professional developers and requires coding skills, making it unsuitable for non- developers.

* SAP Cloud SDK (C):SAP Cloud SDK is a software development kit for building custom extensions and integrations, which requires programming expertise.
