

# Valid CCAAK Exam Pass4sure - Confluent Latest CCAAK Examprep: Confluent Certified Administrator for Apache Kafka Finally Passed

BTW, DOWNLOAD part of ITCertMagic CCAAK dumps from Cloud Storage: [https://drive.google.com/open?id=1\\_\\_Mjq4QJEujjk-StH-91NWz4UG4r9Hax](https://drive.google.com/open?id=1__Mjq4QJEujjk-StH-91NWz4UG4r9Hax)

In the process of using the CCAAK study training materials, once users have any questions about our study materials, the user can directly by E-mail us, our products have a dedicated customer service staff to answer for the user, they are 24 hours service for you, we are very welcome to contact us by E-mail and put forward valuable opinion for us. Our CCAAK Latest Questions already have three different kinds of learning materials, what is the most suitable CCAAK test guide for you? You can just follow the instructions for CCAAK study guide on the web or ask our services about it.

It is important to mention here that the Confluent Certified Administrator for Apache Kafka practice questions played important role in their Confluent CCAAK Exams preparation and their success. So we can say that with the Confluent CCAAK Exam Questions you will get everything that you need to learn, prepare and pass the difficult Confluent CCAAK exam with good scores.

## Latest CCAAK Examprep, CCAAK Dump Collection

The ITCertMagic is committed to acing the Confluent Certified Administrator for Apache Kafka (CCAANK) exam questions preparation quickly, simply, and smartly. To achieve this objective ITCertMagic is offering valid, updated, and real Confluent Certified Administrator for Apache Kafka (CCAANK) exam dumps in three high-in-demand formats. These Confluent Certified Administrator for Apache Kafka (CCAANK) exam questions formats are PDF dumps files, desktop practice test software, and web-based practice test software.

## Confluent Certified Administrator for Apache Kafka Sample Questions (Q46-Q51):

NEW QUESTION # 46

You are managing a Kafka cluster with five brokers (broker id '0', '1','2','3','4') and three ZooKeepers. There are 100 topics, five partitions for each topic, and replication factor three on the cluster. Broker id '0' is currently the Controller, and this broker suddenly fails.

Which statements are correct? (Choose three.)

- A. The Controller is responsible for reassigning partitions to the consumers in a Consumer Group.
- B. The number of Controllers should always be equal to the number of brokers alive in the cluster.
- C. The broker id is used as the epoch number to prevent a split brain scenario.
- **D. The Controller uses the epoch number to prevent a split brain scenario.**
- **E. Kafka uses ZooKeeper's ephemeral node feature to elect a controller.**
- **F. The Controller is responsible for electing Leaders among the partitions and replicas.**

**Answer: D,E,F**

Explanation:

Kafka relies on ZooKeeper's ephemeral nodes to detect if a broker (controller) goes down and to elect a new controller.

The controller manages partition leadership assignments and handles leader election when a broker fails.

The epoch number ensures coordination and avoids outdated controllers acting on stale data.

#### NEW QUESTION # 47

You have a cluster with a topic t1 that already has uncompressed messages. A new Producer starts sending messages to t1 with compression enabled.

Which condition would allow this?

- A. Never, because topic t1 already has uncompressed messages.
- B. Only if the new Producer disables batching.
- **C. If the new Producer is configured to use compression.**
- D. Only if Kafka is also enabled for encryption.

**Answer: C**

Explanation:

Kafka allows mixed compression formats within the same topic and even the same partition. Each message batch includes metadata indicating whether and how it is compressed. Therefore, a new producer can send compressed messages to a topic that already contains uncompressed messages, as long as it is configured with a compression codec (e.g., `compression.type=gzip`, `snappy`, etc.).

#### NEW QUESTION # 48

When a broker goes down, what will the Controller do?

- A. Become the leader for the topic/partition that needs a leader, pending the broker return in the cluster.
- **B. Trigger a leader election among the remaining followers to distribute leadership.**
- C. Automatically elect the least loaded broker to become the leader for every orphan's partitions.
- D. Wait for a follower to take the lead.

**Answer: B**

Explanation:

When a broker goes down, the Controller detects the failure and triggers a leader election for all partitions that had their leader on the failed broker. The leader is chosen from the in-sync replicas (ISRs) of each partition.

#### NEW QUESTION # 49

Per customer business requirements, a system's high availability is more important than message reliability.

Which of the following should be set?

- A. `Message.retention.ms` should be set to -1.
- B. The number of brokers in the cluster should be always odd (3, 5, 7 and so on).
- C. `The linger.ms` should be set to '0'.
- **D. Unclean leader election should be enabled.**

**Answer: D**

Explanation:

Enabling unclean leader election allows Kafka to elect a non-in-sync replica as leader if all in-sync replicas are unavailable. This sacrifices message reliability (possible data loss) in favor of high availability, aligning with the requirement.

#### NEW QUESTION # 50

In certain scenarios, it is necessary to weigh the trade-off between latency and throughput. One method to increase throughput is to configure batching of messages.

In addition to batch.size, what other producer property can be used to accomplish this?

- A. compression
- **B. linger.ms**
- C. sendbufferbytes
- D. delivery.timeout.ms

**Answer: B**

Explanation:

The linger.ms property sets the maximum time the producer will wait before sending a batch, even if the batch isn't full. By increasing linger.ms, you allow more records to accumulate in the batch.

#### NEW QUESTION # 51

.....

Whether you are good at learning or not, passing the exam can be a very simple and enjoyable matter together with our CCAAK practice engine. As a professional multinational company, we fully take into account the needs of each user when developing our CCAAK Exam Braindumps. For example, in order to make every customer can purchase at ease, our CCAAK preparation quiz will provide users with three different versions for free trial, corresponding to the three official versions.
