

HPE7-A11 Vce Free - HPE7-A11 Practice Test Pdf

As job seekers looking for the turning point of their lives, it is widely known that the workers of recruitment is like choosing apples--viewing resumes is liking picking up apples, employers can decide whether candidates are qualified by the HPE7-A11 appearances, or in other words, candidates' educational background and relating HPE7-A11 professional skills. Knowledge about a person and is indispensable in recruitment. That is to say, for those who are without good educational background, only by paying efforts to get an acknowledged HPE7-A11 Certification, can they become popular employees. So for you, the HPE7-A11 latest brandumps complied by our company can offer you the best help.

Normally, you will come across almost all of the HPE7-A11 real questions on your usual practice. Maybe you are doubtful about our HPE7-A11 guide dumps. We have statistics to tell you the truth. The passing rate of our products is the highest. Many candidates can also certify for our HPE7-A11 Study Materials. As long as you are willing to trust our HPE7-A11 preparation materials, you are bound to get the HPE7-A11 certificate. Life needs new challenge. Try to do some meaningful things.

>> HPE7-A11 Vce Free <<

Efficient HPE7-A11 Vce Free | Easy To Study and Pass Exam at first attempt & Professional HPE7-A11: HPE Network Campus Access Professional Architect Exam

Quality should be tested by time and quantity, which is also the guarantee that we give you to provide HPE7-A11 exam software for you. Continuous update of the exam questions, and professional analysis from our professional team have become the key for most candidates to Pass HPE7-A11 Exam. The promise of "no help, full refund" is the motivation of our team. We will continue improving HPE7-A11 exam study materials. We will guarantee that you you can share the latest HPE7-A11 exam study materials free during one year after your payment.

HPE Network Campus Access Professional Architect Exam Sample Questions (Q94-Q99):

NEW QUESTION # 94

Drag and Drop Question

Match the deployment type to the estimated number of APs.

| | Answer Area | |
|---|-------------|--|
| Capacity based design with low to mid density | | 100,000 ft ² / 9000 m ² building 100,000/10,000 = 10 APs |
| Coverage based design | | 100,000 ft ² / 9000 m ² building 100,000/5000 = 20 APs |
| High-capacity design | | 100,000 ft ² / 9000 m ² building 100,000/2500 = 40 APs |
| Very low-density, low coverage | | 100,000 ft ² / 9000 m ² building 100,000/1500 = 67 APs |

Answer:

Explanation:

NEW QUESTION # 95

XYZ Regional Hospital is an integrated healthcare system of hospitals, neighborhood health centers, and small doctor offices. XYZ Regional Hospital has recently merged with 4x neighborhood health centers and 125 doctor branch offices. The wireless, wired access, and AAA solutions are outdated and need to be replaced.

XYZ Regional Hospital is looking to future-proof and improve efficiency across all sites by enhancing wired and wireless access and migrating to a centralized and unified wired/wireless and policy management that can provide uninterrupted availability of all systems.

Locations:

- XYZ Regional Hospital is located in New York City
- Dila Health Center is located in City A
- Mount Health Center is located in City B
- Rock Health Center is located in City C

- Branch clinics are located at different locations across the United States Requirements:

- Provide, via management software, one single pane of glass to manage wired and wireless LANs, and VPNs across campus, branch, and remote via web/cloud architecture providing near real-time insight, troubleshooting tools, and Service Level performance reporting.

- Seamless integration across wired, wireless, WAN, SD-Branch, IoT

- Provide secure wireless access to all the employees of the Regional Hospital and partners, as well as provide wireless Internet access to medical citizens when they visit our facilities.

- All-access points must support the following features and specifications: 802.11.ax (Wi-Fi 6E Certified)

- Security options including WP2/WPA3, 802.1X with Radius secure authentication

- Identify and authenticate every wireless and wired device

- End-to-end role-based security

- Seamless mobility across the hospital for medical teams, patients, and visitors

- Cuts Wi-Fi deployment times from days to hours and enables Zero-Touch deployments across the site

- Establishes a resilient, future-ready network infrastructure with the intelligence, scalability, and intuitive toolsets to meet emerging needs

- Fully redundant branch solution with dynamic path selection to the hospital The hospital CIO is interested in reviewing the phase 1 approach and framework that will be used to achieve the goals of the network refresh project.

What is the phase 1 task?

- A. Meet with ITS Network/Telecom and support staff following the knowledge transfer sessions to educate the ITS team on campus, data center, and network security options
- B. Kickoff the project to identify the team members involved, review the deliverables, expectations, timeframes, and begin the discovery/data collection.

- C. The team will define and document a path for the current to future support model, including any staffing, skills, and professional development that is recommended.
- D. Review the potential design options and further scope deployment efforts, phased implementation approaches, enablement options, and operational expertise requirements.

Answer: B

Explanation:

Phase 1 of a network refresh project begins with the project kickoff, which includes defining team participation, reviewing objectives, deliverables, and timelines, and starting the discovery and data collection needed to drive the design process.

NEW QUESTION # 96

XYZ Regional Hospital is an integrated healthcare system of Hospitals, neighborhood health centers, and small doctor offices. XYZ Regional Hospital has recently merged with 4x neighborhood health centers and 125 doctor branch offices. The wireless, wired access, and AAA solutions are outdated and need to be replaced.

XYZ Regional Hospital is looking to future-proof and improve efficiency across all sites by enhancing wired and wireless access and migrating to a centralized and unified wired/wireless and policy management that can provide uninterrupted availability of all systems.

Locations:

- XYZ Regional Hospital Is located In New York City
- Dila Health Center Is located in City A
- Mount Health Center is located In City B
- Rock Health Center is located in City C
- Branch clinics are located at different locations across the United States

Requirements:

- Provide, via management software, one single pane of glass to manage wired and wireless LANs, and VPNs across campus, branch, and remote via web/cloud architecture providing near real-time insight, troubleshooting tools, and service Level performance reporting.
- Seamless integration across wired, wireless. WAN, S0-8ranch. IoT
- Provide secure wireless access to all the employees of (he Regional Hospital and partners, as well as provide wireless Internet access to medical citizens when they visit our facilities.
- All-access points must support the following features and specifications: 802.11 ax (WI-FI 6E Certified)
- Security options Including WPZ/WPA3. 802.1X with Radius secure authentication
- Identify and authenticate every wireless and wired device
- End-to-end role-based security
- Seamless mobility across the hospital tor medical teams, patients, and visitors
- Cuts Wi-Fi deployment times from days to hours and enables Zero-Touch deployments across the site
- Establishes a resilient, future-ready network infrastructure with the intelligence, scalability, and intuitive toolsets to meet emerging needs
- Fully redundant branch solution with dynamic path selection to the hospital

XYZ Regional Hospital is looking tor an NAC solution to address its security challenges

Requirements:

- fully redundant NAC solution for management and authentication
- wireless and wired authentication for the main hospital will be handled locally
- wireless and wired authentication for the health centers will be handled locally
- wireless and wired authentication tor the clinics will be authenticated against the main hospital NAC
- staff ustrs/devices should able to visit any site and haw the same experience
- support 35k devices

Locations:

- XYZ Regional Hospital is located in City 1 - 15k devices

- Dila Health center is located in City 2 - 8k devices
- Mount Health Center is located in City 3 - 5k devices
- Rock Health Center is located in City 4 - 4k devices
- 125 branch clinics are located at different locations across the US - 2k devices

Which solution meets the customer's requirements?

- A. 1x 3010 as a Publisher for the main DC
1x 3010 as a Standby Publisher for the DR
2x 3010 as Subscribers for the Main Hospital
2x C2020 as Subscribers for the Dila Health Center
2x C2020 as Subscribers for the Mount Health Center
2x C2020 as Subscribers for the Rock Health Center
25k + 10k Access licenses
- B. 1x C3010 as a Publisher for the main DC
1x C3010 as a Standby Publisher for the DR
2x C3010 as Subscribers for the Main Hospital
2x C1000 as Subscribers for the Dila Health Center
2x VMs as Subscribers for the Mount Health Center
2x VMs as Subscribers for the Rock Health Center
35k Access licenses
- C. 1x 3010 as a Publisher for the main DC
1x C2020 as a Standby Publisher for the DR
2x C2020 as Subscribers for the Main Hospital
2x C1000 as Subscribers for the Dila Health Center
2x C1000 as Subscribers for the Mount Health Center
2x VMs as Subscribers for the Rock Health Center
15k + 10k Access licenses
- D. 1x 3010 as a Publisher for the main DC
1x 3010 as a Standby Publisher for the DR
2x 3010 as Subscribers for the Main Hospital
2x C1000 as Subscribers for the Dila Health Center
2x VMs as Subscribers for the Mount Health Center
2x C2020 as Subscribers for the Rock Health Center
15k + 10k Access licenses

Answer: A

NEW QUESTION # 97

A global cruise line company needs to refresh its current fleet. They will refresh the insides of the ship to be cost-effective and increase their sustainability. They will replace the complete WLAN/LAN hardware of the ship. In this refresh, the company will not refresh its current security requirements. The CIO also wants to limit the number of unused ports in the switches. Future expansion will always mean a refresh of hardware. They start with the smallest ship with a maximum of 800 guests. Each ship has a LAN infrastructure consisting of two core switches, up to 10 redundant distribution switches, and up to 500 access switches (400 cabins, 100 technical rooms). The Core switches are located in the MDF of the ship and the distribution switches are located in the IDF's of the ship. Each cabin and technical room gets one single access switch.

The cabling structure of the ship will not be refreshed. Each IDF is connected to the MDF by SMF, of which two pairs are available for the interconnect between the core and distribution. The length of SM fiber between MDF and IDF is less than 300 meters (930 ft) and the type used is OS1. Each cabin is connected by a single OM2 pair to the IDF, the maximum length is 60 meters (200 ft).

Each technical room is connected by a single OM2 pair to the IDF, with lengths between 100 and 150 meters (320 and 500 ft).

For each cabin/technical room the customer is looking to replace their current fan-less 2530/2540 without changing the requirements, except they need to upgrade the uplink to distribution switch to 10GbE to handle the increased network traffic, and the technical rooms need redundant power.

The WLAN infrastructure will be 1:1 refreshed without new cabling or new AP locations. Their WLAN Infrastructure is based on the 200/300 series Indoor and outdoor APs running InstantOS (less than 300 APs), the customer has no change in WLAN requirements.

The cruise line company will replace its current Internet connection before the LAN/WLAN refresh. The new Internet connection will provide a 99.8% uptime, which is needed to ensure the paid guest Wi-Fi is always operational. With this new internet

connection, the CIO of the cruise line wants to base the design on the ESP architecture from Aruba because Internet connection is guaranteed.

The week after the presentation of your design to the CIO of the cruise line company, the CIO calls you to discuss increasing the security on the wired network infrastructure. Since one of their competitors had one of their cruise ships cyber hacked, the CSO of the cruise line has mandated increased security on the wired network. They have heard about dynamic segmentation and central and decentral overlay networks. For their POS systems, they need a low-latency network connection between the POS system and the POS server in the data center on the ship. Also, the CSO wants to enhance the WLAN security as well by tunneling all user traffic. What solution fits the customer's requirements?

- A. Standardize on Aruba 6300 switches for the edge. 8320 for the RR. 8320 for the stub/border. 9240 for the WLAN Gateway, and utilize Aruba Central NetConductor
- B. Standardize on Aruba 6300 switches for the edge. 8325 for the RR. 8360 for the stub/border. 9240 for the WLAN Gateway, and utilize Aruba Central NetConductor.
- C. Standardize on Aruba 6200 switches for the edge. 8325 for the RR. 8360 for the stub/border, and utilize Aruba Central NetConductor
- D. Standardize on Aruba 6300 switches for the edge. 8320 for the RR. 8360 for the stub/border, and utilize Aruba Central NetConductor
- E. Standardize on Aruba 6300 switches for the edge. 8320 for the RR. 8360 for the stub/border. 9240 for the WLAN Gateway, and utilize Aruba Central NetConductor.

Answer: E

Explanation:

Considering the global cruise line company's requirement to enhance wired network security while ensuring low-latency connections for POS systems and tunneling all user traffic for WLAN security, the most fitting solution involves a combination of Aruba switches and gateway along with a network management and orchestration tool. Specifically, standardizing on Aruba 6300 switches for the edge layer caters to the need for high-performance, fan-less switches with 10GbE uplinks, matching the requirement for upgraded cabin and technical room connections.

The Aruba 8320 as a Route Reflector (RR) and Aruba 8360 for the stub/border provide a robust core and distribution layer with high throughput and redundancy. The inclusion of a 9240 WLAN Gateway addresses the need for secure WLAN user traffic tunneling. Utilizing Aruba Central NetConductor enhances network management efficiency, security policy enforcement, and dynamic segmentation across the wired and wireless infrastructure, aligning with the ESP architecture from Aruba and meeting the company's security enhancement objectives.

NEW QUESTION # 98

You are responding to the customer's RFP and are at the point of documenting design decisions that were not specified in the RFP or the RFP questions. What are valid examples of assumptions made that should be presented to the customer during the response? (Select three)

- A. Sufficient space and power exist to rack and turn up the proposed equipment.
- B. The customer has technical staff that is capable of implementing the proposed equipment.
- C. Adequate virtual machine resources exist to successfully install required or optional management systems.
- D. The customer budget is sufficient to afford the proposed solution.
- E. Vendor equipment availability will meet customer project timelines.
- F. Optional monitoring systems (syslog, How collectors) exist.

Answer: A,B,C

Explanation:

In the context of responding to an RFP (Request for Proposal), it is common to make certain assumptions about the project environment when specific details are not provided. Answer A is valid because assuming the customer has technically capable staff is essential for the successful implementation of the proposed equipment; if this is not the case, additional training or services may be needed. Answer D is a reasonable assumption as well, given that physical space and power are fundamental requirements for installing new hardware; however, this should be clarified to avoid potential issues during deployment. Answer E is also a valid assumption, especially in modern network environments where management and orchestration systems often reside on virtual machines; assuming there are adequate resources for these systems is critical for the overall solution but should be verified with the customer. These assumptions are important to present to the customer to ensure there are no misunderstandings or gaps in the project planning phase, as highlighted in Aruba Campus Access documentation.

NEW QUESTION # 99

.....

Our company is a multinational company with sales and after-sale service of HPE7-A11 exam torrent compiling departments throughout the world. In addition, our company has become the top-notch one in the fields, therefore, if you are preparing for the exam in order to get the related certification, then the HPE Network Campus Access Professional Architect Exam exam question compiled by our company is your solid choice. All employees worldwide in our company operate under a common mission: to be the best global supplier of electronic HPE7-A11 Exam Torrent for our customers through product innovation and enhancement of customers' satisfaction. Wherever you are in the world we will provide you with the most useful and effectively HPE7-A11 guide torrent in this website, which will help you to pass the exam as well as getting the related certification with a great ease.

HPE7-A11 Practice Test Pdf: https://www.itcertkey.com/HPE7-A11_braindumps.html

Our HPE7-A11 reliable braindumps are singing the praises of the best exam preparation materials as high quality and high pass rate, HP HPE7-A11 Vce Free We provide free update and the old client can enjoy the discount, Take a look at our Free HP HPE7-A11 Exam Questions and Answers to check how perfect they are for your exam preparation, Just image what kind of advantage will gain for you after passing exams and getting many certifications after using our HPE7-A11 Practice Test Pdf - HPE Network Campus Access Professional Architect Exam test training vce.

If your system is a generic system that is, it came with a mainboard Valid Dumps HPE7-A11 Questions or motherboard manual and other component manuals rather than a full system manual) you need to contact the motherboard maker.

Pass Guaranteed Quiz 2026 HPE7-A11: HPE Network Campus Access Professional Architect Exam Pass-Sure Vce Free

Peterson Peterson is another prominent company, HPE7-A11 who produces and supply standard education certification products including practice tests globally, Our HPE7-A11 reliable braindumps are singing the praises of the best exam preparation materials as high quality and high pass rate.

We provide free update and the old client can enjoy the discount, Take a look at our Free HP HPE7-A11 Exam Questions and Answers to check how perfect they are for your exam preparation.

Just image what kind of advantage will gain for Reasonable HPE7-A11 Exam Price you after passing exams and getting many certifications after using our HPE Network Campus Access Professional Architect Exam test training vce, Our aim is help every candidate pass exam, so it is our longtime duty to do better about our HPE7-A11 Dumps VCE: HPE Network Campus Access Professional Architect Exam
