Downloadable C-ACDET-2506 PDF, C-ACDET-2506 Test Passing Score

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C-ACDET-2506) questions is a comprehensive solution for C-ACDET-2506 exam preparation, offering a wide range of features designed to help you succeed. The SAP exam is an essential milestone to achieve the C-ACDET-2506 Certification. With C-ACDET-2506 exam dumps, you'll have access to SAP C-ACDET-2506 actual questions that are enough to crack the C-ACDET-2506 exam in a short time.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite

Sample Questions (Q45-Q50):

NEW QUESTION # 45
You are performing a Brownfield migration for a customer with live transactions in their SAP Ariba Production environment. The customer plans to introduce new required fields for contract workspaces that are associated with flex master data templates and enumeration lists. Based on the correct Brownfield process, what is the correct sequence of activities to avoid system errors or user disruption?

- A. Migrate flex master data templates and data # Load enumerations # Load translations # Deploy field change package in Production
- B. Deploy field change package in Production # Load translations # Load enumerations # Migrate flex master data templates and data
- C. Load enumerations # Load translations # Deploy field change package in Production # Migrate flex master data templates and data
- D. Deploy field change package in Production # Migrate flex master data templates and data # Load enumerations # Load translations

Answer: A

Explanation:
For Brownfield deployments with live transactions, the correct sequence is to first migrate Flex Master Data templates and data, then load enumerations, followed by loading translations, and finally deploy the field change package. This sequence ensures that all master data dependencies are in place before deploying configurations that rely on them, preventing system errors and broken references. Deploying field changes before data and enumerations are ready can cause failures and disrupt user operations. SAP Ariba's documented migration best practices emphasize this order for successful Brownfield projects.

NEW QUESTION # 46
How can you define default values on fields?

- A. Default values are not permitted
- B. Set as Constants or Expressions based on other field values
- C. Set only for Constant values
- D. Default values must be manually entered by the user

Answer: B

NEW QUESTION # 47
You can choose multiple field configurations and migrate them to the production site by creating a package in your test site. Which of the following steps should be included? (Select 3 correct answers)

- A. The Flex Master Data (FMD) templates must be defined and their data should be loaded in the production site before migrating FMD custom fields.
- B. Make sure you update the string resource files in the production site before migrating the corresponding configurations from test to production site.
- C. If you are migrating fields that are associated with enumerations, you should load those enumerations in the production site before migrating the fields.
- D. Discard any other packages that appear in My Action Items.
- E. Publish the form template within the test site in order to add the form fields in the package.

Answer: A,B,C

Explanation:
When migrating field configurations in SAP Ariba, it's essential to prepare all dependent components to avoid migration errors.
* Enumerations (B): These must be imported into Production before migrating fields that reference them, since the fields depend on the enumerated values to validate configurations.
* String Resource Files (C): These contain translations and label customizations. They should be uploaded and updated in Production first to ensure that migrated fields have the proper localized text.
* Flex Master Data (E): Since fields referencing FMD templates rely on these data structures, the templates and their associated data must exist in Production before migrating the fields that depend on them. Discarding unrelated packages (A) or publishing form

templates (D) is unrelated or unnecessary for field migration workflows; fields and forms are handled separately. SAP best practices emphasize preparing all referenced master data and resource files to ensure smooth and error-free field migration.

NEW QUESTION # 48

Which of the following master data types requires manual migration from Test to Production in a Greenfield migration?

- A. Translations
- B. Enumerations
- C. Relations and relation entries
- D. Clause Library

Answer: B

Explanation:
In SAP Ariba Greenfield deployments, Enumerations (picklist value lists) require manual migration because they are not included in Intelligent Configuration Manager (ICM) bundles. Enumerations must be manually exported from Test and imported into Production to ensure correct picklist values for fields that depend on them.
Other master data types like Clause Library and Relations can be migrated using standard migration tools or processes. Translations are handled via AML & Translations Upload.
Ensuring enumerations are migrated correctly is critical because missing or inconsistent enumerations can cause field validation errors and disrupt system usage.

NEW QUESTION # 49

Which of the following accurately describes the migration of flex master data templates using the migration tool?

- A. Both the templates and their data are fully migrated by the tool.
- B. Neither the templates nor the data is migrated using the tool
- C. The templates are migrated by the tool, but the data must be loaded manually later.
- D. Only the data of the flex master data templates is migrated; templates must bee created manually.

Answer: C

NEW QUESTION # 50

......

Taking the SAP C-ACDET-2506 practice test is very beneficial to clear the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite C-ACDET-2506 exam on the first try. You get awareness about the SAP C-ACDET-2506 real exam environment because the C-ACDET-2506 Practice Exam has an actual exam-like pattern. Furthermore, the SAP C-ACDET-2506 practice test tracks and reports your performance.

As long as you attach more attention and master the core knowledge of our C-ACDET-2506 exam bootcamp files, we assure that you will have a good command of the relevant knowledge before taking the exam and you will get a nice passing score, Our C-ACDET-2506 exam materials will give you the best knowledge of the contents of the C-ACDET-2506 exam certification course outline, To make sure get the certification easily, our test engine simulates the atmosphere of the C-ACDET-2506 real exam and quickly grasp the knowledge points of the exam.

Well, the doctors hadn't told me and, of course, they had more tests to do C-ACDET-2506 and stuff, but my daughter knew I wanted to know what was going on so she told me, Which of the following problems is preventing you from proceeding?
