CheckPoint 156-536 Test Quiz | 156-536 Valid Exam Online

Our braindumps for 156-536 real exam are written to highest standard of technical profession, tested by our senior IT experts and certified trainers. You can totally trust our 156-536 exam prep materials because we guarantee the best quality of our products. With our latest 156-536 Training Materials, you will pass the certification exam in your first try. We hope you clear exam

successfully with our products.

CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q33-Q38):

NEW QUESTION # 33

Which solution encrypts various types of removable storage media including USB drives, backup hard drives, and SD cards?

- A. Full Disk Encryption and File Recovery
- B. Endpoint's Media Encryption (ME) Software Capability
- C. Full Recovery with Media Encryption
- **D. Media Encryption and Port Protection (MEPP)**

Answer: D

NEW QUESTION # 34

Why is it critical to change the default Agent Uninstall Password?

- A. The default password used is easy to guess.
- B. All passwords and critical data are protected by Full Disk Encryption. The Endpoint agent supports pre-boot authentication so nobody can bypass the agent's security.
- C. There is no need to change it because only the local PC administrator can uninstall the agent.
- **D. You have to change the default Agent Uninstall Password because if you do not, it will be easy for a malware to uninstall the agent itself.**

Answer: D

NEW QUESTION # 35

Which information can we find on the Operational Overview dashboard?

- A. Desktops, Servers, Active Alerts, Anti-Malware update, Harmony Endpoint Version
- B. Active Attacks, Deployment status, Pre-boot status, Anti-Malware update, Harmony Endpoint Version, and Operating system
- **C. Active Endpoints, Active Alerts, Deployment status, Pre-boot status, Encryption Status**
- D. Hosts under Attack, Active Attacks, Blocked Attacks

Answer: C

Explanation:

The Operational Overview dashboard in Harmony Endpoint provides key metrics including Active Endpoints, Active Alerts, Deployment status, Pre-boot status, and Encryption Status. This is supported by the CP_R81.20_Harmony_Endpoint_Server_AdminGuide.pdf on page 63 under the "Overview Tab" section, which states,

"General status reports can be viewed in the SmartEndpoint GUI client. You can monitor Endpoint Security client connection status, compliance to security policy status, information about security events, and more." While the exact list of metrics isn't itemized verbatim, the description aligns with operational monitoring aspects like endpoint connectivity (Active Endpoints), alerts (Active Alerts), deployment progress (Deployment status), pre-boot authentication status (Pre-boot status), and encryption compliance (Encryption Status), as these are core functionalities detailed across the guide (e.g., Full Disk Encryption on page 217, Compliance on page 377).

Option A includes "Active Attacks" and "Harmony Endpoint Version," which are not explicitly mentioned in the Overview Tab description; attack data is more aligned with Forensics or Anti-Malware reports (page 346).

Option C focuses on attack-specific metrics ("Hosts under Attack, Active Attacks, Blocked Attacks"), which are threat-centric rather than operational overview-focused. Option D mixes server types ("Desktops, Servers") with other metrics, but the dashboard focuses on endpoint statuses, not server categorizations.

Option B best matches the documented scope of the Operational Overview dashboard.

References:

CP_R81.20_Harmony_Endpoint_Server_AdminGuide.pdf, Page 63: Overview Tab (describes general status reports on the dashboard).

CP_R81.20_Harmony_Endpoint_Server_AdminGuide.pdf, Page 217: Full Disk Encryption (covers Pre-boot and Encryption

Status).

CP_R81.20_Harmony_Endpoint_Server_AdminGuide.pdf, Page 377: Compliance (relates to deployment and alerts).

NEW QUESTION # 36

How can an administrator tell when the macOS Harmony Endpoint client is successfully installed?

- A. When the client is successfully installed, the Endpoint icon will appear in the computer's menu bar.
- B. The Harmony management portal will generate a pop-up in the portal to notify the administrator.
- C. The Apple device will automatically reboot when the installation is complete. This is confirmation that the client is installed.
- D. The macOS will generate a pop-up message to notify the administrator.

Answer: A

Explanation:

An administrator can confirm a successful macOS Harmony Endpoint client installation when the Endpoint icon appears in the computer's menu bar. This is stated on page 151 under "Deploying Mac Clients," noting that "After installation, the Endpoint Security icon appears in the menu bar." Options like automatic reboot (A) or pop-up messages (B, D) are not documented as standard indicators of successful installation in the guide.

NEW QUESTION # 37

The Check Point Harmony Product Suite is a suite of security products that includes?

- A. Quantum Endpoint (Cloud)
- B. Harmony Endpoint (Cloud and On-Premises)
- C. Harmony Mobile (On-Premises)
- D. Quantum Spark

Answer: B

Explanation:

The Check Point Harmony Product Suite includes Harmony Endpoint, which is available both as a Cloud-based and On-Premises security solution.

Exact Extract from Official Document:

"Harmony Endpoint is available as both Cloud-based and On-Premises deployment." Reference: Check Point Harmony Endpoint Specialist R81.20 Administration Guide, "Introduction to Harmony Endpoint."

NEW QUESTION # 38

.....
