Exams Fortinet FCP_FMG_AD-7.6 Torrent & FCP_FMG_AD-7.6 Free Braindumps

Due to extremely high competition, passing the FCP - FortiManager 7.6 Administrator (FCP_FMG_AD-7.6) exam is not easy; however, possible. You can use ExamBoosts products to pass the FCP - FortiManager 7.6 Administrator (FCP_FMG_AD-7.6) exam on the first attempt. The FCP - FortiManager 7.6 Administrator (FCP_FMG_AD-7.6) practice exam gives you confidence and helps you understand the criteria of the testing authority and pass the FCP - FortiManager 7.6 Administrator (FCP_FMG_AD-7.6) exam on the first attempt.

Fortinet FCP_FMG_AD-7.6 Exam Syllabus Topics:

Topic	Details
-------	---------

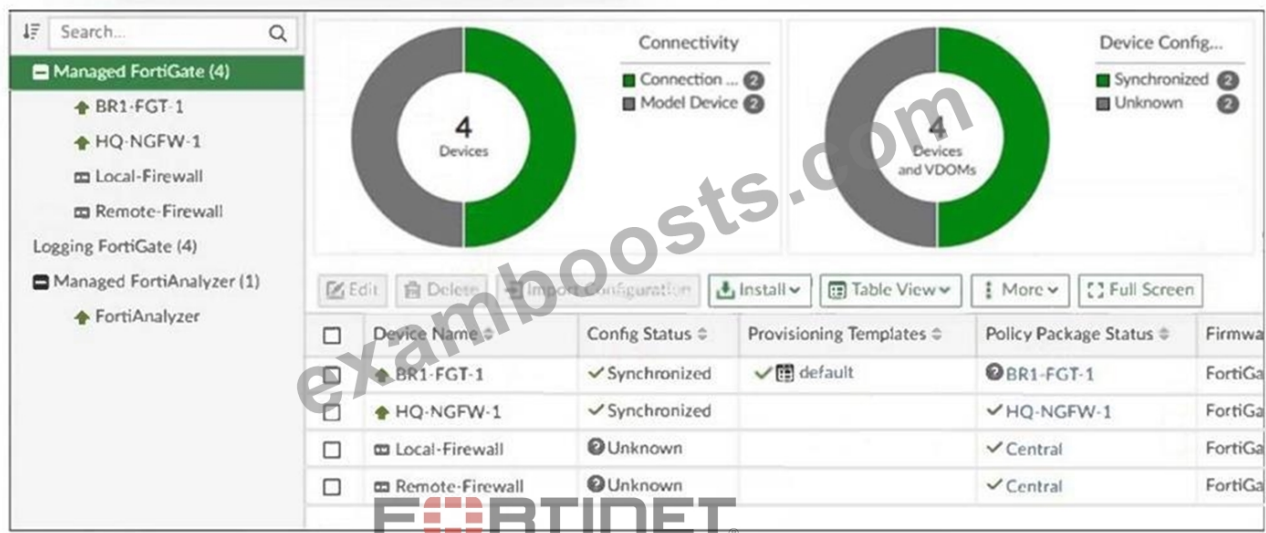

Topic 1	<ul style="list-style-type: none"> • Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.
Topic 2	<ul style="list-style-type: none"> • Troubleshooting
Topic 3	<ul style="list-style-type: none"> • Advanced Configuration: This section of the exam measures the skills of Network Security Engineers and includes knowledge of high availability (HA), FortiGuard service configuration, and global database ADOM settings. These advanced functions help strengthen system reliability and streamline management at a larger scale.
Topic 6	<ul style="list-style-type: none"> • Policy and Objects: This section of the exam measures the skills of System Administrators and evaluates their ability to manage policies and objects within FortiManager. It involves ADOM revisions, workspace mode, and policy imports and installations, emphasizing consistent policy control across networks.
Topic 7	<ul style="list-style-type: none"> • Administration: This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q11-Q16):

NEW QUESTION # 11

Refer to the exhibits. Which IP/netmask will be present in the LAN firewall address object on the Remote-Firewall?

FortiManager device database

FortiManager address object

Edit Address - LAN

Category

Address

Name

LAN

Color

Change

Type

Subnet

IP/Netmask

10.0.0.0/255.255.255.0

Resolve from name

Edit

Delete

Search...

<input type="checkbox"/>	Mapped Device	Details
<input type="checkbox"/>	BR1-FGT-1 [root]	IP/Netmask: 192.168.1.0/255.255.255.0
<input type="checkbox"/>	HQ-NGFW-1 [root]	IP/Netmask: 172.16.0.0/255.255.255.0
<input type="checkbox"/>	Local-Firewall [root]	IP/Netmask: 172.16.10.0/255.255.255.0

3

- A. 172.16.10.0/255.255.255.0
- B. 192.168.1.0/255.255.255.0
- C. 172.16.0.0/255.255.255.0
- D. 10.0.0.0/255.255.255.0

Answer: D

Explanation:

In FortiManager, the "Per-Device Mapping" section allows for overriding the default object value for specific devices. The Remote-Firewall is not listed in the Per-Device Mapping table.

Therefore, it will use the default value defined in the top portion of the address object, which is 10.0.0.0/255.255.255.0.

NEW QUESTION # 12

An administrator has assigned a global policy package to a new ADOM named ADOM1. What will happen if the administrator tries to create a new policy package in ADOM1?

- A. The administrator will be able to select the option to assign the global policy package to the new policy package.
- B. FortiManager will automatically install policies on the policy package in ADOM1.
- C. FortiManager will automatically assign the global policy package to the new policy package.
- D. The administrator will have to assign the global policy package from the global ADOM.

Answer: A

Explanation:

When a global policy package is assigned to an ADOM, administrators creating new policy packages within that ADOM have the option to select and assign the global policy package to the new policy package if desired.

NEW QUESTION # 13

Refer to the exhibit. Which two results occur if you run the script using the Device Database option? (Choose two.)

FortiManager script

Create New Script

Type: CLI Script

Run script on: Device Database

Validate on change: ☐

Validation device platform: FortiGate-VM64

Script details

```
1 config router prefix-list
2 edit public
3 config rule
4 edit 1
5 set prefix 0.0.0.0/0
6 set action permit
7 next
8 edit 2
9 set prefix 8.8.8.8/32
10 set action deny
11 end
```

Format CLI script Revert All Changes

Advanced Device Filters >

- A. The device Config Status is tagged as Modified.
- B. The script history shows the successful installation of the script on the remote FortiGate.
- C. The administrator must install these changes on a managed device using the Install Wizard.
- D. The successful execution of a script on the Device Database creates a new revision history.

Answer: A,C

Explanation:

Running a script on the Device Database marks the configuration as modified but does not immediately apply changes to the device. The administrator must use the Install Wizard to push and install these changes from the Device Database onto the managed device.

NEW QUESTION # 14

An administrator must create a policy and install it on a FortiGate device within an ADOM in backup mode.

How can the administrator perform this task?

- A. Use a FortiManager script to apply the configuration changes.
- B. Enable workflow mode to allow policy creation and approval.
- C. Use the Install Wizard located on the device manager.
- D. Make sure the ADOM and FortiGate firmware versions match and use the ADOM policy package.

Answer: A

Explanation:

In backup mode, FortiManager does not directly manage policy installation via the usual ADOM policy packages; instead, administrators use FortiManager scripts to push configuration changes, including policies, to FortiGate devices.

NEW QUESTION # 15

While attempting to push a NetFlow configuration script through the FortiManager policy package: an administrator encounters an error stating that an object is unrecognized in line 4.

```
Starting log (Run on database)
config vdom
edit AGEUSR
[line 4] > config sys interface [parameter(s) invalid. detail: object unrecognized]
Failed to commit to DB, reason([line 4] > config sys interface [parameter(s) invalid. detail: object unrecognized]
Running script(NetFlow_Configuration) on DB failed
```

What must the administrator do to successfully apply the NetFlow configuration script and avoid the object unrecognized error?

- A. Run the script on the device database.
- B. Make sure the user running the script has full access to the VDOM-AGEUSR.
- C. Use metadata variables if they use VDOMs in the script.
- D. Create a normalized interface on the policy layer before running the script.

Answer: C

Explanation:

When using scripts that reference VDOM-specific objects, such as interfaces, in FortiManager, metadata variables must be used to correctly map those objects per VDOM. This prevents "object unrecognized" errors during script execution.

NEW QUESTION # 16

.....

We hold on to inflexible will power to offer help both providing the high-rank FCP_FMG_AD-7.6 exam guide as well as considerate after-sales services. With our FCP_FMG_AD-7.6 study tools' help, passing the exam will be a matter of course. It is our abiding belief to support your preparation of the FCP_FMG_AD-7.6 study tools with enthusiastic attitude towards our jobs. And all efforts are paid off. The passing rate of exam candidates who chose our FCP_FMG_AD-7.6 Exam Torrent is over 98 percent. All the knowledge is based on the real exam without the chance of failure. So we are never shirking duties and are totally trust-able. So please have a look of our FCP_FMG_AD-7.6 exam torrent' traits and keep faithful to our FCP_FMG_AD-7.6 exam guide.
