We offer free demos as your experimental tryout before downloading our real CAS-004 practice materials. For more textual content about practicing exam questions, you can download our CAS-004 practice materials with reasonable prices and get your practice begin within 5 minutes.

CompTIA Advanced Security Practitioner (CASP+) Exam Sample Questions (Q591-Q596):

NEW QUESTION # 591

A security analyst is reviewing the following output:

Which of the following would BEST mitigate this type of attack?

- A. Deploying a honeypot
- B. Implementing an IDS
- C. Placing a WAF inline
- D. Installing a network firewall

Answer: C

NEW QUESTION # 592

An analyst has prepared several possible solutions to a successful attack on the company. The solutions need to be implemented with the LEAST amount of downtime. Which of the following should the analyst perform?

- A. Implement all the solutions at once in a virtual lab and then run the attack simulation. Collect the metrics and then choose the best solution based on the metrics.
- **B. Implement all the solutions at once in a virtual lab and then collect the metrics. After collection, run the attack simulation. Choose the best solution based on the best metrics.**
- C. Implement every solution one at a time in a virtual lab, running an attack simulation each time while collecting metrics. Roll back each solution and then implement the next. Choose the best solution based on the best metrics.
- D. Implement every solution one at a time in a virtual lab, running a metric collection each time. After the collection, run the attack simulation, roll back each solution, and then implement the next. Choose the best solution based on the best metrics.

Answer: B

NEW QUESTION # 593

A security engineer is troubleshooting an issue in which an employee is getting an IP address in the range on the wired network. The engineer plus another PC into the same port, and that PC gets an IP address in the correct range. The engineer then puts the employee' PC on the wireless network and finds the PC still not get an IP address in the proper range. The PC is up to date on all software and antivirus definitions, and the IP address is not an APIPA address. Which of the following is MOST likely the problem?

- A. The DHCP server has a reservation for the PC's MAC address for the wired interface.
- B. The WiFi network is using WPA2 Enterprise, and the computer certificate has the wrong IP address in the SAN field.
- **C. The company is using 802.1x for VLAN assignment, and the user or computer is in the wrong group.**
- D. The DHCP server is unavailable, so no IP address is being sent back to the PC.

Answer: C

NEW QUESTION # 594

A company is on a deadline to roll out an entire CRM platform to all users at one time. However, the company is behind schedule due to reliance on third-party vendors. Which of the following development approaches will allow the company to begin releases but also continue testing and development for future releases?

- A. Change the scope of the project to use the spiral development methodology.
- B. Revise the scope of the project to use a waterfall approach
- **C. Implement iterative software releases.**
- D. Perform continuous integration.

Answer: C

NEW QUESTION # 595

A company created an external, PHP-based web application for its customers. A security researcher reports that the application has the Heartbleed vulnerability.

Which of the following would BEST resolve and mitigate the issue? (Choose two.)

- A. Changing the code from PHP to ColdFusion
- B. Changing the web server from HTTPS to HTTP
- C. Deploying a WAF signature
- **D. Updating the OpenSSL library**
- E. Using SSLv3
- **F. Fixing the PHP code**

Answer: D,F

Explanation:

Heartbleed, BASH and now POODLE - new SSL vulnerability discovered. Researchers from Google have announced the discovery of another major flaw in Web Security. It has been called POODLE and follows hot on the heels of Bash and Heartbleed. The vulnerability is rooted in SSL v3.

NEW QUESTION # 596

.....
