Real and Updated 220-1101 Exam Questions

CompTIA 220-1101 certified examinations questions are collected and edited by latest exam teaching program and real test questions materials. We are engaged in updating our training materials constantly. If you are afraid that once you purchase our

current version of 220-1101 Certified examinations questions, then there is new update version, current version will be out, please rest assured that you can download free our latest version one we release new version within one year.

CompTIA A+ Certification Exam: Core 1 Sample Questions (Q306-Q311):

NEW QUESTION # 306

A technician is configuring a static WAN address on a SOHO router. Which of the following should the technician do?

- A. Disable DHCP on the required port.
- B. Configure UPnP on the WAN.
- C. Enable IPv6 on all LAN interfaces.
- D. Adjust the LAN subnet mask to 255.255.255.0.

Answer: A

Explanation:

Disabling DHCP ensures that the WAN port uses a static IP address, as DHCP is used to dynamically assign IP addresses. For a static configuration, disabling DHCP is necessary on the required port.

NEW QUESTION # 307

Which of the following describes the difference between a DNS server and a DHCP server?

- A. DNS only assigns private IP addresses, while DHCP only assigns public IP addresses.
- B. DNS is used for address translation, while DHCP is used for IP address assignment.
- C. DNS is used for routing, while DHCP is used for name resolution.
- D. DNS is used to route traffic between networks, while DHCP is used to allocate subnets.

Answer: B

Explanation:

DNS stands for Domain Name System, and it is a network service that translates human-readable names (such as www.google.com) into numerical IP addresses (such as 172.217.14.206) that identify the location of the web servers on the internet. DNS also allows reverse lookup, which means finding the domain name associated with a given IP address. DNS servers are responsible for maintaining a database of domain names and their corresponding IP addresses, and responding to queries from clients who want to resolve a name to an address or vice versa. DHCP stands for Dynamic Host Configuration Protocol, and it is a network service that automatically assigns IP addresses and other network configuration parameters (such as subnet mask, default gateway, DNS server, etc.) to devices that join a network. DHCP servers are responsible for managing a pool of IP addresses and leasing them to clients for a specified duration. DHCP servers also renew or release the IP addresses when the lease expires or the client disconnects from the network. The difference between DNS and DHCP is that DNS is used for address translation, which means converting domain names to IP addresses and vice versa, while DHCP is used for IP address assignment, which means providing IP addresses and other network settings to devices that need to communicate on a network.

NEW QUESTION # 308

Which of the following special function keys is MOST likely to be used when configuring a laptop for a presentation?

- A. External display
- B. Screen orientation
- C. Media options
- D. Screen brightness

Answer: A

NEW QUESTION # 309

A system administrator has been tasked with allowing SMTP traffic through the system's host-based firewall. Which of the following ports should the administrator enable?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

SMTP (Simple Mail Transfer Protocol) uses port 25 to send email messages between servers¹².

SMTP uses port 25 to send email messages between mail servers. Therefore, the system administrator should enable port 25 to allow SMTP traffic through the host-based firewall.

NEW QUESTION # 310

An office manager reports that a printer is experiencing performance issues. Printouts are smudging when they are handled, and, recently whenever they need to print legal sized documents, the paper jams before anything is printed on it.

The following paper sizes are used:

Letter (8.5x11in/21.59x27.94cm)

Legal (8.5x14in/21.59x35.56cm)

Oversized (11x17in/27.94x43.18cm)

□ INSTRUCTIONS

Using the dropdown menus, select from the available printer parts to replace only the faulty components on the office printer to resolve the stated issues.

If at any time you would like to bring back the initial state of the simulation, please click the Reset All button.

Answer:

Explanation:

□ Explanation:

A white printer with blue text boxes Description automatically generated

NEW QUESTION # 311

.....

We can say that the CompTIA 220-1101 exam practice questions are real, valid, and updated CompTIA A+ Certification Exam: Core 1 (220-1101) exam questions that will provide you with everything that you need to learn to prepare and pass the 220-1101 exam. The CompTIA 220-1101 Exam Questions will not only assist you in CompTIA A+ Certification Exam: Core 1 (220-1101) exam preparation but also give you sight knowledge about the CompTIA A+ Certification Exam: Core 1 (220-1101) exam topics that will help you in your professional career.
