What is the cause when alerts generated by a correlation rule are not creating an incident?

- A. The rule is configured with alert severity below Medium.
- B. The rule does not have a drill-down query configured
- C. The rule has alert suppression enabled
- D. The rule is using the preconfigured Cortex XSIAM alert field mapping.

**Answer: A**

Explanation:

The correct answer is A - The rule is configured with alert severity below Medium.

By default, in Cortex XSIAM, only alerts with a severity of Medium or higher will automatically generate incidents. If a correlation rule creates alerts with severity set below Medium (such as Low or Informational), these alerts will not result in the automatic creation of an incident. This ensures that incident queues are not filled with low-priority events.

"Incidents are generated only for alerts with severity of Medium or higher. Alerts below this threshold will not automatically create incidents." Document Reference: XSIAM Analyst ILT Lab Guide.pdf Page: Page 28 (Alerting and Detection section)
