# Zscaler ZDTE Test Fee - ZDTE Latest Test Dumps

ITExamDownload IT experts specialize in training way which is the latest short-term effective. This training method is very helpful to you and you can achieve the expected result. In particular, it brings convenience to these candidates both working and studying. To the best of our knowledge the information contained in this publication is accurate. ITExamDownload Zscaler ZDTE Test Questions and test answers have an advantage over other products with the accuracy of 100%. You may be worried that our ZDTE practice test is old version. Don't worry, Our ITExamDownload Zscaler ZDTE exam dumps is the latest. Free update is for one year.

Obtaining a certificate for an exam can have many benefits, and it will build up your competitive force in the job market and help you to enter a big enterprise and so on. ZDTE exam braindumps of us will help you get the certificate successfully. With professional experts to revise the questions and answers, ZDTE Exam Braindumps are of high quality. ZDTE exam dumps contain knowledge points, and it can help you have a good command of the exam. Choose us, it will become more easily for you to pass the exam.

ZDTE Latest Test Dumps, ZDTE Free Exam Dumps

During nearly ten years, our ZDTE exam questions have met with warm reception and quick sale in the international market. Our ZDTE study materials are not only as reasonable priced as other makers, but also they are distinctly superior in the many respects. With tens of thousands of our loyal customers supporting us all the way, we believe we will do a better job in this career. More and more candidates will be benefited from our excellent ZDTE training guide!

Zscaler Digital Transformation Engineer Sample Questions (Q46-Q51):

NEW QUESTION # 46
What is one benefit of OneAPI?

- A. Simplifies API integration by using a single entry point
- B. Repeated authorization messages required for increasing security
- C. Multiple registration processes
- D. Multiple token requests

Answer: A

Explanation:

Zscaler OneAPI is described in the Digital Transformation Engineer and Zero Trust Automation content as a unified API gateway for the entire Zscaler platform. Official OneAPI overview material explains that it provides "a common API endpoint" and "a single programming interface for the entire Zscaler platform," so automation engineers no longer need to manage different endpoints, authentication patterns, or schemas for each product.

The Zero Trust Automation at-a-glance guide further emphasizes that OneAPI "uses a single API to enable automation as an administrator," which accelerates deployment and reduces human error. Study resources summarizing OneAPI reinforce that it "simplifies integration by providing a single-entry point for accessing multiple APIs," reducing complexity and making it easier to build consistent automation across ZIA, ZPA, ZDX, and ZCC.

The other options contradict this design. OneAPI is specifically intended to avoid multiple registration processes and repeated token or authorization workflows; OAuth 2.0 is centralized via ZIdentity so that API clients authenticate once and then use scoped access across services. Therefore, the clearly documented benefit that matches the Zscaler Digital Transformation Engineer description is that OneAPI simplifies API integration by using a single entry point, making C the correct answer.

NEW QUESTION # 47
An organization needs to comply with regulatory requirements that mandate web traffic inspected by ZIA to be processed within a specific geographic region. How can Zscaler help achieve this compliance?

- A. By creating a subcloud that includes only ZIA Public Service Edges within the required region
- B. By allowing traffic to bypass ZIA Public Service Edges and connect directly to the destination
- C. By deploying local VPNs to ensure regional traffic compliance
- D. By dynamically allocating traffic to the closest Public Service Edge, regardless of the region

Answer: A

Explanation:
Zscaler Internet Access (ZIA) supports regional processing requirements through the concept of subclouds. A subcloud is defined as a subset of ZIA Public Service Edges (and optionally Private Service Edges) that operate as full-featured secure internet gateways inspecting all web traffic. ZIA administrators can create a custom pool of data centers (Public Service Edges) that are constrained to a specific geography and then associate locations or tunnels with that subcloud. This ensures that user traffic forwarded to ZIA is only terminated and inspected within that defined regional pool, helping satisfy data-residency and regulatory mandates By contrast, Zscaler's default behavior is to use geo-IP and DNS to send traffic to the nearest available Public Service Edge globally, which may violate regional-processing rules (making option D unsuitable in a compliance-driven scenario) Bypassing ZIA (option A) or deploying local VPNs (option C) would undermine the Zero Trust model and remove ZIA's inline security controls. Therefore, configuring a subcloud that includes only Public Service Edges in the mandated region is the architecturally correct and exam-aligned method to keep inspection within a specific geography.

NEW QUESTION # 48
What are the valid options as criteria to create an alert rule in ZDX?

- A. DNS Time and Network Response Time
- B. Server Response Time and Packet Loss Rate
- C. DNS Time and Server Response Time
- D. Page Fetch Time and Packet Loss Rate

Answer: C

Explanation:
Zscaler Digital Experience (ZDX) uses web probes to measure application performance from the user's perspective. Official ZDX reference material and EDU/ZDTE study guides describe the four key web-probe metrics as Page Fetch Time (PFT), DNS Time, Server Response Time (Time to First Byte), and Availability. These same metrics are explicitly called out in training and exam prep as the values that can be used when defining application-level alert rules (for example, "DNS Time > X ms" or "Server Response Time
> Y ms").

ZDX documentation also explains that each alert rule type (Application, Device, Network, or Call Quality) has its own metrics and criteria, and that application alerts are driven by web-probe metrics like DNS Time and Server Response Time, while network alerts use CloudPath metrics such as latency and packet loss. Because both DNS Time and Server Response Time are application-probe metrics, they can legitimately be used together as criteria in an application-type alert rule.

By contrast, combinations that mix web-probe metrics with network-only metrics (like Packet Loss Rate) or vaguely defined "Network Response Time" do not reflect how ZDX structures its alert criteria per type.

Therefore, among the listed options, the pair that correctly represents valid ZDX alert criteria for application monitoring is DNS Time and Server Response Time.

NEW QUESTION # 49
Which protocol allows users to configure a passwordless authentication method for their ZIdentity account?

- A. FIDO2
- B. OIDC
- C. SCIM
- D. SAML

Answer: A

Explanation:
Zscaler Identity (ZIdentity) supports modern, phishing-resistant passwordless authentication using the FIDO2 standard. FIDO2 combines Web Authentication (WebAuthn) and the Client to Authenticator Protocol (CTAP2) to enable users to authenticate with security keys or built-in platform authenticators (such as biometric sensors) without transmitting or storing a reusable password. The Digital Transformation Engineer documentation explains that when a user registers a FIDO2 authenticator with ZIdentity, the service stores a public key tied to that device and account. Future logins are validated using a cryptographic challenge- response, providing strong protection against credential theft and replay attacks.
By contrast, SAML (option B) and OIDC (option C) are federation protocols used for single sign-on (SSO) and identity delegation between an identity provider and service providers; they do not themselves define how passwordless authentication is performed. They can carry assertions from an IdP that might use FIDO2 behind the scenes, but SAML and OIDC are not the passwordless method. SCIM (option D) is a provisioning standard for creating, updating, and deprovisioning identities and groups, not an authentication protocol.
Therefore, the only option that directly represents the protocol enabling passwordless login to a ZIdentity account is FIDO2.

NEW QUESTION # 50
What is the primary benefit of using a Custom Zscaler Connector for SaaS Application?

- A. Temporary user credentials to access the SaaS Application Tenants
- B. Full administrator credentials to access the SaaS Application Tenants
- C. Broad access to all SaaS Application Tenants across Microsoft and Google
- D. Minimum set of required credentials to access the SaaS Application Tenants

Answer: D

Explanation:
In Zscaler's SaaS Security and Data Protection services, a Custom Zscaler Connector (for example, for Google Workspace, Microsoft 365, or Salesforce) is designed so that Zscaler can connect to a specific SaaS tenant using only the minimum set of required credentials and scopes. The documentation for onboarding custom connectors explicitly emphasizes that, instead of providing full administrator rights, you authorize narrowly scoped API/OAuth permissions that allow Zscaler to scan data at rest and enforce security controls while adhering to least-privilege principles.
This minimal-credential approach reduces risk if the connector credentials are ever compromised, simplifies compliance audits, and aligns with modern security best practices. Zscaler needs just enough access to read, classify, and (where applicable) remediate or quarantine sensitive content in sanctioned SaaS applications, not broad tenant-wide admin access. Options suggesting temporary credentials, broad cross-tenant access, or full administrator rights contradict this design philosophy and the way the connectors are documented. Therefore, the primary benefit-and the key phrase you should associate with Custom Zscaler Connectors for the exam-is that they enable Zscaler to operate using a minimum set of required credentials for each SaaS Application tenant.

NEW QUESTION # 51
......

Now, I am glad to introduce a secret weapon for all of the candidates to pass the exam as well as get the related certification without any more ado-- our ZDTE study materials. We aim to help as many people as possible rather than earning as much money as possible. With our ZDTE practice test, you only need to spend 20 to 30 hours in preparation since there are all essence contents in our study materials. What's more, if you need any after service help on our ZDTE Exam Guide, our after service staffs will always

here to offer the most thoughtful service for you.

ZDTE Latest Test Dumps: https://www.itexamdownload.com/ZDTE-valid-questions.html

There is no doubt that having a ZDTE certificate is of great importance to our daily life and daily work, it can improve your comprehensive strength when you are seeking for a decent job or competing for an important position, mainly because with ZDTE certification, you can totally highlight your resume and become more confident in front of your interviewers and competitors, Zscaler ZDTE Test Fee Do you know how to enlarge your friend circles and make friends with all those elites in your company?

New way: Multiple tools are combined to create a complete system, When the failed interface recovers, it becomes the standby interface for the group, There is no doubt that having a ZDTE certificate is of great importance to our daily life and daily work, it can improve your comprehensive strength when you are seeking for a decent job or competing for an important position, mainly because with ZDTE Certification, you can totally highlight your resume and become more confident in front of your interviewers and competitors.

Pass Zscaler ZDTE Exam and Get Certified with Ease

Do you know how to enlarge your friend circles and make friends ZDTE with all those elites in your company, If we can aid them to live better, we just do a meaningful thing.

You can master the new test points based on real test by our Zscaler Digital Transformation Engineer practice materials which give you a real test environmental experiences, Once you clear ZDTE exam and obtain certification you will have a bright future.
