Latest Updated Valid AI-102 Study Materials Supply you Valuable Valid Exam Review for AI-102: Designing and Implementing a Microsoft Azure AI Solution to Prepare easily

Another thing you will get from using the AI-102 Exam study material is free to support. If you encounter any problem while using the AI-102 material, you have nothing to worry about. The solution is closer to you than you can imagine, just contact the support team and continue enjoying your study with the Designing and Implementing a Microsoft Azure AI Solution preparation material.

The Microsoft AI-102 Exam is designed to test the candidate's proficiency in various areas related to designing and implementing Azure AI solutions. AI-102 exam covers topics such as developing AI solutions, designing and implementing AI apps and agents, and integrating AI services with Azure solutions. AI-102 exam also covers advanced topics such as natural language processing (NLP), computer vision, and knowledge mining.

To prepare for the Microsoft AI-102 Exam, candidates should have a solid understanding of Azure services, as well as experience in designing and implementing AI solutions. They should also be familiar with data science concepts, machine learning algorithms, and programming languages such as Python. Microsoft provides various resources for exam preparation, including online training courses, practice tests, and study guides. Candidates can also take advantage of the Microsoft Azure community to connect with other professionals and learn from their experiences.

Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q19-Q24):

NEW QUESTION # 19

You plan to provision Azure AI service resources by using the following method.

□

Answer:

Explanation:

Explanation:

The code snippet shows a helper function provision_resource that provisions Azure Cognitive Services accounts by specifying:

- * Name (resource name)
- * Kind (the type of Cognitive Service, e.g., ComputerVision, FormRecognizer, etc.)
- * Location (Azure region, such as eastus)
- * SKU tier (pricing tier, e.g., F0 = free, S0 = standard)

The dropdown includes ComputerVision, CustomVision.Prediction, CustomVision.Training, and FormRecognizer.

The question context indicates a need to provision an Azure AI service resource, and the answer area highlights the FormRecognizer option. This aligns with document processing scenarios requiring Azure AI Document Intelligence (formerly Form Recognizer).

The second dropdown shows combinations of pricing and regions:

- * "eastus", "S1"
- * "useast", "S1"
- * "S0", "eastus"
- * "S0", "useast"

Azure AI Form Recognizer (Document Intelligence) supports S0 (Standard) and F0 (Free) SKUs in common regions like East US.

"S0", "eastus" is a valid and recommended configuration.

Other options like "S1" are not correct here, as Form Recognizer uses S0/F0, not S1.

The answer:

- * Service Kind: FormRecognizer
- * Location and SKU: "S0", "eastus"
- * Azure AI Document Intelligence (Form Recognizer) documentation
- * Azure Cognitive Services resource creation parameters
- * Pricing tiers for Form Recognizer

NEW QUESTION # 20

You are developing an application that will use the Computer Vision client library. The application has the following code.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 21

You plan to build a chatbot to support task tracking.

You create a Language Understanding service named lu1.

You need to build a Language Understanding model to integrate into the chatbot. The solution must minimize development time to build the model.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. (Choose four.)

Answer:

Explanation:

Explanation

1. Add a new application
2. Add a prebuilt domain intent ToDo (it has already utterances so we can skip this step)
3. Train
4. Publish

Topic 2, Wide World Importers

Case study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Existing Environment

A company named Wide World Importers is developing an e-commerce platform.

You are working with a solutions architect to design and implement the features of the e-commerce platform.

The platform will use microservices and a serverless environment built on Azure.

Wide World Importers has a customer base that includes English, Spanish, and Portuguese speakers.

Applications

Wide World Importers has an App Service plan that contains the web apps shown in the following table.

Azure Resources

You have the following resources:

An Azure Active Directory (Azure AD) tenant

The tenant supports internal authentication.

All employees belong to a group named AllUsers.

Senior managers belong to a group named LeadershipTeam.

An Azure Functions resource

A function app posts to Azure Event Grid when stock levels of a product change between OK, Low Stock, and Out of Stock. The function app uses the Azure Cosmos DB change feed.

An Azure Cosmos DB account

The account uses the Core (SQL) API.

The account stores data for the Product Management app and the Inventory Tracking app.

An Azure Storage account

The account contains blob containers for assets related to products.

The assets include images, videos, and PDFs.

An Azure Cognitive Services resource named wwics

A Video Indexer resource named wwivi

Requirements

Business Goals

Wide World Importers wants to leverage AI technologies to differentiate itself from its competitors.

Planned Changes

Wide World Importers plans to start the following projects:

A product creation project: Help employees create accessible and multilingual product entries, while expediting product entry creation.

A smart e-commerce project: Implement an Azure Cognitive Search solution to display products for customers to browse.

A shopping on-the-go project: Build a chatbot that can be integrated into smart speakers to support customers.

Business Requirements

Wide World Importers identifies the following business requirements for all the projects:

Provide a multilingual customer experience that supports English, Spanish, and Portuguese.

Whenever possible, scale based on transaction volumes to ensure consistent performance.

Minimize costs.

Governance and Security Requirements

Wide World Importers identifies the following governance and security requirements:

Data storage and processing must occur in datacenters located in the United States.

Azure Cognitive Services must be inaccessible directly from the internet.

Accessibility Requirements

Wide World Importers identifies the following accessibility requirements:

All images must have relevant alt text.

All videos must have transcripts that are associated to the video and included in product descriptions.

Product descriptions, transcripts, and all text must be available in English, Spanish, and Portuguese.

Product Creation Requirements

Wide World Importers identifies the following requirements for improving the Product Management app:

Minimize how long it takes for employees to create products and add assets.

Remove the need for manual translations.

Smart E-Commerce Requirements

Wide World Importers identifies the following requirements for the smart e-commerce project:

Ensure that the Cognitive Search solution meets a Service Level Agreement (SLA) of 99.9% availability for searches and index writes.

Provide users with the ability to search insight gained from the images, manuals, and videos associated with the products.

Support autocomplete and autosuggestion based on all product name variants.

Store all raw insight data that was generated, so the data can be processed later.

Update the stock level field in the product index immediately upon changes.

Update the product index hourly.

Shopping On-the-Go Requirements

Wide World Importers identifies the following requirements for the shopping on-the-go chatbot:

Answer common questions.

Support interactions in English, Spanish, and Portuguese.

Replace an existing FAQ process so that all Q&A is managed from a central location.

Provide all employees with the ability to edit Q&As. Only senior managers must be able to publish updates.

Support purchases by providing information about relevant products to customers. Product displays must include images and warnings when stock levels are low or out of stock.

Product JSON Sample

You have the following JSON sample for a product.

□

NEW QUESTION # 22

You have an Azure subscription that contains an Azure AI Language service resource named Resource1. You query Resource1 by running a cURL command and receive the following response.

□ For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth point.

□

Answer:

Explanation:

□

NEW QUESTION # 23

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□

NEW QUESTION # 24

.....

Our AI-102 real exam applies to all types of candidates. Buying a set of the AI-102 learning materials is not difficult, but it is difficult to buy one that is suitable for you. For example, some learning materials can really help students get high scores, but they usually require users to have a lot of study time, which is difficult for office workers. With our AI-102 study questions for 20 to 30 hours, then you can be confident to pass the exam for sure.
