

# H12-521\_V1.0-ENU Practice Exams & H12-521\_V1.0-ENU Valid Braindumps

There are some prominent features that are making the Huawei H12-521\_V1.0-ENU exam dumps the first choice of Huawei H12-521\_V1.0-ENU certification exam candidates. The prominent features are real and verified HCIP-Intelligent Vision V1.0 (H12-521\_V1.0-ENU) exam questions, availability of HCIP-Intelligent Vision V1.0 (H12-521\_V1.0-ENU) exam dumps in three different formats, affordable price, 1 year free updated Huawei H12-521\_V1.0-ENU exam questions download facility, and 100 percent Huawei H12-521\_V1.0-ENU exam passing money back guarantee.

You will earn the Huawei H12-521\_V1.0-ENU certification on the first try if you use H12-521\_V1.0-ENU Questions. Our high-quality Huawei H12-521\_V1.0-ENU practice questions preparation material in three formats will help you crack the Huawei H12-521\_V1.0-ENU Exam in one go. For the Huawei H12-521\_V1.0-ENU exam dumps, we offer Huawei H12-521\_V1.0-ENU PDF questions, desktop H12-521\_V1.0-ENU practice test software, and web-based H12-521\_V1.0-ENU practice exam software.

## New H12-521\_V1.0-ENU Practice Exams 100% Pass | High Pass-Rate H12-521\_V1.0-ENU Valid Braindumps: HCIP-Intelligent Vision V1.0

TestkingPDF guarantee the best valid and high quality Huawei study guide which you won't find any better one available. H12-521\_V1.0-ENU training pdf will be the right study reference if you want to be 100% sure pass and get satisfying results. From our H12-521\_V1.0-ENU free demo which allows you free download, you can see the validity of the questions and format of the H12-521\_V1.0-ENU actual test. In addition, the price of the H12-521\_V1.0-ENU dumps pdf is reasonable and affordable for all of you.

Huawei H12-521\_V1.0 (HCIP-Intelligent Vision V1.0) Exam is a valuable certification for professionals who are looking to enhance their knowledge and skills in the field of intelligent vision technology. It is a challenging test that requires a deep understanding of the subject matter, but passing the exam can help professionals advance their careers and demonstrate their expertise to employers and clients.

Huawei H12-521\_V1.0-ENU (HCIP-Intelligent Vision V1.0) Exam is a certification exam that is designed to assess the skills and knowledge of IT professionals in the field of intelligent vision. H12-521\_V1.0-ENU exam is intended for individuals who have experience working with intelligent vision technologies and who are looking to enhance their skills and knowledge in this area.

## Huawei HCIP-Intelligent Vision V1.0 Sample Questions (Q10-Q15):

### NEW QUESTION # 10

What is the function of a strobe light? ( )

- A. Strobe lights are mainly used in checkpoint mode in order to illuminate vehicle interiors.
- **B. Strobe lights illuminate ambient environments and vehicles/license plates at adjustable frequencies to increase the brightness and clarity of live video images and captured images.**
- C. Strobe lights can connect to sensors that can detect passing vehicles and transmit detection signals to the camera.
- D. Precise speed measurement

**Answer: B**

Explanation:

The correct answer is B . The material defines the strobe light as a lighting compensation device, stating that "Strobe light: provides light compensation at night to clearly capture license plates and pedestrians" .

This directly shows that the purpose of the strobe light is to improve scene illumination so that important visual targets can be captured more clearly, especially in low-light conditions. That function most closely matches option B .

From an engineering standpoint, a strobe light is used to enhance the effective brightness of the monitored area and improve the visibility of vehicles, license plates, and other targets in both live viewing and snapshot capture. The installation notes further mention that the strobe light should be angled properly relative to the lane to avoid overexposure of license plates caused by direct illumination , which confirms that its role is optical illumination rather than sensing or speed detection. Option A is more consistent with a flash light , because the material states that "Flash light: provides strong light compensation to clearly capture targets and vehicle interiors" . Options C and D describe sensor and radar-related functions, not strobe light behavior.

#### NEW QUESTION # 11

() refers to the detection of whether the flow of people in the designated area exceeds the set threshold, and when the threshold is exceeded, an alarm is generated.

- A. Cross-line statistics
- B. Queuing statistics
- **C. Population density testing**
- D. Regional population statistics

**Answer: C**

#### NEW QUESTION # 12

Manual zoom camera, you can adjust the N-F knob to (), adjust a T knob to ().

- A. Adjust focus, adjust focus
- B. Adjust the focus, adjust the focus
- C. Adjust the focus, adjust the focus
- **D. Adjust focus, adjust focus**

**Answer: D**

#### NEW QUESTION # 13

Which of the following tasks need to be completed before pole erection and setting during site installation?

- A. Install lithium batteries
- B. Connect the ground cable of the function module to the ground bar
- C. Adjust the camera's shooting angle
- **D. Install a lightning rod**

**Answer: D**

Explanation:

The correct answer is B . The training content identifies pole erection as a distinct step and separately highlights a prerequisite safety point that "The lightning rod must be secured" . This indicates that the lightning rod installation is treated as a preparation requirement associated with the pole before or during erection safety control, rather than as a later commissioning activity.

By contrast, the other options clearly belong to later installation phases. Lithium batteries are part of the pole-mounted functional equipment and are installed after the pole structure is already in place. Camera shooting angle adjustment is a post-installation alignment task performed only after the camera has been mounted. Connecting the ground cable of the function module to the

ground bar is also a module-level electrical integration task that depends on the module and pole already being installed. In actual outdoor intelligent vision deployment, structural safety and lightning protection are handled first because they affect lifting, erection, and long-term site protection. Therefore, among the given options, the task that must be completed before pole erection and setting is installing the lightning rod .

#### NEW QUESTION # 14

At night, the brightness of the camera screen is too high. Which of the following methods can solve the problem?

- A. Increase the brightness of the fill light
- B. Increase the shutter speed
- C. Turn on the fog mode
- D. Reduce the brightness of the fill light

**Answer: D**

#### NEW QUESTION # 15

.....

We have three versions of H12-521\_V1.0-ENU learning materials available, including PDF, Software and APP online. The most popular one is PDF version of H12-521\_V1.0-ENU study guide can be printed into papers so that you are able to write some notes or highlight the emphasis. On the other hand, Software version of our H12-521\_V1.0-ENU Practice Questions is also welcomed by customers, especially for windows users. As for PPT online version, as long as you download the app into your computer. You can enjoy the nice service from us.
