顧客様と販売者の間での信頼性は苦労かつ大切なことだと良く知られます。誠意をみなぎるFortinet FCP_FAZ_AD-7.4試験備考資料は我々チームの専門化を展示されるし、最完全の質問と再詳細の解説でもって試験に合格するのを助けるます。同時的に、皆様の認可は我々仕事の一番良い評価です。

Fortinet FCP_FAZ_AD-7.4 認定試験の出題範囲:

トピック	出題範囲
トピック 1	• Device Management: Here, Fortinet network and security analysts are evaluated on their ability to handle devices linked to FortiAnalyzer. This includes adding new devices, managing them efficiently, and troubleshooting communication issues.
トピック 2	• Logs and Reports Management: This part of the exam measures the candidate's ability to handle log data and generate reports using FortiAnalyzer. Network and security analysts must show proficiency in managing, analyzing, and reviewing logs to ensure effective system monitoring and auditing processes are in place.
トピック 3	• Administration: This section evaluates the ability of network and security analysts to configure administrative access and manage Administrative Domains (ADOMs). It covers tasks such as setting user permissions, managing backups, and disk quotas, and ensuring secure and efficient management of administrative privileges within FortiAnalyzer systems.
トピック 4	• System Configuration: This section assesses the capabilities of network and security analysts in managing FortiAnalyzer systems. It includes tasks like performing initial configurations, setting up high-availability systems, and configuring RAID for storage.

あなたのキャリアでいくつかの輝かしい業績を行うことを望まないのですか。きっとそれを望んでいるでしょう。では、常に自分自身をアップグレードする必要があります。では、IT業種で仕事しているあなたはどうかやって自分のレベルを高めるべきですか。実は、FCP_FAZ_AD-7.4認定試験を受験して認証資格を取るのはいっの 良い方法です。Fortinetの認定試験のFCP_FAZ_AD-7.4資格は非常に大切なものですから、Fortinetの試験を受け

る人もますます多くなっています。

Fortinet FCP - FortiAnalyzer 7.4 Administrator 認定 FCP_FAZ_AD-7.4 試験問題 (Q92-Q97):

質問 # 92

After you have moved a registered logging device out of one ADOM and into a new ADOM, you run the following command: `execute sql-local rebuild-adom <new-ADOM-name>` What is the purpose of running this CLI command?

- A. To remove the analytics logs of the device from the old database
- **B. To populate the new ADOM with analytical logs for the moved device, so you can run reports**
- C. To migrate the archive logs to the new ADOM
- D. To reset the ADOM disk quota enforcement to its default value

正解: B

解説:

When you move a registered logging device from one ADOM (Administrative Domain) to another in FortiAnalyzer, it's essential to ensure that the analytical logs for the moved device are available in the new ADOM to maintain continuity in reporting and log analysis. The command `execute sql-local rebuild-adom <new-ADOM-name>` is used specifically for this purpose. Running this command populates the new ADOM with the analytical logs of the moved device, enabling you to generate accurate and comprehensive reports based on the historical data of the device in its new ADOM context. This process ensures that the transition of devices between ADOMs does not lead to a loss of analytical insight or reporting capabilities for the device's traffic and events.

質問 # 93

What is the recommended method of expanding disk space on a FortiAnalyzer VM?

- A. From the VM host manager, expand the size of the existing virtual disk and use the `# execute format disk` command to reformat the disk
- B. From the VM host manager, add an additional virtual disk and rebuild your RAID array
- **C. From the VM host manager, add an additional virtual disk and use the `#execute lvm extend <disk number>` command to expand the storage**
- D. From the VM host manager, expand the size of the existing virtual disk

正解: C

解説:

質問 # 94

A play book contains five tasks in total. An administrator executed the playbook and four out of five tasks finished successfully, but one task failed. What will be the status of the playbook after its execution?

- **A. Failed**
- B. Success
- C. Upstream_failed
- D. Running

正解: A

解説:

Playbook jobs that include one or more failed tasks are labeled as Failed in Playbook Monitor.

FortiAnalyzer_7.0_Study Guide page No: 247

Playbook jobs that include one or more failed tasks are labeled as Failed in Playbook Monitor. A failed status, however, does not mean that all tasks failed. Some individual actions may have been completed successfully.

質問 # 95

In order for FortiAnalyzer to collect logs from a FortiGate device, what configuration is required? (Choose two.)

- A. FortiGate must be registered with FortiAnalyzer
- B. ADOMs must be enabled
- C. Log encryption must be enabled
- D. Remote logging must be enabled on FortiGate

正解: A、D

解説:

Pg 70: "after you add and register a FortiGate device with the FortiAnalyzer unit, you must also ensure that the FortiGate device is configured to send logs to the FortiAnalyzer unit."

<https://docs.fortinet.com/uploaded/files/4614/FortiAnalyzer-5.4.6-Administration%20Guide.pdf> Pg 45: "ADOMs must be enabled to support the logging and reporting of NON-FORTIGATE devices, such as FortiCarrier, FortiClientEMS, FortiMail, FortiWeb, FortiCache, and FortiSandbox."

質問 #96

Which log type does the FortiAnalyzer indicators of compromise feature use to identify infected hosts?

- A. Application control logs
- B. Antivirus logs
- C. Web filter logs
- D. IPS logs

正解: C
