

# New Microsoft GH-100 Exam Online, Reliable GH-100 Exam Sims

What's more, part of that PassReview GH-100 dumps now are free: [https://drive.google.com/open?id=1HsFLIxb8IMS866b6xd2iIPJU\\_JneBtwV](https://drive.google.com/open?id=1HsFLIxb8IMS866b6xd2iIPJU_JneBtwV)

Our website offer considerate 24/7 services with non-stopping care for you. Although we cannot contact with each other face to face, but there are no disparate treatments and we treat every customer with consideration like we are around you at every stage during your review process. We will offer help insofar as I can. Some company refused to rescind customers' money when they fail unfortunately at the end of the day. While our GH-100 practice materials are beneficiary even you lose your chance of winning this time. Full refund or other version switch is accessible.

## Microsoft GH-100 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Support GitHub Enterprise for users and key stakeholders: This section of the exam measures skills of GitHub Enterprise Administrators and covers supporting users, identifying issues that can be resolved internally versus those needing GitHub Support, and generating support bundles and diagnostics. It also involves recognizing underutilized features, managing workflows like branching and pull requests, understanding CI</li><li>CD strategies, recommending tooling, and extending capabilities through APIs or Marketplace apps.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Describe how GitHub is deployed, distributed, and licensed: This section of the exam measures skills of GitHub Enterprise Administrators and highlights the deployment models of GitHub Enterprise Server, Enterprise Cloud, and GitHub AE. It covers licensing structures, billing for seat licenses and metered services, support options, and monitoring license usage across users and machine accounts.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Enable secure software development and ensure compliance: This section of the exam measures skills of GitHub Enterprise Administrators and deals with applying GitHub's security and compliance capabilities. It covers policies, auditing, scrubbing sensitive data, secret scanning, code scanning with CodeQL, dependency management with Dependabot, and implementing security response plans. It also explores authentication tokens, app security policies, and enterprise managed users.</li></ul>

## Reliable GH-100 Exam Sims - GH-100 Exam Sims

This Microsoft PDF file is a really convenient and manageable format. Furthermore, the Microsoft GH-100 PDF is printable which enables you to study or revise questions on the go. This can be helpful since staring at a screen during long study hours can be tiring and the GH-100 PDF hardcopy format is much more comfortable. And this GitHub Administration price is affordable.

### Microsoft GitHub Administration Sample Questions (Q24-Q29):

#### NEW QUESTION # 24

Which of the following accurately contrasts a GitHub App and a GitHub Action?

- A. GitHub Apps can only be used inside .github/workflows
- **B. GitHub Actions can only be used to respond to events within a single repository while GitHub Apps can respond to events from multiple repositories**
- C. GitHub Apps run only on GitHub-provided virtual machines, while GitHub Actions run only on customer-hosted machines
- D. GitHub Actions are limited to reading repository content only

**Answer: B**

Explanation:

GitHub Actions workflows are defined and triggered within a single repository's context, whereas GitHub Apps are installed at the organization or user level and can subscribe to events across multiple repositories.

#### NEW QUESTION # 25

Why would a GitHub App be favored over a machine account for automation tasks?

- A. Machine accounts are required for webhook delivery.
- B. Machine accounts are easier to audit than GitHub Apps.
- **C. GitHub Apps provide a higher rate limit ceiling than using a personal access token on a machine account, when they use an install token and are owned by a GitHub Enterprise Cloud licensed enterprise.**
- D. GitHub Apps are limited to a single repository.

**Answer: C**

Explanation:

GitHub Apps authenticate with short-lived installation tokens scoped to fine-grained permissions and, when owned by a GitHub Enterprise Cloud organization, enjoy a higher rate limit (15,000 requests/hour) compared to a machine account's personal access token.

#### NEW QUESTION # 26

Which THREE of the following accurately describe how the SCIM protocol enhances user management in GitHub Enterprise Cloud? (Choose three.)

- A. SCIM automates user provisioning when new users are added to the identity provider.
- **B. SCIM synchronizes changes to user attributes from the identity provider to GitHub.**
- C. SCIM generates authentication tokens for accessing GitHub's REST API.
- D. SCIM configures repository permissions based on user roles within the organization.
- E. SCIM automatically deletes organization repositories when administrators are removed.
- **F. SCIM deactivates GitHub accounts when users are deleted from the identity provider.**

**Answer: B,F**

Explanation:

SCIM automatically updates a user's account on GitHub whenever their profile attributes change in the identity provider.

When a user is removed or deactivated in the IdP, SCIM deactivates (soft-deprovisions) their GitHub account and disables access. SCIM provisions new GitHub Enterprise Cloud accounts automatically when users are added in the identity provider.

#### NEW QUESTION # 27

When comparing a partner identity provider integration with a non-partner identity management solution for GitHub Enterprise Managed Users, which statement is Correct?

- A. The partner identity provider integrations support fewer GitHub-supported authentication methods.
- **B. The non-partner identity provider integrations require manual configuration of SAML 2.0 details.**
- C. The non-partner identity provider integrations can utilize OIDC for authentication.
- D. The partner identity provider integrations rely on the partner to support the application on the partner IdP.

**Answer: B**

Explanation:

Non-partner identity provider integrations require you to enter SAML2.0 configuration details by hand - such as the Sign-on URL, Issuer, and X.509 certificate - whereas partner IdPs supply a pre-configured application integration.

#### NEW QUESTION # 28

A team member is unable to push to a repository due to a 403-error related to branch protection. What should the GitHub Enterprise administrator do first?

- A. Remove the user from the team and re-add them
- B. Revert the branch to an earlier state
- **C. Check the user's permissions and rulesets applied to the branch**
- D. Raise a GitHub Support request for permissions issues

**Answer: C**

Explanation:

The administrator should first review the user's repository role and the branch protection rules applied to that branch. A 403 error on push almost always indicates that the user either lacks the necessary write permissions or is not listed among the actors authorized by the branch protection settings.

#### NEW QUESTION # 29

.....

Our company has done the research of the GH-100 study material for several years, and the experts and professors from our company have created the famous GH-100 study materials for all customers. We believe our GH-100 training braidump will meet all demand of all customers. If you long to pass the exam and get the certification successfully, you will not find the better choice than our GH-100 Preparation questions. You can free download the demo of our GH-100 exam questions to check the excellent quality on our website.
