

Cert NCP-CI-Azure Exam - New NCP-CI-Azure Test Experience

DOWNLOAD the newest Actual4dump NCP-CI-Azure PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1-Edp2-EoHn414m9Fa2pqXRMGQz7huLI>

Our NCP-CI-Azure practice materials are your optimum choices which contain essential know-hows for your information. If you really want to get the certificate successfully, only NCP-CI-Azure practice materials with intrinsic contents can offer help they are preeminent materials can satisfy your both needs of studying or passing with efficiency. You may strand on some issues at sometimes, all confusions will be answered by their bountiful contents. Wrong choices may engender wrong feed-backs, we are sure you will come a long way by our NCP-CI-Azure practice material.

Nutanix NCP-CI-Azure Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Deploying an NC2 on Azure Environment: This section assesses the skills of Nutanix Cloud Operators and focuses on deploying the cloud cluster within the Azure environment. Candidates will learn to configure cloud provider networking effectively, ensuring that all necessary resources are correctly set up for deployment.
Topic 2	<ul style="list-style-type: none">• Planning an NC2 on Azure Deployment: This section of the exam measures the skills of IT Administrators and covers the preparation of the Azure cloud environment, including determining the appropriate Azure account and node types. It also involves subscribing to the NC2 service, which requires knowledge of authentication methods and organization naming conventions. Additionally, candidates must determine implementation requirements by evaluating deployment use cases and redundancy needs. Identifying networking requirements is crucial, focusing on connectivity options like VPN and CIDR ranges.
Topic 3	<ul style="list-style-type: none">• Configuring an NC2 on Azure Environment: This section evaluates the skills of IT Administrators and emphasizes modifying cloud networking security to protect resources. Candidates will configure Nutanix networking settings and troubleshoot connectivity issues to ensure seamless communication within the cloud environment.

Topic 4	<ul style="list-style-type: none"> Managing an NC2 on Azure Environment: This section relates to skills in identifying management tasks for nodes and clusters. Candidates will monitor cluster health and cloud resource performance, ensuring that all components function efficiently. Understanding these management tasks is vital for maintaining operational integrity in a hybrid cloud environment.

NCP-CI-Azure Real Braindumps Materials are Definitely Valuable Acquisitions - Actual4dump

As long as you can provide us with a transcript or other proof of your failure, we can refund you the full amount immediately. The goal of our NCP-CI-Azure exam questions is always to get you through the NCP-CI-Azure exam. If you don't pass, we won't earn you any money. This is what we should do for you as a responsible company. But our NCP-CI-Azure Study Materials have the high pass rate as 98% to 100%, so it is guarantee for you to pass.

Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Sample Questions (Q24-Q29):

NEW QUESTION # 24

An administrator is tasked to identify the firewall requirement and submit the port request to the requirement team before the clusters deployment.

Which requirement should the administrator ensure is implement on the corporate firewall?

- A. Allow uni-directional internet Control Message Protocol (ICMP) traffic between the CVMs, femer and Prism Central.
- B. ICMP and connectivity can be disabled between the CVMs, Prism Element, and Prism Central
- C. Allow bi-directional Internet Control Message Protocol (ICMP) traffic between the CVMs, Prism Element, and Prism Central.
- D. ICMP can disable but the connectivity should be enabled between the CVMs. Prism Element, and Prism Central.

Answer: C

Explanation:

ICMP Traffic: ICMP is essential for network diagnostics and troubleshooting, such as ping and traceroute, which help in monitoring the connectivity and health of the network.

Bi-Directional Traffic: Allowing bi-directional ICMP traffic ensures that all nodes (CVMs, Prism Element, and Prism Central) can both send and receive diagnostic messages, which is crucial for maintaining proper communication and network stability.

Corporate Firewall Configuration Guidelines

NEW QUESTION # 25

An administrator has created a new overlay network. Which is intended for the company's user VMs.

The cluster has these characteristics:

- * Policy-based Routing is not configured
- * Only using external NAT
- * DNS Server: 8.8.8.8

After adding a few VMs to the network, the administrator notices that the VMs cannot reach resources outside the network, even by IP address.

What is a likely cause?

- A. The local cluster does not have access to the underlying network.
- B. The VPC connection is not established.
- C. The DNS server is unreachable.
- D. A default route was not configured for the external subnet.

Answer: D

Explanation:

When the administrator notices that the VMs cannot reach resources outside the network, even by IP address, it is likely that a default route was not configured for the external subnet. The default route is essential for directing traffic from the VMs to external networks. Without it, the VMs will not know how to route traffic to external destinations, which leads to connectivity issues.

NEW QUESTION # 26

Which action should the administrator take to troubleshoot the error shown in the exhibit?

- A. Check the NC2 organization permissions.
- B. Check the Azure subnet delegation status.
- C. Check the PC VNet is peered correctly.
- **D. Check the Azure AD App registration Client Secret.**

Answer: D

Explanation:

To troubleshoot the error shown in the exhibit where Azure credentials are not valid and the creation of the resource group failed, the administrator should:

- * Verify that the Azure AD App registration has been correctly configured, especially the Client Secret.
- * Ensure that the Client Secret is valid, has not expired, and matches what has been entered in the configuration.

This step is crucial because an invalid or expired Client Secret would prevent the validation of Azure credentials and the creation of necessary resources.

NEW QUESTION # 27

An administrator seeks to ensure that the newly-created NC2 organization named Finance can only deploy clusters into certain cloud regions.

Which action should the administrator take to do this?

- A. Open a support ticket with Nutanix to whitelist the allowed regions for the Finance N
- B. Configure RBAC roles on the Finance NC2 organization to allow access to regions.
- **C. Specify allowed regions when configuring a cloud account for the Finance NC2 organization.**
- D. Configure permissions in cloud accounts to restrict access to certain regions.

Answer: C

Explanation:

* Cloud Account Configuration: When setting up a cloud account for the NC2 organization, the administrator can specify which regions are available for deploying clusters.

* Restricting Regions: This ensures that the Finance organization can only deploy clusters into the designated regions, complying with organizational policies and requirements.

References:

- * Nutanix NC2 Configuration Guide

NEW QUESTION # 28

An administrator needs to extend an on-premises subnet to an NC2 cluster on Azure.

Which set of options should the administrator configure to complete this task?

- A. Subnet Type: On-premises VLAN subnets and VPC subnets Traffic Type: IPv4 unicast traffic and ARP On-premises Hypervisor: AHV
- B. Subnet Type: On-premises VLAN subnets and VPC subnets Traffic Type: IPv6 unicast traffic and ARP On-premises

Hypervisor: Hyper-V

- C. Subnet Type: On-premises VLAN subnets and VPC subnets Traffic Type: IPv4 unicast traffic IPv6 unicast traffic and ARP On-premises Hypervisor: ESXi and AHV
- D. Subnet Type: VPC subnets
Traffic Type: IPv4 unicast traffic and ARP
On-premises Hypervisor: ESXi, AHV, Hyper-V

Answer: C

Explanation:

To extend an on-premises subnet to an NC2 cluster on Azure, the administrator should configure:

Subnet Type: Both on-premises VLAN subnets and VPC subnets. This ensures that the subnet can span both the on-premises environment and the Azure environment.

Traffic Type: Support for IPv4 unicast traffic, IPv6 unicast traffic, and ARP is necessary to ensure proper communication and address resolution across the extended subnet.

On-premises Hypervisor: ESXi and AHV are supported hypervisors for this type of configuration, allowing for a seamless extension of the subnet between these environments.

NEW QUESTION # 29

.....

The exam solutions has three formats and one of them is Nutanix NCP-CI-Azure practice exam software (desktop and web-based). These Nutanix NCP-CI-Azure practice exams are specially built for the students so that they can evaluate what they have studied. These NCP-CI-Azure Practice Tests are customizable which means that users can adjust the time and questions according to their needs which will teach them how to overcome mistakes so they can pass NCP-CI-Azure exam.
