Study Your CompTIA 220-1202 Exam with Accurate Valid 220-1202 Cram Materials Certainly

No matter you are exam candidates of high caliber or newbies, our CompTIA 220-1202 exam quiz will be your propulsion to gain the best results with least time and reasonable money. Not only because the outstanding content of CompTIA A+ Certification Exam Core 2 220-1202 Real Dumps that produced by our professional expert but also for the reason that we have excellent vocational moral to improve our CompTIA A+ Certification Exam Core 2 220-1202 learning materials quality.

CompTIA A+ Certification Exam: Core 2 Sample Questions (Q193-Q198):

NEW QUESTION # 193

A user receives a new personal computer but is unable to run an application. An error displays saying that .NET Framework 3.5 is required and not found. Which of the following actions is the best way to resolve this issue?

- A. Download the dependency via a third-party repository.
- B. Forward the trouble ticket to the SOC team because the issue poses a great security risk.
- **C. Resolve the dependency through the 'Turn Windows features on or off' menu.**
- D. Ignore the dependency and install the latest version 4 instead.

Answer: C

Explanation:

Windows includes .NET Framework 3.5 as an optional feature. Enabling it via Control Panel Programs and Features Turn Windows features on or off ensures the OS installs the correct version directly from Microsoft without relying on untrusted sources or skipping needed dependencies.

NEW QUESTION # 194

Which of the following describes a vulnerability that has been exploited before a patch or remediation is available?

- A. Brute-force
- B. DoS
- C. Spoofing
- **D. Zero-day**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

A Zero-day vulnerability refers to a security flaw in software or hardware that is unknown to the vendor or has not yet been patched. If this vulnerability is exploited before the vendor has issued a fix or patch, it becomes a Zero-day exploit. These attacks are highly dangerous because they take advantage of the absence of defenses due to the lack of awareness or mitigation options.

A: Spoofing is a form of impersonation, not necessarily tied to unpatched vulnerabilities.

B: Brute-force attacks rely on repeatedly guessing credentials and are not related to software flaws.

C: DoS (Denial of Service) attacks are meant to overwhelm systems and don't necessarily exploit unknown vulnerabilities.

Reference:

CompTIA A+ 220-1102 Objective 2.3: Compare and contrast common social engineering, threats, and vulnerabilities.

Study Guide Section: Threat types - Zero-day attacks, definitions, and implications

NEW QUESTION # 195

A technician needs to download and install a new web browser on a desktop. Which attribute should be used to verify the installer's authenticity?

- A. Date
- **B. Hash**
- C. Size
- D. Name

Answer: B

Explanation:

Hash values (like SHA256) are published by vendors to verify file integrity. A match confirms the file hasn't been tampered with. From Travis Everett - CompTIA A+ All-in-One Exam Guide:

"Use hash values to ensure downloaded software matches the vendor's published version and hasn't been modified."

NEW QUESTION # 196

The battery on a user's smartphone discharges quickly when the user travels. The smartphone was replaced two weeks ago. Which of the following should a technician do first?

- A. Replace the battery with a higher capacity option
- B. Provide an external battery to extend the usage time
- C. Ensure that the charging port is working as expected
- D. Look for applications that are reporting the highest utilization

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

High battery drain is often due to apps running in the background or using GPS during travel. The first step should always be to check battery usage statistics to see if an application is misbehaving.

From All-in-One Exam Guide:

"Travel conditions can increase app activity, especially navigation or social media. Check app battery usage before assuming hardware faults."

NEW QUESTION # 197

A technician is attempting to join a workstation to a domain but is receiving an error message stating the domain cannot be found. However, the technician is able to ping the server and access the internet. Given the following information:

- * IP Address - 192.168.1.210
- * Subnet Mask - 255.255.255.0
- * Gateway - 192.168.1.1
- * DNS1 - 8.8.8.8
- * DNS2 - 1.1.1.1
- * Server - 192.168.1.10

Which of the following should the technician do to fix the issue?

- A. Assign a static IP address.
- B. Change the DNS settings.
- C. Update the default gateway.
- D. Configure a subnet mask.

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The issue described—"domain cannot be found" despite the ability to ping the server and access the internet—indicates a DNS resolution problem, not a network connectivity issue. The workstation is currently using public DNS servers (8.8.8.8 and 1.1.1.1) which cannot resolve internal domain names, such as the ones used in Active Directory environments. To resolve this, the technician needs to change the DNS settings to point to the internal DNS server, which in most domain setups is the domain controller itself (likely 192.168.1.10 in this case).

Here's the breakdown of the incorrect options:

- * B. Assign a static IP address: The IP is already assigned and functioning; the device can ping and reach the network and internet.
- * C. Configure a subnet mask: The subnet mask is appropriate for the network range (Class C /24).
- * D. Update the default gateway: The gateway is valid and allows internet access; this is not the issue.

ComptIA A+ 220-1102 Core 2 Objective Reference:

Objective 1.8 - Given a scenario, use features and tools of the operating system

Under this objective, candidates must know how to troubleshoot OS-based network configurations, including proper DNS settings in domain environments.

NEW QUESTION # 198

Good product can be welcomed by many users, because they are the most effective learning tool, to help users in the shortest possible time to master enough knowledge points, so as to pass the qualification test, and our 220-1202 study materials have always been synonymous with excellence. Our 220-1202 Study Materials can help users achieve their goals easily, regardless of whether you want to pass various qualifying examinations, our products can provide you with the learning materials you want.
