Reliable ITFAS-Level-1 Test Tips, Latest Test ITFAS-Level-1 Discount

They work together and put all their expertise to ensure the top standard of Channel Partner Program Inspection and Testing of Fire Alarm Systems Level I Exam ITFAS-Level-1 valid dumps. Now the Inspection and Testing of Fire Alarm Systems Level I Exam ITFAS-Level-1 exam dumps have become the first choice of NICET ITFAS-Level-1 Exam candidates. With the top-notch and

NICET Inspection and Testing of Fire Alarm Systems Level I Exam Sample Questions (Q49-Q54):

NEW QUESTION # 49

Load testing of the control unit's VRLA batteries reveals that they must be replaced. Which two of the following are requirements for the replacement of VRLA batteries? (Choose two.)

- A. Batteries shall be approved by the authority having jurisdiction.
- B. Batteries shall be the same make and model as those being replaced.
- C. Batteries shall be marked with the month and year of manufacture.
- D. Batteries shall be listed by a nationally recognized testing laboratory.

Answer: C,D

Explanation:
Replacement batteries used in fire alarm systems must meet strict safety and documentation requirements:
NFPA 72 (2022), Section 10.6.10.1.2:
"Batteries shall be marked with the month and year of manufacture."
NFPA 72 (2022), Section 10.6.10.2:
"Batteries shall be listed for the intended purpose by a nationally recognized testing laboratory (NRTL)." There is no requirement that replacement batteries must be the same make/model, though compatibility must be ensured.
Correct answers:
* Batteries shall be listed by a nationally recognized testing laboratory
* Batteries shall be marked with the month and year of manufacture

NEW QUESTION # 50

Where smoke detectors are installed for protection during construction, they shall be cleaned and verified to be within the marked sensitivity range before which event?

- A. Final commissioning
- B. Walk-through by engineer
- C. Final cleaning
- D. Pre-test of system

Answer: A

Explanation:
If smoke detectors are installed during construction, they are likely exposed to dust or debris. NFPA 72 requires that these be cleaned and tested for sensitivity before final commissioning of the system.
NFPA 72 (2022), Section 17.7.1.11:
"Where detectors are used for protection during construction, they shall be cleaned or replaced prior to final system commissioning."
This ensures proper performance and prevents false alarms.
Correct answer: B. Final commissioning

NEW QUESTION # 51

Which two of the following should occur when a signal silence switch for a notification alarm is activated? (Choose two.)

- A. Visible appliances are deactivated.
- B. Audible appliances are deactivated.
- C. HVAC shutdown is deactivated.
- D. Door holders are deactivated.

Answer: A,B

Explanation:
The signal silence switch is used to silence audible signals without resetting the system or clearing the visual indicators of an alarm

condition. However, per code, bothaudible and visible appliancesare allowed to be silenced if the condition is acknowledged and supervised appropriately.
NFPA 72 (2022), Section 10.11.5.2.1:
"The signal silence switch shall be permitted to deactivate both audible and visible notification appliances provided the following conditions are met..." Conditions include that:
* The system must remain inalarm state
* Thecondition must be supervised
* Manual reset is required to restore full function
Note: Door holders and HVAC shutdown systems arebuilding function controls, not notification appliances, and typicallyremain activeuntil full system reset.
Correct answer: Audible appliances are deactivated, Visible appliances are deactivated

NEW QUESTION # 52
When shall the elevator alternate level recall function be initiated?

- A. With activation of a general building alarm
- B. In response to activation of a smoke detector located on a floor above designated lobby
- C. When elevator Phase I recall fails to initiate
- D. In response to activation of a smoke detector located at the designated elevator lobby

Answer: D

Explanation:
Elevator alternate level recall is a life safety feature designed to prevent passengers from arriving at a smoke- compromised floor. NFPA 72 and elevator codes dictate that this function must activatewhen smoke is detected at the primary recall level (designated lobby).
NFPA 72 (2022), Section 21.3.3.1:
"When the elevator lobby smoke detector required for the designated recall level is activated, the elevator shall be recalled to an alternate level." This action prevents elevators from opening at a smoke-filled lobby.
Correct answer: A. In response to activation of a smoke detector located at the designated elevator lobby

NEW QUESTION # 53
Which NFPA standard regulates how to perform the test of engine driven generator?

- A. NFPA 70
- B. NFPA 110
- C. NFPA 72
- D. NFPA 101

Answer: B

Explanation:
Engine-driven generators used for emergency power arenot governed directly by NFPA 72. Instead, their installation and testing requirements are found in:
NFPA 110 - Standard for Emergency and Standby Power Systems
NFPA 110 (2022), Chapter 8details howengine-driven generatorsmust be tested, including runtime, load testing, and maintenance intervals.
NFPA 72 references NFPA 110whenever standby/emergency power is used for fire alarm systems.
Correct answer: D. NFPA 110

NEW QUESTION # 54
......

First and foremost, we have high class operation system so we can assure you that you can start to prepare for the ITFAS-Level-1 exam with our ITFAS-Level-1 study materials only 5 to 10 minutes after payment. Second, once we have compiled a new version of the ITFAS-Level-1 test question, we will send the latest version of our ITFAS-Level-1 Training Materials to our customers for free during the whole year after purchasing. Last but not least, our worldwide after sale staffs will provide the most considerate after

sale service on ITFAS-Level-1 training guide for you in twenty four hours a day, seven days a week.
