Salesforce Certified Platform App Builder Sample Questions (Q159-Q164):

NEW QUESTION # 159

Which of the following cannot be done via a Workflow?

- A. Create an Event
- B. Create an E-mail Alert
- C. Create an Outbound Message
- D. Create a Task

Answer: A

NEW QUESTION # 160

Cloud Kicks (CK) wants to begin socializing and collaborating within Salesforce around customer accounts to discuss various topics. CK would like all company employees to see these conversations.

Which two features of Chatter would meet CK's business needs?

Choose 2 answers

- A. Set up new private Chatter groups.
- B. Use Chatter actions to create tasks to complete.
- C. Use post action on the Account object.
- D. Set up new public Chatter groups.

Answer: C,D

NEW QUESTION # 161

DreamHouse Realty (DR) is expanding into subsidized housing by partnering with local government entities. DR uses Sales Cloud and has enabled field history tracking on the Opportunity object. Due to increased Information requirements, the App Dev team is changing Text Area (Long) fields to Rich Text fields to allow for up to 1,000 characters and better descriptions.

Which two considerations should be made by the team?

- A. Field History Tracking records value changes of 255 characters or less.
- B. Rich text field values of all lengths are displayed fully in reports.
- C. Data loss may occur when changing custom field types.
- D. Audit Trail is available through REST API extracts.

Answer: A,C

NEW QUESTION # 162

Cloud Kicks recently implemented the application lifecycle management process to its release management strategy.

Which category handles bug fixes and simple changes?

- A. Rollback
- B. Patch
- C. Major
- D. Minor

Answer: B

Explanation:

The category that handles bug fixes and simple changes is minor. A minor release is a type of release that introduces small enhancements or fixes to existing functionality, such as correcting spelling errors or improving performance. A minor release usually has a low impact on users and does not require extensive testing or training. A patch release is a type of release that addresses

critical issues or defects that affect the functionality or security of an application, such as fixing broken links or resolving vulnerabilities. A patch release usually has a high impact on users and requires immediate deployment. A major release is a type of release that introduces new functionality or features to an application, such as adding new objects or components or changing business processes. A major release usually has a high impact on users and requires extensive testing and training. A rollback is not a type of release, but an action that reverses a release that has been deployed to an environment, such as undoing changes or restoring previous versions. A rollback may be necessary if a release causes errors or issues that affect the functionality or performance of an application.

NEW QUESTION # 163

Representatives at Universal Containers uses Salesforce to record information for new Leads. When new prospects are added, an outbound message is sent to SAP with the Lead's information.

What automation process will accomplish this without writing any code?

- A. Use Flow to create a wizard that will send an outbound message.
- **B. Create a Workflow Rule with an outbound message as the action.**
- C. Create a process using Process Builder to send the outbound message.
- D. Design an Approval Process that sends an outbound message upon approval.

Answer: B

NEW QUESTION # 164

.....
