### UiPath (ADPv1) Automation Developer Professional Sample Questions (Q53-Q58):

#### NEW QUESTION # 53

Which one of the following expressions Is the equivalent of the If activity from the picture?

- A. message = If(number mod 2 = 0. Odd number. Even number)
- B. message = If(number mod 2 = 0 then "Odd number" else "Even number")
- C. message = If(number mod 2 = 0. "Even number", "Odd number")
- D. message = If(number mod 2 = 0 {"Odd number"} else {"Even number"})

**Answer: C**

Explanation:

This expression evaluates if the number modulo 2 equals 0, which would mean it is even. If true, it assigns the string "Even number" to the variable message. If false (meaning the number is odd), it assigns "Odd number" to message

#### NEW QUESTION # 54

What do the percentages from the Test Explorer panel represent?

- A. Passing percent.
- B. Coverage percent.
- C. Correctness of the code percent.
- D. Percent of test data run.

**Answer: A**

Explanation:

The percentages from the Test Explorer panel represent the passing percent of the test cases that are executed.

The Test Explorer panel shows the status of each test case, the total number of test cases, the number of passed test cases, the number of failed test cases, and the passing percent. The passing percent is calculated by dividing the number of passed test cases by the total number of test cases and multiplying by 100. For example, if there are 10 test cases and 8 of them pass, the passing

percent is 80%. References: Test Explorer

#### NEW QUESTION # 55

While working in an RPA testing project, you encountered the following activity in one of the workflows included in the project.

What action can you perform in your mocked file to replace the functionality of the MessageBox with a LogMessage during mock testing?

- A. Surround activity with mock.
- B. Synchronize mock.
- C. Remove mock activity.
- D. Create mock workflow.

**Answer: A**

Explanation:

To replace the functionality of the MessageBox with a LogMessage during mock testing, the developer can perform the action of Surround activity with mock. This action inserts a mock activity around the selected activity, which allows the developer to change the behavior of the activity for testing purposes. For example, the developer can right-click on the MessageBox activity and select Surround activity with mock from the dropdown menu. This will create a mock activity that contains the MessageBox activity. The developer can then edit the mock activity and replace the MessageBox activity with a LogMessage activity, which will write the message to the output panel instead of displaying it in a dialog box. This way, the developer can test the functionality of the workflow without having to interact with the MessageBox dialog box. References: [Mock Testing], [Surround Activity with Mock]

#### NEW QUESTION # 56

In which scenarios can the Add Attachment option in UiPath.WebAPI.Activities.HttpClient be enabled?

- A. Only when the Request Method is set to POST or PUT.
- B. Only when the Request Method is set to HEAD or OPTIONS.
- C. Only when the Request Method is set to GET or DELETE.
- D. Only when the Authentication protocol is set to OAuth1 or OAuth2.

**Answer: A**

Explanation:

The Add Attachment option is available in the UiPath.WebAPI.Activities.HttpClient activity only when using POST or PUT methods, as these methods are designed for sending data (such as files or form data) to the server. GET, DELETE, HEAD, and OPTIONS methods do not support body content in the same way and are typically used for retrieval or metadata operations.

Reference: UiPath Web API Activities Guide > HTTP Request Activity > Request Configuration

#### NEW QUESTION # 57

What is the correct execution order of the State activity sections?

Instructions: Drag the Description found on the "Left" and drop on the correct Execution Order found on the "Right"

□

**Answer:**

Explanation:

□
