BONUS!!! Download part of TrainingQuiz 3V0-22.25 dumps for free: <https://drive.google.com/open?id=1oVK-wUJU34Ema4mfplNdTk7rulPs6ez>

In comparison to others, Advanced VMware Cloud Foundation 9.0 Operation (3V0-22.25) exam dumps are priced at a reasonable price. It is possible to prepare using 3V0-22.25 exam using a pdf file anytime according to the hectic routines. If you are confused regarding its quality 3V0-22.25 exam dumps, download the free trial to assist you make a final decision prior to purchasing. All exam dumps and patterns are made to follow the style of actual exam dumps. Therefore, it increases your chances of success in the Real 3V0-22.25 Exam.

TrainingQuiz is a convenient website to provide service for many of the candidates participating in the IT certification exams. A lot of candidates who choose to use the TrainingQuiz's product have passed IT certification exams for only one time. And from the feedback of them, helps from TrainingQuiz are proved to be effective. TrainingQuiz's expert team is a large team composed of senior IT professionals. And they take advantage of their expertise and abundant experience to come up with the useful training materials about 3V0-22.25 Certification Exam. TrainingQuiz's simulation test software and related questions of 3V0-22.25 certification exam are produced by the analysis of 3V0-22.25 exam outline, and they can definitely help you pass your first time to participate in 3V0-22.25 certification exam.

Quiz 2026 VMware 3V0-22.25: Advanced VMware Cloud Foundation 9.0 Operation Authoritative Latest Test Vce

A free demo of the Desktop VMware 3V0-22.25 Practice Test Software is available for users to test features of this version before buying it. Desktop VMware 3V0-22.25 Practice Test Software practice test software is Windows-based and can be used without the internet. A 24/7 customer service is available for your assistance for VMware 3V0-22.25 Exam. This practice exam is customizable therefore you can adjust the duration and questions numbers as per your needs for VMware 3V0-22.25 Exam.

VMware Advanced VMware Cloud Foundation 9.0 Operation Sample Questions (Q31-Q36):

NEW QUESTION # 31

A Manager wants to know the "Potential Cost Savings" if the team deletes all VMs that have been powered off for more than 6 months.

Current View

Reclaim Dashboard -> Powered Off VMs

Issue

The list includes VMs powered off for only 7 days, skewing the total savings number high.

How can the Manager filter the view and the savings calculation to only reflect the 6-month candidates?

- A. Change the "Currency" setting to Euro.
- B. It is not possible; the savings calculation is always global.
- C. Export the list to Excel and sum the columns manually.
- **D. Use the Filter or Graph within the Reclaim workbench to slide the "Powered Off Duration" selector (or filter the list) to "> 180 Days". The dashboard dynamically recalculates the "Reclaimable Capacity" and "Savings" values based on the filtered selection.**

Answer: D

NEW QUESTION # 32

Before adding new nodes to a VCF Operations for Logs cluster, verifying DNS resolution is critical. Specifically, which DNS requirement must be met to ensure the cluster functions correctly?

- A. The new nodes must have a "CNAME" record pointing to the ILB VIP.
- B. DNS is optional if using a flat Layer 2 network.
- C. Only the Master node needs DNS; worker nodes can communicate via IP.
- **D. All nodes (existing and new) must be able to resolve each other's FQDNs, and the Reverse DNS (PTR) records must act correctly for all node IPs.**

Answer: D

NEW QUESTION # 33

A Security Administrator needs to create a "Dashboard Viewer" role for the "App-Team-A" group.

Requirements

- Users must log in via their AD accounts.
- Users must ONLY see metrics for VMs tagged "Department: App-Team-A".
- Users must NOT see the "Administration" or "Data Collection" tabs.
- Users must NOT be able to edit or delete any dashboards.

Which configuration strategy satisfies these requirements with the principle of least privilege?

- A. Assign the "ReadOnly" role to the "App-Team-A" group globally (Root Object).
- B. Assign the "Content Admin" role to the group, as it prevents data collection changes.
- C. Add the "App-Team-A" AD group to the local "Administrators" group, but use the UI Customization feature to hide the Administration tabs.
- **D. Create a custom Role with only "Login" and "Dashboard View" privileges. Create a Dynamic Object Group matching the "Department" tag. Assign the Role to the AD Group scoped strictly to that Dynamic Object Group.**

Answer: D

NEW QUESTION # 34

An administrator creates a custom alert in VCF Operations with CPU utilization greater than 99 percent and a recommendation to reboot the guest operating system. The alert triggers correctly, but the guest operating system is not restarted automatically. Why is the guest operating system not restarted automatically, as requested by the recommendation in the alert definition?

- A. The Power Off Allowed flag must be set to true
- **B. VM Tools must be installed**
- C. VM Compatibility must be upgraded

- D. The payload template must be configured

Answer: B

Explanation:

The required prerequisite is that VMware Tools must be installed and running in the target virtual machine.

In VCF Operations, a recommendation can be associated with a remediation action, and supported actions can be triggered from alert recommendations when automation is configured. However, guest-level operations depend on VMware Tools because VCF Operations must communicate cleanly with the guest operating system through vCenter. The official action documentation for Reboot Guest OS for VM states that the action checks whether VMware Tools is installed on the target virtual machine, because VMware Tools is required. If VMware Tools is not installed or is installed but not running, the reboot action does not run and the job is reported as failed in Recent Tasks. The Power Off Allowed flag applies to certain reconfiguration actions, such as changing CPU or memory when the VM may need to be powered off; it is not the control for guest OS reboot. Payload templates are for outbound notifications, and VM compatibility is unrelated.

Reference topic: Objective 4.9 - VCF Operations Troubleshooting Tools and Methodologies / Alert Recommendations / Automated Actions / Reboot Guest OS for VM.

NEW QUESTION # 35

An administrator needs to view logs for either app=SQL OR app=Oracle. By default, adding two filters in the top bar (app=SQL and app=Oracle) creates an AND condition, resulting in zero logs (since an app cannot be both at once).

How can the administrator create an OR condition?

- A. Use the "Advanced Query" CLI.
- **B. Click the "Group Filters" toggle (or equivalent UI mechanism for adding a filter group) and set the group logic to "Any" (OR). Then add both criteria inside this group.**
- C. It is not possible; you must create two separate dashboards.
- D. Type SQL || Oracle in the search bar.

Answer: B

NEW QUESTION # 36

.....

If you visit our website TrainingQuiz, then you will find that our 3V0-22.25 practice questions are written in three different versions: PDF version, Soft version and APP version. All types of 3V0-22.25 training questions are priced favorably on your wishes.

Obtaining our 3V0-22.25 Study Guide in the palm of your hand, you can achieve a higher rate of success. Besides, there are free demos of our 3V0-22.25 learning guide for your careful consideration to satisfy individual needs.
