

# Certified Implementation Specialist - Platform Analytics latest braindumps & CIS-PA sure pass torrent & Certified Implementation Specialist - Platform Analytics free exam pdf

BTW, DOWNLOAD part of TrainingDumps CIS-PA dumps from Cloud Storage: <https://drive.google.com/open?id=1bpIlgRofrGUSJ4z-HNG6nEA2uGC27I0->

Our CIS-PA study braindumps for the overwhelming majority of users provide a powerful platform for the users to share. Here, the all users of the CIS-PA exam questions can through own ID number to log on to the platform and other users to share and exchange, can even on the platform and struggle with more people to become good friend, pep talk to each other, each other to solve their difficulties in study or life. The CIS-PA Prep Guide provides user with not only a learning environment, but also create a learning atmosphere like home.

Choose CIS-PA exam Topics Pdf to prepare for your coming test, and you will get unexpected results. CIS-PA pdf version is very convenient to read and review. If you like to choose the paper file for study, the CIS-PA pdf file will be your best choice. The ServiceNow CIS-PA PdfDumps can be printed into papers, so that you can read and do marks as you like. Thus when you open your dumps, you will soon find the highlights in the CIS-PA papers. What's more, the 99% pass rate can help you achieve your goals.

## CIS-PA Reliable Test Labs & Valid CIS-PA Exam Tutorial

The superb CIS-PA practice braindumps have been prepared extracting content from the most reliable and authentic exam study sources by our professional experts. As long as you have a look at them, you will find that there is no question of inaccuracy and outdated information in them. And our CIS-PA Study Materials are the exact exam questions and answers you will need to pass the exam. What is more, you will find that we always update our CIS-PA exam questions to the latest.

## ServiceNow Certified Implementation Specialist - Platform Analytics Sample

## Questions (Q31-Q36):

### NEW QUESTION # 31

Which of the following statements best describes an Automated Indicator?

- A. A subcategorization of an indicator that provides more granular views of scores
- B. A scheduled job that collects data
- C. A process summary taken at a single point in time
- **D. A series of measurements that describe a process over a period of time**

**Answer: D**

Explanation:

An Automated Indicator in Platform Analytics is defined as a series of measurements collected over time that represent the performance of a process. These measurements are stored as time series data, allowing organizations to analyze trends, patterns, and historical performance. Automated indicators rely on indicator sources and scheduled data collection jobs to collect data at defined intervals, such as daily or hourly.

Option B describes a snapshot report, which represents data at a single point in time and does not support trending. Option C refers to breakdowns, which categorize indicator scores for deeper analysis but do not define the indicator itself. Option D describes the data collection job, which is a mechanism used by automated indicators but not the indicator definition. ServiceNow documentation explicitly states that indicators represent performance over time, making option A the correct and most complete description of an Automated Indicator.

### NEW QUESTION # 32

Breakdown element security is configured in the properties of which object?

- **A. Automated Breakdown**
- B. Breakdown Source
- C. Automated Indicator
- D. Manual Breakdown

**Answer: A**

Explanation:

Breakdown element security determines which users are allowed to see specific breakdown elements (such as certain categories or values) when viewing analytics data. In Platform Analytics, this security is configured directly on the Automated Breakdown record. Automated Breakdowns include properties that allow administrators to define element-level access control, typically by specifying roles that are required to view certain breakdown elements. This ensures sensitive analytics data is only visible to authorized users. The Breakdown Source defines how data is mapped and categorized but does not control visibility. Automated Indicators control score collection and aggregation, not breakdown element security. Manual Breakdowns are static and do not support dynamic element security in the same way.

ServiceNow documentation explicitly states that breakdown element security settings—such as restricting elements by role—are part of the Automated Breakdown configuration, making option D the correct answer.

### NEW QUESTION # 33

Which statements describe the respective Performance Analytics object behavior?

- A. Data collection must be completed before assigning Breakdowns to an Indicator
- **B. The frequency of an Indicator can differ from that of an Indicator Source**
- C. Breakdowns require a Breakdown Mapping to be added to an Automated Indicator
- **D. Indicator Sources with a Monthly frequency can still be collected in a Daily job**

**Answer: B,D**

Explanation:

In ServiceNow Performance Analytics, Indicator Sources and Indicators are distinct objects with different responsibilities, and understanding their behavior is essential for correct architecture and deployment.

Option A is correct.

Indicator Sources define how and when raw data is queried, but they can be reused by multiple data collection jobs. Even if an

Indicator Source is configured with a Monthly frequency, it can still be executed by a Daily data collection job. The job frequency controls execution timing, not the source frequency itself. This reuse is a documented performance optimization in Platform Analytics. Option C is correct.

The Indicator frequency is independent of the Indicator Source frequency. For example, an Indicator Source may collect daily raw data, while the Indicator aggregates and stores scores weekly or monthly. This separation allows flexible aggregation strategies and is explicitly supported by Platform Analytics design.

Option B is incorrect because Breakdowns require a Breakdown Mapping, but they are not inherently tied only to Automated Indicators, nor is this statement describing object behavior accurately in isolation.

Option D is incorrect because Breakdowns can be assigned to an Indicator before or after data collection; they are applied when the next collection runs.

#### NEW QUESTION # 34

When are Additional conditions of an Indicator evaluated during Data Collection?

- A. When the Indicator is viewed in the Analytics Hub
- **B. After the Indicator Source conditions**
- C. Before the Indicator Source conditions
- D. At the same time as the Indicator Source conditions

**Answer: B**

Explanation:

During data collection, Platform Analytics first applies the Indicator Source conditions to retrieve the base dataset. Once the source data is identified, the system then evaluates the Additional conditions defined on the Indicator itself.

This separation allows indicator-specific filtering without duplicating logic in the indicator source, supporting reuse and performance optimization. Additional conditions do not run in parallel with source conditions and are not evaluated at visualization time.

ServiceNow documentation explicitly explains that Indicator conditions refine the dataset after the source query executes, making option D the correct answer.

#### NEW QUESTION # 35

What specifies the base table and field used to uniquely identify elements in a Breakdown Source?

- A. Indicator Configuration and Target Value
- B. Manual Indicator and Scoresheet
- **C. Facts table and Sys ID field**
- D. Related List Conditions and Field Labels

**Answer: C**

Explanation:

A Breakdown Source relies on the Facts table and a unique identifier field (typically the Sys ID) to define how breakdown elements are generated and linked to indicator scores. The Facts table specifies where the breakdown data originates, while the Sys ID field uniquely identifies each breakdown element.

Related list conditions and labels do not define uniqueness. Indicator configuration and targets are unrelated to breakdown structure. Manual indicators and scoresheets are not involved in breakdown sourcing.

ServiceNow documentation clearly states that the Facts table and unique identifier are foundational to Breakdown Source configuration, making option B the correct answer.

#### NEW QUESTION # 36

.....

Obtaining the CIS-PA certificate will make your colleagues and supervisors stand out for you, because it represents CIS-PA your professional skills. At the same time, it will also give you more opportunities for promotion and job-hopping. The CIS-PA latest exam dumps have different classifications for different qualification examinations, which can enable students to choose their own learning mode for themselves according to the actual needs of users. The CIS-PA Exam Question offer a variety of learning modes for users to choose from, which can be used for multiple clients of computers and mobile phones to study online, as well as to print and print data for offline consolidation.
