

# Quiz 2026 Cisco Valid 300-540: Designing and Implementing Cisco Service Provider Cloud Network Infrastructure Actual Tests

2026 Latest PassTestking 300-540 PDF Dumps and 300-540 Exam Engine Free Share: [https://drive.google.com/open?id=1fCz7QF\\_UjjsZbrhuYD968AWv4jos4ufw](https://drive.google.com/open?id=1fCz7QF_UjjsZbrhuYD968AWv4jos4ufw)

PassTestking 300-540 study material also has a timekeeping function that allows you to be cautious and keep your own speed while you are practicing, so as to avoid the situation that you can't finish all the questions during the exam. With Designing and Implementing Cisco Service Provider Cloud Network Infrastructure 300-540 Learning Materials, you only need to spend half your money to get several times better service than others.

As for candidates who will attend the exam, choosing the practicing materials may be a difficult choice. Then just trying 300-540 learning materials of us, with the pass rate is 98.95%, we help the candidates to pass the exam successfully. Many candidates have sent their thanks to us for helping them to pass the exam by using the 300-540 Learning Materials. The reason why we gain popularity in the customers is the high-quality of 300-540 exam dumps. In addition, we provide you with free update for one year after purchasing. Our system will send the latest version to you email address automatically.

## Test Cisco 300-540 Dumps Demo, Exam Questions 300-540 Vce

We will provide 24-hour online service for you on our 300-540 exam questions. If you can't decide what kind of 300-540 exam practice to choose, you shall have a chance to consult us, You can ask the questions that you want to know about our 300-540 Study Guide, we will listen to you carefully, according to your 300-540 exam, we guarantee to meet your requirements without wasting your purchasing funds.

## Cisco 300-540 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• <b>Security:</b> This section of the exam measures the skills of Network Security Engineers and covers the implementation of infrastructure-level protection in cloud and NFVI ecosystems. It includes topics such as ACLs, uRPF, RTBH, router hardening, BGP flowspec, TACACS, and MACSEC. Candidates should understand DoS mitigation methods and apply security practices within NFVI, focusing on API protection, securing the control and management plane, and segmentation strategies in service provider cloud environments. The domain also evaluates basic knowledge of TLS, mTLS, and general cloud security solutions related to DNS protection, zero-day defenses, and malware detection.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Virtualized Architecture:</b> This section of the exam measures the skills of Cloud Network Engineers and covers the foundational concepts of virtualized infrastructures used in modern service provider and cloud environments. Candidates are expected to understand constraints in IaaS designs, determine appropriate cloud service models, and demonstrate awareness of container orchestration compared to traditional virtual machines. The exam also evaluates the ability to implement key virtualization functions such as NFV, VNF, NSO, and virtualized Cisco platforms. Learners must be able to deploy NFV with automation tools, manage VNF onboarding, work with NSO-driven orchestration, and use protocols like NETCONF, RESTCONF, REST APIs, and gNMI within automated cloud ecosystems. A general understanding of supporting platforms such as OpenStack also forms part of the required knowledge in this domain.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>High Availability:</b> This section of the exam measures the skills of Cloud Infrastructure Architects and covers the design and implementation of redundancy and resiliency mechanisms in virtualized network functions and distributed cloud platforms. It includes data plane redundancy for VNFs, high availability within a single VIM control plane, and resilient compute, vNIC, and top-of-rack switching. The exam requires an understanding of multi-homing, EVLAG configurations, virtual private cloud deployment, and ECMP strategies for NFVI integrations with physical routing protocols such as BGP, OSPF, and IS-IS. Candidates must also recommend suitable high-availability models involving DNS, routing, and load balancing.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Service Assurance and Optimization:</b> This section of the exam measures the skills of Cloud Operations Engineers and covers assurance mechanisms used to maintain performance, stability, and visibility across NFVI environments. It includes network assurance concepts such as MANO frameworks, VNF workload monitoring, VIM control plane KPIs, and streaming telemetry with gRPC and gNMI. Candidates must understand cloud infrastructure performance monitoring tools, including SR-PM, NetFlow, IPFIX, syslog, SNMP traps, RMON, cloud agents, and automated fault management systems. The domain also touches on diagnosing NFVI-related errors and optimizing VNFs using techniques such as SR-IOV and software-accelerated virtual switching technologies like DPDK and VPP.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Cloud Interconnect:</b> This section of the exam measures the skills of Service Provider Network Engineers and covers how large networks interconnect with cloud platforms and carrier-neutral facilities. Candidates are expected to understand various connectivity options to cloud providers, customer sites, and other neutral facilities, as well as evaluate WAN connectivity models such as direct connect, MPLS or segment routing, and IPsec VPN links. The domain also includes the ability to troubleshoot advanced data center interconnect solutions, including EVPN VXLAN, EVPN over SR</li> <li>• MPLS, ACI-based connectivity, and pseudowire architectures supporting cloud-to-cloud and cloud-to-edge communication.</li> </ul>

## Cisco Designing and Implementing Cisco Service Provider Cloud Network Infrastructure Sample Questions (Q133-Q138):

### NEW QUESTION # 133

Which statement best describes the difference between IaaS and PaaS?

- A. IaaS is for private deployments only, while PaaS is for public deployments.
- B. There is no significant difference; both offer the same services.
- C. IaaS offers software applications over the internet, while PaaS offers physical hardware rentals.
- **D. IaaS provides virtualized physical hardware, while PaaS provides a platform to develop, run, and manage applications without dealing with the underlying infrastructure.**

**Answer: D**

#### NEW QUESTION # 134

Evaluating WAN infrastructure connectivity, one should consider:

- A. The availability and performance requirements of the application
- B. The scalability and flexibility of MPLS/segment routing
- C. The cost and complexity of IPsec VPNs only
- D. The exclusive use of Direct Connect for all scenarios

**Answer: A**

#### NEW QUESTION # 135

VNF workload optimization often involves:

- A. Decreasing virtualization
- B. Ignoring software acceleration
- C. Utilizing technologies like SR-IOV for performance
- D. Increasing physical network functions

**Answer: C**

#### NEW QUESTION # 136

Secure NFVI control and management plane involves:

- A. Public internet access
- B. Authentication and encryption
- C. Removing all passwords
- D. Unrestricted API access

**Answer: B**

#### NEW QUESTION # 137

Which of the following are connectivity options to cloud providers from carrier-neutral facilities?

- A. Public internet
- B. Dial-up access
- C. Direct connect
- D. Dedicated leased lines

**Answer: C,D**

#### NEW QUESTION # 138

.....

The online version of 300-540 study materials are based on web browser usage design and can be used by any browser device. The first time you open 300-540 study materials on the Internet, you can use it offline next time. 300-540 study materials do not need to be used in a Wi-Fi environment, and it will not consume your traffic costs. You can practice with 300-540 study materials at anytime, anywhere. On the other hand, the online version has a timed and simulated exam function. You can adjust the speed and keep vigilant by setting a timer for the simulation test. At the same time online version of 300-540 Study Materials also provides online error correction—Through the statistical reporting function, it will help you find the weak links and deal with them. Of course, you can also choose two other versions. The contents of the three different versions of 300-540 study materials are the same and all of them are not limited to the number of people/devices used at the same time.
