## Manager Braindumps

A TestPassKing support team is on hand to help Construction-Manager exam applicants use the CMAA Construction-Manager practice tests and address any problems. The goal is to help candidates crack the Construction-Manager exam in one go. Free CMAA Construction-Manager demo and up to 1 year of free CMAA Construction-Manager Questions are also available at TestPassKing. So, start preparation with real Certified Construction Manager (CCM) (Construction-Manager) questions right away if you wish to pass the test while saving time and money.

### CMAA Certified Construction Manager (CCM) Sample Questions (Q43-Q48):

#### NEW QUESTION # 43

A CM's responsibility for safety on the jobsite includes

- A. drafting the contractor's safety plan.
- B. certifying subcontractor compliance.
- C. no obligation for safety as it is the contractor's responsibility.
- D. a professional obligation shared with others.

#### Answer: D

Explanation:

The CMAA Standards of Practice (Chapter 7 - Safety Management) states:

"While the contractor has primary responsibility for implementing and enforcing the safety program, the Construction Manager bears a professional and ethical obligation to monitor, coordinate, and promote a safe working environment." CMAA also clarifies that the CM is not responsible for enforcing the contractor's safety plan or certifying compliance, but must:

Verify that required safety plans and documentation are submitted.

Participate in safety meetings and hazard analyses.

Advise the owner of unsafe conditions or practices.

This represents a shared professional responsibility, ensuring that all parties collaborate toward a safe jobsite without overlapping legal authority.

Therefore, the correct answer is B. a professional obligation shared with others.

References:

CMAA Construction Management Standards of Practice, Chapter 7 - Safety Management, Sections: "Roles and Responsibilities" and "CM's Safety Oversight Duties." CMAA CM Study Guide, Safety Management Domain, Objective 7.1: "Understand and uphold CM's professional safety responsibilities."

#### NEW QUESTION # 44

As the owner's representative, you are providing on-site construction management services to a municipality for their new design-build city hall project.

The mechanical subcontractor discovers that his ductwork will not fit in the above-ceiling area of the Mayor's office. Which entity is best-suited to resolve this risk?

- A. Owner's rep
- B. Architect (DOR)
- C. Owner (Municipality)
- D. Design-Build Team

#### Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

According to the CMAA Construction Management Standards of Practice (SOP) under Chapter 9 - Risk Management, responsibility for resolving design and construction coordination risks lies with the entity that holds contractual control over both the design and construction portions of the project. In a Design-Build (D-B) delivery method, that entity is the Design-Build Team.

The CMAA specifies:

"Under the Design-Build delivery method, the design-builder assumes single-point responsibility for both design and construction. The design-builder manages coordination among subcontractors, suppliers, and design professionals to ensure that design solutions are constructible and that conflicts are resolved without direct owner intervention." In this case, the mechanical ductwork conflict in

the above-ceiling space is a design coordination issue, involving both architectural and mechanical design elements. Because the Design-Build Team is contractually responsible for integrating the design and ensuring constructability, it must identify and resolve such conflicts.

The CM as the owner's representative may monitor the issue, document its resolution, and advise the owner, but does not have the contractual authority to direct design or construction corrections. Likewise, the Architect (DOR) in a D-B contract works under the design-builder, not directly for the owner, so they are not the final authority to resolve this type of issue.

Therefore, the entity best-suited to resolve this risk is the Design-Build Team.

#### NEW QUESTION # 45

A CM is milling and paving a 2-mile-long bridge with a surface that is in total failure. The owner gave the contractor October 24 as the fixed completion date. Meanwhile, the owner has promised the public that work hours would be 7am-7pm, 5 days per week and that the bridge would be completed by September 1.

The bridge deck is poured on a steel grid deck, but this type of operation has never been performed in the state and complications from weather have slowed progress. The contractor has requested to work nonstop 24/7 to meet the deadline told to the public.

The CM should

- A. discuss with the owner and tell the contractor to do only 1/2 of the bridge.
- B. tell the contractor they have until September 1 and can only work 7am-7pm.
- **C. meet with the owner and contractor to vet all issues/options and make a decision.**
- D. meet with the contractor to go over realistic time frames and make a decision.

#### Answer: C

Explanation:

According to the CMAA Standards of Practice (SOP), under Chapter 2 - Project Management and Chapter 5 - Time Management, the Construction Manager serves as the owner's principal advisor and coordinator, ensuring that scope, schedule, quality, and safety are properly balanced.

CMAA defines the CM's role in conflict resolution as:

"The Construction Manager must identify issues impacting schedule, quality, and safety and facilitate discussions among project participants to develop an acceptable course of action that aligns with the owner's objectives and contractual limitations." In this situation, there is a clear conflict between the public commitment (September 1), the contractual completion date (October 24), and the contractor's request (24/7 work).

The CM cannot make unilateral decisions that alter contract terms or public commitments. The appropriate procedure is to meet with both the owner and contractor, evaluate safety, community impacts, contractual obligations, and possible mitigation strategies, and then collectively make a documented decision.

Therefore, the correct answer is C. meet with the owner and contractor to vet all issues/options and make a decision.

#### NEW QUESTION # 46

In what decade was the new occupation of "construction manager" created to fulfill an identified need?

- A. 1950s
- B. 1930s
- C. 1980s
- **D. 1970s**

#### Answer: D

Explanation:

The Construction Management Association of America (CMAA) identifies the 1970s as the decade when the professional discipline of Construction Management (CM) formally emerged in the United States.

The CMAA's historical overview explains:

"Construction Management became recognized as a distinct professional service in the 1970s, when owners began seeking specialized expertise to manage increasingly complex design and construction projects." During this period, large public and private sector projects required oversight separate from design and contracting roles, leading to the development of the CM profession and eventually to the founding of CMAA in 1982.

#### NEW QUESTION # 47

ACM agent has assisted the owner by creating contractual safety requirements. By reviewing the contractor's safety submittals, the CM

- A. determines if the contract specifications have been met.
- B. accepts responsibility and liability for site safety.
- C. certifies that the submittals cover all site conditions that may occur.
- D. approves the contractors fall protection program.

**Answer: A**

Explanation:

TheCMAA Standards of Practice, Chapter 7 - Safety Managementstates that the Construction Manager's role in reviewing safety submittals is limited to ensuring that the contractor's safety program complies with the contractual and regulatory requirements, not to certify or approve safety programs.

CMAA clarifies:

"The Construction Manager's review of safety submittals is for the purpose of verifying that the contractor's plan meets the requirements set forth in the contract documents. The CM does not assume or accept responsibility for site safety." Therefore, the CM's duty is review and determination of contractual compliance, not approval or certification, and certainly not assumption of liability.
