The platform includes a range of tools and services such as data integration, process automation, and user interface design. The OmniStudio-Developer Certification is an essential requirement for professionals who work with the platform and want to prove their expertise.

Salesforce Certified OmniStudio Developer Sample Questions (Q85-Q90):

NEW QUESTION # 85

A developer needs to display read-only contact information in a OmniScript. The developer will format the information as a table, using merge codes to dynamically include first name, last name, street address, state, postal, code, and country from the data JSON. Which OmniScript element should the developer use to meet this requirement?

- A. Text Block
- B. Edit Block
- C. Text area
- D. Rich text Area

Answer: A

NEW QUESTION # 86

A developer needs to change some field labels on a FlexCard. The FlexCard is currently deployed to production. The developer that the best course of action is to version the FlexCard rather than cloning it.

Which factor would lead the developer to this decision?

- A. The new version of the FlexCard will be used in a new Console, and the current version of the FlexCard should remain unchanged.
- B. Another team member is developing new action, fields and styling for the current version of the FlexCard.
- C. All instance of the FlexCard must be updated with the changes.
- D. The new and current versions will be displayed together on the same target.

Answer: A

NEW QUESTION # 87

A developer creates a Flexcard that displays a contact's mailing address and passes the contact's postal code to a child FlexCard. When configuration text elements in the child FlexCard, what syntax should a developer use to refer to the contact's postal code?

- A. {Records.postalcode}
- B. {Parent.postalcode}
- C. {Postalcode}
- D. {Params.postalcode}

Answer: B

NEW QUESTION # 88

You want to build a DataRaptor Transform to send product pricing to a Calculation Procedure.

```

```

Given the JSON Output below, which mapping in your Transform would be correct for the Output JSON Path for the Base Price?

- A. Input-Base Price
- B. Input BasePrice
- C. Input.baseprice
- D. Input:BasePrice

Answer: D

NEW QUESTION # 89

An integration procedure contains a Remote Action element that calls a method of an APEX class. The method requires two fields are input: Account id and Product Id. The integration Procedure data JSON contains the following nodes:

How should the Remote Action element be configured to pass the data correctly to the method?

- A. Set Return Only Additional Output to true, and add the following Key/Value pairs to additional input.
- B. Check the Send Only Additional Input checkbox, and the following/ value pairs to Additional input:
- C. Add the following to Send JSON Path: accountId: %Accountd% ProductId% Details Products%
- D. Check the DataRaptor Transform checkbox, and add the following Key/Value pairs to Output JSON Path:

Answer: B

Explanation:

Checking the Send Only Additional Input checkbox allows the Remote Action element to send only the key/value pairs specified in Additional input to the Apex method. The Additional input should have the same keys as the method parameters, and the values should be set to `{{InputData.node}}` for each node. For example, `AccountId: {{InputData.AccountId}}` and `ProductId: {{InputData.Details.Products}}`.
