SAP C_WME_2506 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Getting Started with Building WalkMe Solutions: This section of the exam evaluates the capabilities of WalkMe implementers and focuses on the practical aspects of creating and configuring WalkMe solutions. It includes understanding the WalkMe Editor, planning solution flows, creating Smart Walk-Thrus, Launchers, and ShoutOuts, and managing end-user guidance effectively. Candidates should be comfortable building initial WalkMe experiences that improve SAP usability and provide contextual help for users navigating SAP applications.
Thema 2	Starting your Digital Adoption Journey: WalkMe Fundamentals: This section of the exam measures the skills of SAP project managers and covers the foundational concepts of digital adoption within SAP environments using WalkMe. Candidates are expected to understand the value of digital adoption platforms, the basic components of WalkMe, and how these tools align with business goals. The section emphasizes knowledge of the user experience within SAP and the ability to identify opportunities for improving digital workflows through in-app guidance and automation.
Thema 3	Advancing your Skills in Building WalkMe Solutions: This section of the exam tests the advanced competencies of functional and business analysts in designing more complex and customized WalkMe solutions within SAP platforms. It requires a deeper understanding of user segmentation, advanced rules and triggers, performance optimization, and the use of analytics to refine user experiences. Candidates are expected to demonstrate their ability to design scalable and impactful guidance that aligns with SAP business processes and drives user adoption across the enterprise.

SAP Certified Associate - WalkMe Digital Adoption Consultant C_WME_2506 Prüfungsfragen mit Lösungen (Q13-Q18):

13. Frage

You are working on a Smart Walk-Thru step for which there are two buttons a user could click to move forward in the process. After they click either button, the remainder of the process is the same. Which option below is the best way to address this?

- A. Create a Split Step.
- B. Use a SmartTip to let the users know they can click either button for the flow to continue.
- **C. Add a Custom Trigger with multiple conditions.**
- D. Add a Peer Step.

Antwort: C

Begründung:

In a Smart Walk-Thru, a Custom Trigger allows Builders to define specific conditions or actions that advance the flow, including scenarios where multiple user actions (e.g., clicking either of two buttons) should trigger the same next step. By configuring a Custom Trigger with multiple conditions (e.g., "Button A is clicked OR Button B is clicked"), the Smart Walk-Thru can seamlessly proceed when either button is selected, without requiring separate branches or additional steps. This is the most efficient and scalable solution for handling multiple valid user actions in a single step.

The other options are less suitable:

* A SmartTip provides guidance or validation but cannot control the flow of a Smart Walk-Thru or handle multiple triggers.

* A Peer Step is used for steps that occur simultaneously, not for handling alternative user actions.

* A Split Step creates separate branches in the flow, which is unnecessary here since the remainder of the process is the same after either button is clicked.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.2: Smart Walk-Thrus):

"Custom Triggers allow Builders to define complex conditions for advancing a Smart Walk-Thru step, such as multiple user actions (e.g., clicking one of several buttons). This ensures flexibility in handling varied user interactions within a single step." The course Advancing Your Skills in Building WalkMe Solutions states:

"When users can take multiple actions to achieve the same outcome in a Smart Walk-Thru, configure a Custom Trigger with OR conditions to capture all valid actions, avoiding the need for redundant steps or splits." Option A, "Add a Custom Trigger with multiple conditions," is the best approach for this scenario.

14. Frage

Your company has a reporting page with features that have always been available. They recently added the ability for users to create their own reports. Not everyone uses the reporting tools, but they want to announce the new report creation feature for those who do use it. They will use a ShoutOut for this and only want to show it to users who use the tool.

Under the ShoutOut's engagement tab, which auto-play option would be best?

- A. Play once a day
- B. Off (activate via a Launcher)
- **C. Play according to a rule**
- D. Auto-play

Antwort: C

15. Frage

You just published WalkMe content from your Editor for the first time. When you refresh your web page, you do not see any of the content. Which of the options could you check? Note: There are 3 correct answers to this question.

- A. Investigate whether any Segmentation rules are configured incorrectly.
- B. Reinstall the WalkMe Editor on your computer.
- C. Switch from Build Mode to Play Mode in the Editor.
- D. Confirm WalkMe is deployed to the environment.
- E. Confirm that you added categories to the WalkMe Menu.

Antwort: A,C,D

Begründung:

If WalkMe content does not appear after publishing, several potential issues should be checked:

- * Confirm WalkMe is deployed to the environment(A): Ensure the WalkMe snippet or extension is correctly installed in the Production environment, as missing deployment prevents content from loading.
- * Investigate whether any Segmentation rules are configured incorrectly(B): Incorrect or overly restrictive Segmentation rules may exclude the user from seeing the content.
- * Switch from Build Mode to Play Mode in the Editor(C): In Build Mode, content is previewed but not fully rendered; switching to Play Mode simulates the end-user experience to verify visibility.

The other options are incorrect:

- * Reinstall the WalkMe Editor(D) is unnecessary, as the Editor is for building, not rendering content.
- * Confirm categories in the WalkMe Menu(E) is irrelevant unless the content is Menu-specific, which isn't indicated.

Extract from Official WalkMe Documentation:

Per the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 1.10:

Publishing and Troubleshooting):

"If content doesn't appear after publishing, verify deployment to the environment, check Segmentation rules for errors, and ensure you're in Play Mode to test the end-user view." The course Getting Started with Building WalkMe Solutions advises:

"Common reasons for missing content include missing deployment, incorrect Segmentation, or remaining in Build Mode. Address these first when troubleshooting." Options A, B, and C are the correct checks.

16. Frage

You have created a Smart Walk-Thru to guide users creating a new department on a site. Depending on which option users select from a dropdown at one step in the process, they may need to complete a few additional items before moving forward. Which WalkMe feature could help address this alternate path in a Smart Walk-Thru?

- A. Start Point
- B. Wait For Condition
- C. Popup Step
- D. Split

Antwort: D

17. Frage

Why is it recommended to disable the the multi-language Manual Toggle when using the multi-language Auto-Toggle?

- A. To ensure that the Manual Toggle is only available for administrators
- B. Because the Manual Toggle and Auto-Toggle can cause the page to refresh unexpectedly
- C. To prevent conflicts where the user's Manual Toggle choice overrides the Auto-Toggle settings
- D. Because Manual Toggle consumes more resources than Auto-Toggle

Antwort: C
