楽な気持ちでOracleの1Z0-771試験に合格したい？ It-PassportsのOracleの1Z0-771問題集は良い選択になるかもしれません。It-PassportsのOracleの1Z0-771問題集は君には必要な試験内容と答えを含まれます。君は最も早い時間で試験に関する重点を身につけられますし、一回だけでテストに合格できるように、職業技能を増強られる。君は成功の道にもっと近くなります。

Oracle 1Z0-771 認定試験の出題範囲：

トピック	出題範囲
トピック 1	Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.
トピック 2	Creating and Using Forms: This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.
トピック 3	Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.
トピック 4	Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.

トピック 5	• Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.
トピック 6	• Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.
トピック 7	• Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.
トピック 8	• Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.
トピック 9	• Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.
トピック 10	• Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.
トピック 11	• Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.
トピック 12	• Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.

1Z0-771トレーニング学習、1Z0-771模擬試験最新版

1Z0-771認定試験の資格を取得するのは容易ではないことは、すべてのIT職員がよくわかっています。しかし、1Z0-771認定試験を受けて資格を得ることは自分の技能を高めてよりよく自分の価値を証明する良い方法ですから、選択しなければならなりません。ところで、受験生の皆さんを簡単にIT認定試験に合格させられる方法がないですか。もちろんありますよ。It-Passportsの問題集を利用することは正にその最良の方法です。It-Passportsはあなたが必要とするすべての1Z0-771参考資料を持っていますから、きっとあなたのニーズを満たすことができます。It-Passportsのウェブサイトに行ってもっとたくさんの情報をブラウズして、あなたがほしい試験1Z0-771参考書を見つけてください。

Oracle APEX Cloud Developer Professional 認定 1Z0-771 試験問題 (Q52-Q57):

質問 # 52

You must use a Static Content region type to display messages about the employee of the month. Which text, when placed in this region, will display the message correctly?

- A. Join me in congratulating V('P1_ENAME') as the new employee of the month!
- B. Join me in congratulating & P1_ENAME. as the new employee of the month!
- **C. Join me in congratulating: &P1_ENAME. as the new employee of the month!**
- D. Join me in congratulating: P1_ENAME as the new employee of the month!

正解: C

解説:

Static Content regions display fixed text with substitution:

B . &P1_ENAME.: The &ITEM_NAME. syntax substitutes the value of P1_ENAME at runtime (e.g., "Join me in congratulating John as..."), correctly rendering the item's value. The dot ensures proper parsing.

A . P1_ENAME: Treated as literal text, not substituted.

C . V('P1_ENAME'): A PL/SQL function, invalid in static content; it's for server-side code.

D . & P1_ENAME.: Space before P1_ENAME breaks substitution syntax.

Pitfall: Ensure P1_ENAME is populated (e.g., via a page process) to avoid blank output.

質問 #53

Which two Plugin types can be created in Oracle APEX?

- A. Validation
- B. Email Template
- C. Process
- D. Region

正解: C、D

解説:

Plugins extend APEX's functionality beyond built-in components:

C . Process: A Process plugin executes custom server-side logic (e.g., PL/SQL) during page processing or AJAX calls. Example: A plugin to sync data with an external API after form submission. It's defined with execution points and parameters.

D . Region: A Region plugin creates custom UI areas (e.g., a dynamic chart or carousel). Example: A plugin rendering a custom dashboard. It supports attributes, templates, and refresh events.

A . Validation: While validations are customizable, they're not a plugin type; they're declarative or PL/SQL-based within APEX.

B . Email Template: Email formatting is handled via APEX_MAIL or templates in Shared Components, not as plugins.

Technical Insight: Plugins are created in Shared Components > Plug-ins, requiring PL/SQL for logic, JavaScript/CSS for UI, and a render function. For instance, a Region plugin might use apex_plugin.t_region to define its output.

Use Case: A Process plugin to log audit trails or a Region plugin for a unique data visualization.

Pitfall: Developing plugins requires advanced skills; test thoroughly to avoid runtime errors.

質問 #54

Which statement is true about Theme Styles in Oracle APEX?

- A. The "Is Current" attribute of a Theme Style depends on the "Read Only" attribute.
- B. When the Is Public attribute is enabled, end users can choose the Theme Style from the runtime environment.
- C. Theme Styles control the layout of a webpage.

正解: B

解説:

Theme Styles define visual aspects (e.g., colors, fonts) in APEX:

B . When the Is Public attribute is enabled: Setting "Is Public" to "Yes" allows end users to select from available Theme Styles at runtime (e.g., via a UI switcher), enhancing customization.

A . Control the layout: False; layout is managed by templates and regions, not Theme Styles, which focus on aesthetics.

C . "Is Current" depends on "Read Only": False; "Is Current" marks the active style, independent of "Read Only" (which locks editing).

Practical note: Public styles require multiple defined styles in Shared Components.

質問 #55

In your application, you want to display data in a searchable, customizable report that supports inline editing at runtime using the mouse or keyboard. Which report type will you create?

- A. Interactive Grid
- B. Classic Report

- C. Smart Filters
- D. Interactive Report

正解: A

解説:

An Interactive Grid is the report type that supports searchable, customizable data display with inline editing at runtime using mouse or keyboard. Interactive Reports are searchable and customizable but lack inline editing. Classic Reports are static, and Smart Filters is a component, not a report type.

質問 #56

You need to ensure that "How may I help you today?" is the first message displayed by the AI assistant. Which attribute of the Show AI Assistant Dynamic Action should be configured in the Property Editor to achieve this?

- A. AI Assistant Name
- B. Initial Prompt
- C. Welcome Message

正解: C

解説:

The Show AI Assistant Dynamic Action in Oracle APEX triggers the display of the AI Assistant interface. To customize the first message users see:

Welcome Message: This attribute in the Property Editor defines the initial text displayed when the AI Assistant appears. Setting it to "How may I help you today?" ensures this exact phrase greets users, enhancing user experience by setting a friendly tone. It's a static, developer-defined string, distinct from AI-generated responses.

Initial Prompt: This attribute defines the starting input or context sent to the AI model, not the visible message shown to users. It's typically hidden and used to guide the AI's behavior (e.g., "Act as a support agent").

AI Assistant Name: This sets the assistant's identity (e.g., "Alex"), displayed in the UI, but it's not the greeting message.

This configuration is critical for branding or guiding user interaction from the outset, and it's adjustable per dynamic action instance, offering flexibility across pages.

質問 #57

.....

1Z0-771試験ガイドのバージョンは、学習レベルと条件が異なるすべての学習者に適合するように継続的に改善されています。クライアントは、携帯電話、ラップトップ、タブレットコンピューターなどの電子機器で、1Z0-771試験ガイドのAPP /オンラインテストエンジンを使用できます。アフターサービスは非常に配慮されており、クライアントは1Z0-771クイズ教材の価格と機能についてオンラインカスタマーサービスに相談できます。そのため、1Z0-771認定ファイルは完璧に近いものであり、クライアントが使用した後の大きな驚きです。
