Latest UiPath-ADAv1 Exam Questions | Test UiPath-ADAv1 Testking

Our company sells three kinds of UiPath-ADAv1 guide torrent online whose contents are definitely same as each other. The PDF

format of UiPath-ADAv1 exam torrent is easy to download, prints, and browse learning, which can be printed on paper and can make notes anytime. SOFT/PC test engine of UiPath-ADAv1 Exam applies to Windows system computers. It can simulate the real operation test environment. App/online test engine of the UiPath-ADAv1 guide torrent can be used on all kinds of electronic devices.

UiPath Automation Developer Associate v1 Exam Sample Questions (Q134-Q139):

NEW QUESTION # 134

What is the ServiceNow Store?

- A. Alternate name for the ServiceNow Developer Share site
- **B. Marketplace for free and paid certified ServiceNow applications and integrations**
- C. The source for ServiceNow Community-created developer content
- D. Downloadable content ServiceNow script archive

Answer: B

Explanation:

Comprehensive and Detailed Explanation:

The ServiceNow Store is a marketplace where users can download and install applications and integrations that extend the functionality of ServiceNow.

Option C (Correct): Marketplace for free and paid certified ServiceNow applications and integrations.

* It provides ServiceNow-certified applications that are tested for compatibility.

* Users can find solutions from ServiceNow partners and third-party vendors.

Option A (Incorrect):

* The ServiceNow Store is not just a script archive. It contains full applications, integrations, and plugins.

Option B (Incorrect):

* Community-created content is shared on the ServiceNow Community site, not the Store.

Option D (Incorrect):

* The Developer Share site was an old platform for sharing ServiceNow scripts and solutions. The ServiceNow Store is not a replacement for it.

* ServiceNow Documentation: ServiceNow Store

NEW QUESTION # 135

A developer is building an automation that must interact with a destination remote computer reached by jumping through multiple RDP connections, as described by the following scenario:

- The Robot is installed on Machine A, which connects through RDP to Machine B.

- From Machine B another RDP connection is opened to Machine C, where the automation must be performed.

Which of the following scenarios is appropriate for the developer who wants to use UI Automation activities?

- A. UI Automation can be used and the following are prerequisites:
Machine A - no requirement.
Machine B - no requirement.
Machine C - install RemoteRuntime.msi.
- B. UI Automation can be used and the following are prerequisites:
Machine A - install RDP extension.
Machine B - no requirement.
Machine C - install RemoteRuntime.msi.
- **C. UI Automation can be used and the following are prerequisites:
Machine A - install RDP extension.
Machine B - install RDP extension and RemoteRuntime.msi.
Machine C - install RemoteRuntime.msi.**
- D. UI Automation can be used and the following are prerequisites:
Machine A - install RDP extension.
Machine B - install RemoteRuntime.msi.
Machine C - install RemoteRuntime.msi.

Answer: C

Explanation:

UI Automation is a feature that enables you to automate the interaction with UI elements on remote machines using native selectors. To use UI Automation in a scenario where multiple RDP connections are involved, you need to install the UiPath Windows Remote Desktop extension on the client machines and the UiPath Remote Runtime component on the destination machine. The extension allows you to identify UI elements on the remote desktop and send keyboard and mouse events to them. The Remote Runtime component enables the communication between the extension and the UiPath Robot service. In this case, Machine A and Machine B are client machines, while Machine C is the destination machine. Therefore, you need to install the RDP extension on Machine A and Machine B, and the Remote Runtime component on Machine C. (UiPath Studio documentation1)

NEW QUESTION # 136

Which variable field is optional when creating a variable, in UiPath Studio?

- A. Scope
- **B. Default**
- C. Name
- D. Variable type

Answer: B

NEW QUESTION # 137

Upon extracting data from a website, a developer saves it in three variables: "FirstName", "LastName", and "City". The developer intends to store these three String variables in a fixed-size data structure called "UserData", to be utilized later within another workflow in the process.

Considering best practices, which data structure and assignment should be used?

- **A. UserData is of type String[]**
`UserData = {FirstName, LastName, City}`
- B. UserData is of type List<String>
`UserData = New List(Of String) ({ FirstName, LastName, City })`
- C. UserData is of type Object[]
`UserData = {FirstName, LastName, City}`
- D. UserData is of type List<Object>
`UserData = New List(Of Object) ({ FirstName, LastName, City })`

Answer: A

Explanation:

Explanation

This is the best option because it meets the requirements of storing three String variables in a fixed-size data structure. A String[] is an array of String values, which can be initialized with a fixed size and assigned with a set of values using curly braces. An array is a simple and efficient data structure that can store multiple values of the same type and access them by index. A List is another data structure that can store multiple values, but it is not fixed-size and it requires creating a new instance using the New keyword. An Object is a generic type that can store any kind of value, but it is not recommended to use it for specific types like String, as it may cause type conversion errors or performance issues. Therefore, option D is the best choice for storing the three String variables in a fixed-size data structure called UserData. NEW QUESTION # 138

At indication time, the Strict Selector has the following functionalities available:

- A. Open in UiExplorer, Copy to clipboard, Show all matches.
- **B. Accuracy, Open in UiExplorer, Copy to clipboard, Show all matches.**
- C. Ignore text, Copy to clipboard, Show all matches.
- D. Refresh, Open in UiExplorer, Copy to clipboard.

Answer: B

Explanation:

Explanation

The Strict Selector option allows you to fine-tune the selector by adjusting the accuracy level and showing all the matches in the UI Explorer. The other options are not available at indication time.
