And MuleSoft Certified Developer - Level 1 (Mule 4) MCD-Level-1 price is benefit!

MuleSoft Certified Developer - Level 1 (Mule 4) Sample Questions (Q141-Q146):

NEW QUESTION # 141

Refer to the exhibits. Client sends the request to ClientRequestFlow which calls ShippingFlow using HTTP Request activity.

During E2E testing it is found that that HTTP:METHODOF_NOT_ALLOWED error is thrown whenever client sends request to this flow.

What attribute you would change in ClientRequestFlow to make this implementation work successfully?

□

- A. Change the path attribute value to "/api/ship"
- B. Change the protocol attribute value to "HTTPS"
- C. Change the allowed method attributes value to "POST"
- D. Change the method attribute value to "*"

Answer: C

Explanation:

Correct answer is Change the method attributes value to "POST".

It can be fixed in either of the two ways as below.

1) Changing method attribute to POST in ClientRequestFlow

2) Setting allowedMethods as PUT in ShippingFlow (but doesn't fit as question mentions about changing ClientRequestFlow)

NEW QUESTION # 142

Refer

to the exhibits. A web client submits a request to http://localhost:8081/flights?destination=SFO and the Web Service Consumer throws a WSC:BAD_REQUEST error.

What is the next step to fix this error?

□

- A. set a property in the Consume operation equal to the destination query parameter
- B. set a SOAP payload before the Consume operation that contains the destination query parameter
- C. set a JSON payload before the Consume operation that contains the destination query parameter
- D. Set a header in the Consume operation equal to the destination query parameter

Answer: B

NEW QUESTION # 143

An API specification is designed using RAML. What is the next step to create a REST Connector from this API specification?

- A. Add the specification to a Mule project's src/main/resources/api folder
- B. Implement the API specification using flow designer in Design Center
- C. Publish the API specification to Any point Exchange
- D. Download the API specification and build the interface using APIkit

Answer: C

NEW QUESTION # 144

Refer to the exhibits.

□

The mule application is debugged in Anypoint Studio and stops at the breakpoint as shown in below exhibit.

What is the value of the payload displayed in the debugger at this breakpoint?

- A. Start
- B. Finished
- C. Process
- D. Payload is always empty at the breakpoint

Answer: A

Explanation:

Correct answer is Start as that is the payload set before

NEW QUESTION # 145

Refer to the exhibits.

The Batch Job scope processes the array of strings

After the Batch Job scope completes processing the input payload what information is logged by the Logger component?

A)

B)

C)

D)

- A. Option C
- B. Option B
- C. Option D
- D. Option A

Answer: A

NEW QUESTION # 146

.....

If you want to use our MCD-Level-1 simulating exam on your phone at any time, then APP version is your best choice as long as you have browsers on your phone. Of course, some candidates hope that they can experience the feeling of exam when they use the MCD-Level-1 learning engine every day. Then our PC version of our MCD-Level-1 Exam Questions can fully meet their needs only if their computers are equipped with windows system. As we face with phones and computers everyday, these two versions are really good.
