H35-211_V2.5 New Dumps | Valid H35-211_V2.5 Test Blueprint

Just like the old saying goes, there is no royal road to success, and only those who do not dread the fatiguing climb of gaining its numinous summits. In a similar way, there is no smoothly paved road to the H35-211_V2.5 certification. You have to work on it and get started from now. If you want to gain the related certification, it is very necessary that you are bound to spend some time on carefully preparing for the H35-211_V2.5 Exam, including choosing the convenient and practical study materials, sticking to study and keep an optimistic attitude and so on.

Huawei H35-211_V2.5 (HCIP-Access V2.5) Certification Exam is a professional-level certification exam offered by Huawei, a leading global provider of information and communication technology (ICT) infrastructure and smart devices. HCIP-Access V2.5 certification is designed to validate the knowledge and skills of IT professionals who are responsible for designing, deploying, and maintaining access networks based on Huawei's access products and solutions.

Valid H35-211_V2.5 Test Blueprint | Latest H35-211_V2.5 Real Test

The H35-211_V2.5 study materials from our company are compiled by a lot of excellent experts and professors in the field. In order to help all customers pass the exam in a short time, these excellent experts and professors tried their best to design the study version, which is very convenient for a lot of people who are preparing for the H35-211_V2.5 Exam. You can find all the study materials about the exam by the study version from our company.

Huawei HCIP-Access V2.5 Sample Questions (Q111-Q116):

NEW QUESTION # 111
Which of the following is not a prerequisite for the eSight to automatically discover OLTs and MxUs using IP addresses?

- A. The eSight and devices can communicate with each other (ping each other).
- B. The eSight and devices must be on the same network segment. Otherwise, the ARP broadcast protocol cannot be used to discover devices.
- C. You have the permission to access resources.
- D. SNMP parameters have been set on eSight and are consistent with SNMP parameters on devices.

Answer: B

Explanation:
For IP-based discovery, eSight relies on Layer-3 reachability and SNMP/ICMP. Being on the same subnet is not required; that condition applies to broadcast/ARP discovery. Required conditions include proper permissions, IP connectivity, and aligned SNMP parameters.

NEW QUESTION # 112
(Single choice) The following statement about defending MAC Spoofing is wrong:

- A. After the Anti-MAC-Spoofing function is enabled, the system automatically implements dynamic binding of the MAC address to the service flow
- B. Turning off the Anti-MAC-Spoofing function can only remove the fixed table items, which does not affect the user's service application, but the service forwarding plane will be interrupted
- C. After enabling the Anti-MAC-Spoofing function, for IPoE users using fixed IP, the user needs to be statically configured
- D. MAC Anti-MAC-Spoofing features are mutually exclusive with WMAC, SC, PPPoE-SMAC features at the VLAN level

Answer: B

Explanation:
Huawei Anti-MAC-Spoofing binds the source MAC to the service flow/port to prevent address forgery. It is functionally exclusive with certain per-VLAN MAC check features (e.g., WMAC, SC, PPPoe-SMAC) to avoid conflicting validation logic. For IPoE users with fixed IP, operators typically configure static bindings
/entries so that address and access policies remain consistent.
Option D is wrong: disabling Anti-MAC-Spoofing and removing fixed entries can affect service behavior; if forwarding is interrupted, that does impact user service-so the statement is self-contradictory and incorrect.
References: HCIP-Access V2.5 Study Guide (User Security & Anti-Spoofing); Huawei OLT Feature Guide (Anti-MAC-Spoofing Principles, Bindings, and Feature Interactions).

NEW QUESTION # 113
On Network Cloud Engine (NCE), both manual dump and automatic dump allow you to dump the performance data that meets the criteria to a file on the local disk.

- A. TRUE
- B. FALSE

Answer: A

Explanation:
NCE supports on-demand (manual) and policy-driven (automatic) performance data dumps. In both modes, data filtered by configured criteria is exported to files stored locally on the NCE server for subsequent analysis or archiving.

NEW QUESTION # 114
After anti-DoS attack is configured, the system periodically checks all the user ports on the board. If the system detects attacks for multiple consecutive times, the system adds the corresponding port to the blacklist and waits for a random period before a new round of detection to determine whether to remove the port from the blacklist.

- A. TRUE
- B. FALSE

Answer: A

NEW QUESTION # 115
Multicast technology effectively solves the problem of single-point transmission and multipoint reception, and
realizes efficient data transmission from midpoint to multipoint in IP network.

- A. wrong
- B. Right

Answer: B

NEW QUESTION # 116

......

PassTestking has collected the frequent-tested knowledge into our H35-211_V2.5 practice materials for your reference according to our experts' years of diligent work. So our H35-211_V2.5 exam materials are triumph of their endeavor. By resorting to our H35-211_V2.5 practice materials, we can absolutely reap more than you have imagined before. We have clear data collected from customers who chose our H35-211_V2.5 training engine, the passing rate is 98-100 percent. So your chance of getting success will be increased greatly by our H35-211_V2.5 exam questions.
