## **AZ-305 Learning Materials & AZ-305 Study guide & AZ-305 Reliable Dumps**

Our content and design of the AZ-305 exam questions have laid a good reputation for us. Our users are willing to volunteer for us. You can imagine this is a great set of AZ-305 learning guide! Next, I will introduce you to the most representative advantages of AZ-305 Real Exam. You can think about whether these advantages are what you need! First, we have high pass rate as 98% to 100% which is unique in the market. Secondly, the price of the AZ-305 study materials is favourable.

Microsoft AZ-305 Exam is suitable for professionals who have some experience in designing and implementing Azure solutions. Designing Microsoft Azure Infrastructure Solutions certification exam is ideal for those who want to demonstrate their expertise in

implementing and managing cloud solutions, and it can help them advance their careers in the field of cloud technology.

The Microsoft AZ-305 Exam covers a wide range of topics, including designing and implementing Azure compute solutions, storage solutions, networking solutions, and security solutions. Candidates are expected to have a solid understanding of Azure services and their features, as well as the ability to design and implement solutions that meet specific business requirements.

## Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q97-Q102):

### NEW QUESTION # 97

You need to recommend an Azure Storage Account configuration for two applications named Application1 and Applications. The configuration must meet the following requirements:

- \* Storage for Application1 must provide the highest possible transaction rates and the lowest possible latency.
- \* Storage for Application2 must provide the lowest possible storage costs per GB.
- \* Storage for both applications must be optimized for uploads and downloads.
- \* Storage for both applications must be available in an event of datacenter failure.

What should you recommend ? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point

☐

**Answer:**

Explanation:

☐ Reference:

<https://docs.microsoft.com/en-us/azure/storage/common/storage-account-overview>

<https://docs.microsoft.com/en-us/azure/storage/common/storage-redundancy>

### NEW QUESTION # 98

You are designing an app that will include two components. The components will communicate by sending messages via a queue.

You need to recommend a solution to process the messages by using a First in. First out (FIFO) pattern.

What should you include in the recommendation?

- A. Azure Service Bus queues with partitioning enabled
- **B. Azure Service Bus queues with sessions enabled**
- C. storage queues with a stored access policy
- D. storage queues with a custom metadata setting

**Answer: B**

### NEW QUESTION # 99

You have an Azure subscription. The subscription contains 100 virtual machine that are Windows Server.

You need to recommend a solution that will provide monitoring and an audit trail of the following modifications:

- \* Changes to the Windows registry on the virtual machines
- \* Changes to the DNS settings of the virtual machines

The solution must minimize administrative effort.

What should you recommend using for each change? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

**Answer:**

Explanation:

☐ Explanation:

☐

### NEW QUESTION # 100

How should the migrated databases DB1 and DB2 be implemented in Azure?

☐

**Answer:**

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/azure-sql/database/auto-failover-group-overview>

<https://docs.microsoft.com/en-us/azure/azure-sql/managed-instance/sql-managed-instance-paas-overview>

### NEW QUESTION # 101

You need to recommend an Azure Storage Account configuration for two applications named Application1 and Applications. The configuration must meet the following requirements:

- \* Storage for Application1 must provide the highest possible transaction rates and the lowest possible latency.
- \* Storage for Application2 must provide the lowest possible storage costs per GB.
- \* Storage for both applications must be optimized for uploads and downloads.
- \* Storage for both applications must be available in an event of datacenter failure.

What should you recommend ? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point

**Answer:**

Explanation:

Explanation

Graphical user interface, text, application Description automatically generated

Box 1: Blob BlobStorage with Premium performance and Zone-redundant storage (ZRS) replication.

Block BlobStorage accounts: Storage accounts with premium performance characteristics for block blobs and append blobs.

Recommended for scenarios with high transactions rates, or scenarios that use smaller objects or require consistently low storage latency.

Premium: optimized for high transaction rates and single-digit consistent storage latency.

Box 2: General purpose v2 with Standard performance..

General-purpose v2 accounts: Basic storage account type for blobs, files, queues, and tables. Recommended for most scenarios using Azure Storage.
