**Valid EMEA-Advanced-Support Study Group Offer You The Best Test Questions | Fortinet EMEA Advanced Support Exam**

Desktop Fortinet EMEA-Advanced-Support Practice Exam Software is a one-of-a-kind and very effective software developed to

assist applicants in preparing for the EMEA-Advanced-Support certification test. The Desktop EMEA-Advanced-Support Practice Exam Software that we provide includes a self-assessment feature that enables you to test your knowledge by taking simulated tests and evaluating the results. You can acquire a sense of the EMEA-Advanced-Support software by downloading a free trial version before deciding whether to buy it.

## Fortinet EMEA Advanced Support Exam Sample Questions (Q47-Q52):

### NEW QUESTION # 47

Which of the following protocols would you expect a typical switch to support?

- **A. STP**
- B. OSPF
- C. SIP
- **D. VLAN**

**Answer: A,D**

Explanation:

Typical Layer 2 switches support STP (Spanning Tree Protocol) to prevent loops in redundant networks and VLANs (Virtual Local Area Networks) to segment traffic logically. OSPF is a Layer 3 routing protocol typically on routers, and SIP is for VoIP session initiation, not core switch functions. FortiSwitch supports STP variants like MSTP and VLAN tagging. Exact extract: MSTP supports multiple spanning tree instances, where each instance carries traffic for one or more VLANs (the mapping of VLANs to instances is configurable). These protocols include the Spanning Tree Protocol (STP), Multiple Spanning Tree Protocol (MSTP), and Per-VLAN Rapid Spanning Tree Protocol ( ... FortiSwitch supports Spanning Tree Protocol (STP), Multiple Spanning Tree Protocol (MSTP), and Per-VLAN Rapid Spanning Tree Protocol (RSTP).

Spanning Tree Protocol (STP) is a link-management protocol to enable a layer 2 loop-free topology. STP enables a network to have redundant paths for fault ... Go to WiFi & Switch Controller > FortiSwitch Ports.

Click a port row. Click the Native VLAN column in one of the selected entries to change the native VLAN.

### NEW QUESTION # 48

What happens when a FortiGate detects a SYN flood attack?

- A. It drops all incoming packets
- B. It redirects traffic to a backup gateway
- C. It enables proxy-based inspection
- **D. It applies rate limiting to SYN packets**

**Answer: D**

Explanation:

When FortiGate detects a SYN flood attack, it applies rate limiting to SYN packets via a DoS policy, dropping excessive packets to mitigate the attack. It does not drop all packets (A), enable proxy inspection (B), or redirect traffic (D). Exact extract: "FortiGate mitigates SYN flood attacks using DoS policies, which apply rate limiting to SYN packets to prevent overwhelming the system."

### NEW QUESTION # 49

Which command would you use to verify the status of an IPsec VPN tunnel on a FortiGate?

- **A. diagnose vpn tunnel list**
- B. get vpn ipsec status
- C. show crypto ipsec sa
- D. diagnose ipsec status

**Answer: A**

Explanation:

The 'diagnose vpn tunnel list' command on FortiGate displays detailed status information about IPsec VPN tunnels, including phase 1 and phase 2 states, uptime, and traffic statistics. Options B, C, and D are not valid FortiGate commands for this purpose. Exact extract: "Use diagnose vpn tunnel list to view the status of IPsec VPN tunnels, including phase 1 and phase 2 details, such as SA status, uptime, and traffic counters."

### NEW QUESTION # 50

A Company is running an outdated version of a Webserver software that is vulnerable to multiple code execution and injection attacks. Which Security feature can protect the Webserver until the security patches are applied?

- **A. Intrusion Prevention System**
- B. Intrusion Detection System
- C. Anti rootkit Protection
- D. Anti-virus Protection

**Answer: A**

Explanation:

An Intrusion Prevention System (IPS) actively blocks malicious traffic, such as code execution or injection attacks, by matching against known signatures or anomalies, protecting the webserver until patches are applied. Intrusion Detection System (IDS) only detects and alerts, not blocks. Anti-virus and anti-rootkit are less effective for web-based attacks. The original document's answer B is incorrect, as IDS does not prevent attacks. Exact extract: "IPS provides active protection by blocking malicious traffic based on signatures or anomaly detection... Unlike IDS, which only detects and alerts, IPS can drop packets to prevent attacks like code execution or SQL injection."

### NEW QUESTION # 51

Which of the following Authentication protocols uses clear text?

- **A. PAP**
- B. EAP
- C. CHAP
- D. MSCHAP

**Answer: A**

Explanation:

PAP (Password Authentication Protocol) sends username and password in clear text over the network, making it insecure. CHAP uses challenge-response with hash, MSCHAP is Microsoft variant with hash, EAP is extensible and can use various methods but not inherently clear text. Exact extract: It's "impossible" to authenticate wireless users based on EAP-PEAP sessions against OpenLdap, except, if the users using clear text authentication methods (PAP). Clear text HTTP authentication is not secure. All user names and data (and, depending on the authentication style, passwords) are sent in clear text. If you ... Fortinet ... Password Authentication Protocol (PAP). Used to authenticate PPP connections. Transmits passwords and other user information in clear text. The default token page contains a "Token Code:" text field. Recommended customization. It's recommended to delete the "Token Code:" text. FortiWeb will use ... If you follow the configuration guide for NPS you'll see (step 9) you need to enable "Unencrypted authentication (PAP, SPAP)" (link below).

### NEW QUESTION # 52

.....

As far as our Fortinet EMEA-Advanced-Support study guide is concerned, the PDF version brings you much convenience with regard to the following advantage. The PDF version of our EMEA-Advanced-Support learning materials contain demo where a part of questions selected from the entire version of our EMEA-Advanced-Support Exam Quiz is contained. In this way, you have a general understanding of our Fortinet EMEA-Advanced-Support actual prep exam, which must be beneficial for your choice of your suitable exam files.
