GitHub-Copilot Lead2pass, Latest GitHub-Copilot Exam Simulator

As you know, we are now facing very great competitive pressure. We need to have more strength to get what we want, and GitHub-Copilot exam dumps may give you these things. After you use our study materials, you can get GitHub-Copilot certification, which will better show your ability, among many competitors, you will be very prominent. The 99% pass rate is the proud result of our study materials. If you join, you will become one of the 99%. I believe that pass rate is also a big criterion for your choice of products, because your ultimate goal is to obtain GitHub-Copilot Certification. In GitHub-Copilot exam dumps, you can do it.

GitHub CopilotCertification Exam Sample Questions (Q17-Q22):

NEW QUESTION # 17
What is the primary role of the /optimize slash command in Visual Studio?

- A. Summarizes your documentation into more maintainable and readable formats.
- B. Enhances the performance of the selected code by analyzing its runtime complexity.
- C. Automatically formats the code according to the selected style guide.
- D. Translates code into a more performant language.

Answer: B

Explanation:
The /optimize slash command in Visual Studio enhances the performance of the selected code by analyzing its runtime complexity and suggesting improvements.

NEW QUESTION # 18

A company is currently storing code in Bitbucket and would like to use GitHub Copilot. Which GitHub Copilot plan will be most cost effective to allow them to manage users with their Identity Provider (e.g. Okta)?

- A. GitHub Copilot Business for non-GHE customers
- B. GitHub Copilot Individual
- C. GitHub Copilot Enterprise
- D. GitHub Copilot Teams

Answer: C

Explanation:
GitHub Copilot Enterprise is the most cost-effective plan for managing users with an Identity Provider like Okta, as it provides enterprise-level features and integration.

NEW QUESTION # 19
Which of the following GitHub Copilot Business related activities can be tracked using the organization audit logs?

- A. Code suggestions made by GitHub Copilot
- B. Accepted chat suggestions
- C. Suggestions blocked by duplication detection filtering
- D. Changes to content exclusion settings

Answer: D

Explanation:
Organization audit logs track changes to content exclusion settings, providing administrators with visibility into configuration changes.

NEW QUESTION # 20
Which of the following describes role prompting?

- A. Giving GitHub Copilot multiple examples of the form of the data you want to use
- B. Tell GitHub Copilot in what tone of voice it should respond
- C. Describing in your prompt what your role is to get a better suggestion
- D. Prompt GitHub Copilot to explain what was the role of a suggestion

Answer: C

Explanation:
Role prompting involves explicitly stating your role or the persona you want GitHub Copilot to adopt within your prompt. This helps Copilot provide more contextually relevant and accurate suggestions. By defining your role (e.g., "As a senior software engineer," "As a technical writer"), you guide Copilot to tailor its responses to align with the expertise and perspective associated with that role. This improves the quality and relevance of the generated code and explanations.

NEW QUESTION # 21
What method can be used to interact with GitHub Copilot?

- A. By using a properly configured GitHub CLI
- B. From a web browser at https://github.copilot.com
- C. From a watch window in an IDE debug session
- D. By using chat capabilities in NeoVim

Answer: D

Explanation:
GitHub Copilot is an AI-powered code completion tool that integrates directly into supported Integrated Development Environments (IDEs) and code editors, such as Visual Studio Code, JetBrains IDEs, NeoVim, and others. Developers interact with it through their coding environment, where it provides real-time code suggestions, autocompletions, and (in some cases) chat-like capabilities via extensions or plugins (e.g., GitHub Copilot Chat in supported editors).

Evaluation of Options:

* A. By using a properly configured GitHub CLIThe GitHub CLI (Command Line Interface) is a tool for interacting with GitHub repositories and workflows from the terminal, but it is not a method for interacting with GitHub Copilot. Copilot operates within code editors/IDEs, not through the CLI.
Incorrect.

* B. By using chat capabilities in NeoVimThis is partially correct. GitHub Copilot can be used in NeoVim with the appropriate plugin (e.g., the Copilot.vim plugin), and GitHub Copilot Chat-a feature that allowsconversational interaction-may also be available depending on the setup and version.
However, "chat capabilities in NeoVim" alone is not the primary or standard way to describe Copilot interaction, as it's more about code suggestions than chat. This is the closest option but not perfectly precise.Partially correct.

* C. From a watch window in an IDE debug sessionThe "watch window" in an IDE is used during debugging to monitor variable values, not to interact with GitHub Copilot. Copilot provides suggestions while coding, not specifically in debug sessions or watch windows.Incorrect.

* D. From a web browser athttps://github.copilot.comThere is no such URL as "https://github.copilot. com" dedicated to interacting with GitHub Copilot. Copilot is accessed via GitHub's authentication and integrated into editors/IDEs, not through a standalone web browser interface. Information about Copilot is available on GitHub's official site (e.g.,https://github.com/features/copilot), but interaction happens in the coding environment.Incorrect.

NEW QUESTION # 22

......

It is well known that certificates are not versatile, but without a GitHub-Copilot certification you are a little inferior to the same competitors in many ways. Compared with the people who have the same experience, you will have the different result and treatment if you have a GitHub-Copilot Certification. Without doubt, you will get a higher salary if you have a GitHub-Copilot certification or you can enter into a bigger company. And our GitHub-Copilot exam materials can make your dream come true.
