1Z0-1072-25 Valid Test Pass4sure, Dumps 1Z0-1072-25 Collection

P.S. Free & New 1Z0-1072-25 dumps are available on Google Drive shared by TestBraindump: https://drive.google.com/open?id=1dAxfalvtZl5J0xs-Y-vonojaK85m1OYp

If a person fails despite proper Oracle Cloud Infrastructure 2025 Architect Associate 1Z0-1072-25 test preparation and using 1Z0-1072-25 practice exam material, TestBraindump provides a money-back guarantee. If a person fails despite proper Oracle Cloud Infrastructure 2025 Architect Associate 1Z0-1072-25 test preparation and using 1Z0-1072-25 practice exam material, TestBraindump provides a money-back guarantee. TestBraindump offers three months of free updates if the Oracle Cloud Infrastructure 2025 Architect Associate exam content changes after the purchase of Oracle Cloud Infrastructure 2025 Architect Associate valid dumps. TestBraindump wants to save your time and money, so the authentic and accurate Oracle Cloud Infrastructure 2025 Architect Associate 1Z0-1072-25 Exam Questions help candidates to pass their 1Z0-1072-25 certification test on their very first attempt.

Oracle 1Z0-1072-25 Exam Syllabus Topics:

Topic	Details

Topic 1	• Compute: This section measures skills of cloud architects responsible for designing scalable and resilient infrastructure, covering compute instance configuration, autoscaling policies, and OS management. It evaluates understanding of OCI compute image options, infrastructure maintenance processes, and strategies for optimizing instance performance across availability domains.
Topic 2	• Storage: Designed for storage administrators managing enterprise data solutions, this section tests proficiency in deploying Block • File • Object Storage with lifecycle management, cross-region replication, and tiered storage strategies. It includes configuring volume groups, snapshots, versioning, and security controls while analyzing storage performance metrics and cost optimization techniques.
Topic 3	• Networking: Targeting network architects designing secure cloud architectures, this domain focuses on Virtual Cloud Network (VCN) implementation, including subnet design, IP address management, and routing through gateways (NAT, service, internet). It assesses expertise in VPN • FastConnect deployment, DNS configuration, load balancer setup, and advanced tools like Network Path Analyzer for troubleshooting latency or connectivity issues.
Topic 4	• Identity and Access Management (IAM): This domain validates skills of security architects implementing granular access controls, emphasizing IAM policy creation, compartment organization, and dynamic group configuration. It covers identity domain management, network source restrictions, and tag-based access mechanisms to enforce least-privilege principles across OCI resources

Dumps 1Z0-1072-25 Collection & Official 1Z0-1072-25 Practice Test

To go with the changing neighborhood, we need to improve our efficiency of solving problems, which reflects in many aspect as well as dealing with exams. Our 1Z0-1072-25 practice materials can help you realize it. To those time-sensitive exam candidates, our high-efficient 1Z0-1072-25 actual tests comprised of important news will be best help. Only by practicing them on a regular base, you will see clear progress happened on you. Besides, rather than waiting for the gain of our 1Z0-1072-25 practice materials, you can download them immediately after paying for it, so just begin your journey toward success now.

Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q50-Q55):

NEW QUESTION # 50
Which IAM Identity Domain type should you create for a full-featured Identity-as-a-Service (IDaaS) solution?

- A. Free
- B. Premium
- C. External User
- D. Oracle Apps Premium

Answer: B

Explanation:
In Oracle Cloud Infrastructure (OCI), when you need a full-featured Identity-as-a-Service (IDaaS) solution, the appropriate Identity Domain type to create is Premium.
Premium Identity Domain: This option provides a comprehensive set of identity and access management (IAM) capabilities, including advanced security features, identity governance, and support for enterprise-grade integrations. It supports managing user identities, multifactor authentication, and various other identity services required for a robust IDaaS solution.
Other Options:
External User: This is a limited domain type typically used for managing users who only need access to specific external services.
Free: This domain type offers limited features and is not intended for full-featured enterprise IAM requirements.
Oracle Apps Premium: This is tailored for integrating with Oracle applications but does not offer the broad capabilities of the Premium option.

Relevant OCI Documentation:
Oracle Identity Domains Overview
This documentation explains the various identity domain types and their use cases within OCI.

NEW QUESTION # 51
What are the two types of capture filters that can be created for network monitoring?

- A. Flow control capture filters and traffic capture filters
- B. VTAP capture filters and network capture filters
- C. Flow log capture filters and packet capture filters
- D. Flow log capture filters and VTAP capture filters

Answer: D

Explanation:
In Oracle Cloud Infrastructure (OCI), there are two primary types of capture filters used for network monitoring:
Flow Log Capture Filters: These filters are used to capture and log network flow information (e.g., source and destination IP addresses, ports, protocols). Flow logs provide insights into the traffic patterns within your VCN.
VTAP Capture Filters: Virtual Test Access Point (VTAP) capture filters allow you to capture and inspect traffic from specific network interfaces or subnets without affecting the flow of traffic. This is particularly useful for deep packet inspection and monitoring purposes.

Oracle Cloud Infrastructure Documentation: Flow Logs
Oracle Cloud Infrastructure Documentation: VTAP

NEW QUESTION # 52
Which TWO statements are NOT correct regarding the Oracle Cloud Infrastructure (OCI) burstable instances?

- A. Burstable instances cost less than regular instances.
- B. Burstable instances are charged according to the baseline OCPU.
- C. Baseline utilization is a fraction of each CPU core.
- D. If the instance's average CPU utilization is below the baseline, it can burst above the baseline.

Answer: A,B

Explanation:
The following statements about OCI burstable instances are NOT correct:
A . Burstable instances cost less than regular instances: This is incorrect because burstable instances are not necessarily cheaper; the cost depends on the baseline utilization. While they allow for cost efficiency when running at a lower CPU baseline, they can become more expensive if frequently bursting above the baseline.
B . Burstable instances are charged according to the baseline OCPU: This is incorrect because burstable instances are billed based on actual OCPU usage, which includes both baseline and burst usage. If an instance frequently operates above its baseline, the cost will reflect this higher usage.
Correct Concepts:
C . Burstable instances can temporarily use more CPU than their baseline if the average CPU utilization is below the baseline.
D . Baseline utilization is a fraction of each CPU core, which determines the level of consistent performance available without bursting.

Oracle Cloud Infrastructure Documentation: Burstable Instances

NEW QUESTION # 53
Which OCI feature should be used to ensure that communication between database servers and OCI Object Storage is secure?

- A. Use a NAT Gateway
- B. Use a Local Peering Gateway
- C. Use a VPN Gateway
- D. Use a Service Gateway

Answer: D

Explanation:
To ensure secure communication between database servers and OCI Object Storage, you should use a Service Gateway. A Service Gateway enables instances in your VCN to privately access OCI services like Object Storage without traversing the public internet.
Security: The traffic between your database servers and Object Storage remains within the Oracle network, providing a secure and high-performance connection.
Reference:
Oracle Cloud Infrastructure Documentation: Service Gateway Overview

NEW QUESTION # 54

How can an organization securely grant a third-party application access to specific OCI resources?

- A. By creating an IAM policy granting full access to the tenancy
- B. By configuring the application to utilize Instance Principal
- C. By sharing user credentials for an OCI administrator
- D. By implementing OAuth 2.0 with the application

Answer: B

Explanation:
To securely grant a third-party application access to specific Oracle Cloud Infrastructure (OCI) resources, the recommended approach is to configure the application to use Instance Principal. This method allows the application to authenticate directly with OCI services without needing to manage sensitive credentials like passwords or API keys.
Instance Principals: Enable compute instances to directly make API calls against OCI services, inheriting permissions through IAM policies. This setup is more secure than sharing user credentials, as it avoids hardcoding credentials within the application and leverages OCI's native security features.

Oracle Cloud Infrastructure Documentation: Instance Principals

NEW QUESTION # 55

......

In modern society, everything is changing so fast with the development of technology. If you do no renew your knowledge and skills, you will be wiped out by others. Our 1Z0-1072-25 study materials also keep up with the society. After all, new technology has been applied in many fields. It is time to strengthen your skills. Our 1Z0-1072-25 Study Materials will help you master the most popular skills in the job market. Then you will have a greater chance to find a desirable job. Also, it doesn't matter whether have basic knowledge about the 1Z0-1072-25 study materials.
