NEW QUESTION # 72

An SAP Fiori app isn't displaying on the SAP Fiori Launchpad even though the business role granting permission to the app is correctly assigned to the user. How would you troubleshoot? Note: There are 3 correct answers to this question.

- A. Check the Role Maintenance app.
- B. Check the business role template.
- C. Check the business catalogues assigned to the role.
- D. Check the restrictions for the role.
- E. Check the space and page(s) assigned to the role.

Answer: C,D,E

Explanation:

If an SAP Fiori app is not displaying on the SAP Fiori Launchpad despite the user having the correct business role, the issue could stem from several configuration areas. Here's how to troubleshoot:

* Check the business catalogues assigned to the role (A): Business catalogues group apps into logical sets. Ensure that the business role assigned to the user includes the catalogue containing the missing app.

* Check the restrictions for the role (B): Restrictions such as organizational assignments or field-level constraints might prevent the app from being visible. Verify that no such restrictions are applied to the role.

* Check the space and page(s) assigned to the role (C): Spaces and pages define the layout of the SAP Fiori Launchpad. Ensure that the app is assigned to the correct space and page within the role configuration.

* Check the Role Maintenance app (D): While the Role Maintenance app is useful for managing roles, it does not directly address visibility issues related to spaces, pages, or catalogues.

* Check the business role template (E):Business role templates serve as a starting point for creating roles but do not directly impact app visibility once the role is assigned.
