

# Pass Guaranteed Quiz Managing-Cloud-Security - WGU Managing Cloud Security (JY02)–Professional Practice Test

BTW, DOWNLOAD part of ValidDumps Managing-Cloud-Security dumps from Cloud Storage: <https://drive.google.com/open?id=1zXkhDDodrVW-T07XzH00GzNRex5SGsMg>

This is similar to the Managing-Cloud-Security desktop format but this is browser-based. It requires an active internet connection to run and is compatible with all browsers such as Google Chrome, Mozilla Firefox, Opera, MS Edge, Safari, Internet Explorer, and others. The WGU Managing-Cloud-Security Mock Exam helps you self-evaluate your WGU Managing Cloud Security (JY02) exam preparation and mistakes. This way you improve consistently and attempt the Managing-Cloud-Security certification exam in an optimal way for excellent results in the exam.

If you want to know PDF version of WGU Managing-Cloud-Security new test questions, you can download our free demo before purchasing. Yes, we provide free PDF version for your reference. If you want to know the quality of our PDF version of Managing-Cloud-Security new test questions, free PDF demo will show you. PDF version is easy for read and print out. If you are used to studying on paper, this version will be suitable for you. Besides, you place order for your companies, PDF version of Managing-Cloud-Security new test questions can be printed out many times and suitable for demonstration.

## Managing-Cloud-Security Latest Braindumps Book | Exam Managing-Cloud-Security Answers

The Managing-Cloud-Security latest exam torrents have different classifications for different qualification examinations, which can enable students to choose their own learning mode for themselves according to the actual needs of users. The Managing-Cloud-Security exam questions offer a variety of learning modes for users to choose from, which can be used for multiple clients of

computers and mobile phones to study online, as well as to print and print data for offline consolidation. Our reasonable price and Managing-Cloud-Security Latest Exam torrents supporting practice perfectly, as well as in the update to facilitate instant upgrade for the users in the first place, compared with other education platform on the market, the Managing-Cloud-Security test torrent can be said to have high quality performance, let users spend the least money to meet their maximum needs.

## WGU Managing Cloud Security (JY02) Sample Questions (Q171-Q176):

### NEW QUESTION # 171

An organization is undergoing an ISO 27001 audit that includes a software as a service (SaaS) solution within scope, and the auditor has requested evidence of controls. What evidence should the organization provide the auditor?

- A. Operating system patch logs
- B. Network firewall rules
- C. Physical diagram of the data center
- D. Provider compliance attestation

**Answer: D**

Explanation:

When a SaaS solution is included within the scope of an ISO 27001 audit, the organization should provide the cloud provider's compliance attestation as evidence of controls. Managing Cloud guidance explains that in the SaaS model, the provider manages infrastructure, platform, and application-level controls.

Because customers do not manage operating systems, firewalls, or physical data centers in SaaS, they cannot supply direct technical evidence for those controls. Instead, third-party audit reports and attestations demonstrate that the provider has implemented appropriate security controls.

Firewall rules, OS patch logs, and physical diagrams are not accessible to SaaS customers. Therefore, provider compliance attestation is the correct evidence.

### NEW QUESTION # 172

Which countermeasure should be taken during the preparation phase of the incident response lifecycle?

- A. Perform risk assessments
- B. Estimate the scope of the incident
- C. Build a timeline of attack
- D. Take the system offline

**Answer: A**

Explanation:

During the preparation phase of the incident response lifecycle, organizations focus on establishing readiness before any incident occurs. Managing Cloud principles explain that preparation includes identifying potential threats, evaluating vulnerabilities, and assessing risks that could impact cloud operations.

Risk assessments are a core activity in this phase because they help organizations understand which assets are most critical, what threats are likely, and where controls must be strengthened. Performing risk assessments allows security teams to define incident response procedures, allocate resources, establish escalation paths, and ensure tools and personnel are prepared.

The other options occur in later phases. Taking systems offline is part of containment, estimating the scope of the incident occurs during detection and analysis, and building a timeline of attack supports post-incident analysis. Therefore, performing risk assessments is the correct countermeasure during the preparation phase.

### NEW QUESTION # 173

Which phase in secure application design and development includes threat modeling?

- A. Design
- B. Develop
- C. Define
- D. Training

**Answer: A**

Explanation:

Threat modeling is performed during the Design phase of secure application development. Managing Cloud guidance explains that threat modeling evaluates application architecture, data flows, trust boundaries, and attack surfaces before development begins. By identifying threats early, security controls can be built directly into the application design rather than added later. This reduces vulnerabilities and lowers remediation costs.

The define phase establishes requirements, training builds skills, and development focuses on coding. Therefore, the design phase is the correct answer.

#### NEW QUESTION # 174

Which option should a cloud architect recommend to an organization looking to simplify development and management of applications?

- A. Infrastructure as a Service (IaaS)
- B. Software as a Service (SaaS)
- C. Platform as a Service (PaaS)
- D. Desktop as a Service (DaaS)

**Answer: C**

Explanation:

Platform as a Service (PaaS) is the recommended option for organizations seeking to simplify application development and management. Managing Cloud guidance explains that PaaS provides a complete development environment, including operating systems, runtime environments, middleware, databases, and development tools.

By abstracting infrastructure and platform management, PaaS allows developers to focus exclusively on building, testing, and deploying applications. Tasks such as patching, scaling, load balancing, and environment configuration are handled by the cloud provider, reducing complexity and administrative effort.

DaaS focuses on delivering virtual desktops, IaaS requires customers to manage operating systems and applications, and SaaS provides fully developed applications rather than development platforms. Therefore, PaaS best meets the requirement of simplifying development and management.

#### NEW QUESTION # 175

Which risk relates to the removal of a person's information within the public cloud by legal authorities?

- A. Vendor lock-in
- B. Remote wiping
- C. Data seizure
- D. Data masking

**Answer: C**

Explanation:

Data seizure is the risk associated with legal authorities removing or accessing a person's information stored in a public cloud.

Managing Cloud guidance explains that cloud data is subject to the laws and legal processes of the jurisdiction in which it resides.

In some cases, government agencies may compel cloud service providers to disclose or seize data as part of legal investigations. This can occur without the data owner's direct involvement and may affect confidentiality, privacy, and business operations. Public cloud environments increase this risk because infrastructure is shared and often spans multiple jurisdictions.

Remote wiping is a data destruction technique, vendor lock-in relates to dependency on providers, and data masking protects sensitive data. Therefore, data seizure is the correct risk.

#### NEW QUESTION # 176

.....

In short, we live in an age full of challenges. So we must continually update our knowledge and ability. If you are an ambitious person, our Managing-Cloud-Security exam questions can be your best helper. There are many kinds of Managing-Cloud-Security study materials in the market. You must have no idea to choose which one. It does not matter. Our Courses and Certificates guide braindumps are the most popular products in the market now. Just buy our Managing-Cloud-Security learning quiz, and you will get all you want.
