## Oracle Database Administration II Sample Questions (Q189-Q194):

### NEW QUESTION # 189

Which three are true about an application container?

- A. It must have an application root PDB.
- B. It can contain a single application.
- C. It can contain multiple applications.
- D. It must have an application seed PDB.

- E. An application PDB can belong to multiple application containers.
- F. Two application containers can share an application seed PDB.

**Answer: B,C,F**

#### NEW QUESTION # 190

You plan to perform cross-platform PDB transport using XTTS.

Which two are true? (Choose two.)

- A. The source and target platforms must have the same endianness.
- B. The source PDB can be in MOUNT or OPEN state.
- C. A backup of the PDB must exist, taken using the BACKUP command with the TO PLATFORM clause.
- D. The source PDB must be in MOUNT state.
- E. The source PDB must not be an application root.
- F. Automatic conversion of endianness occurs.

**Answer: A,B**

#### NEW QUESTION # 191

For which two requirements can you use the USER\_TABLESPACE clause with the CREATE PLUGGABLE DATABASE command? (Choose two.)

- A. to include specific user tablespaces only when relocating a PDB
- B. to specify the list of tablespaces to include when creating a PDB from the CDB seed
- C. to specify the list of user tablespaces to include when moving a non-CDB to a PDB
- D. to specify a default tablespace in a PDB cloned from another PDB in the same CDB.
- E. to exclude a temp tablespace when plugging in a PDB
- F. to exclude all tablespaces except SYSTEM, SYSAUX, and TEMP when plugging in a PDB

**Answer: B,C**

Explanation:

A - False : When you create the PDB from the PDB seed or an application seed and specify the DEFAULT TABLESPACE clause, Oracle Database creates a smallfile tablespace and sets it as the default tablespace for the PDB.

B, E - False : Specify ALL EXCEPT to include all tablespaces, except for the tablespaces listed.

This clause does not apply to the SYSTEM, SYSAUX, or TEMP tablespaces. Do not include these tablespaces in a tablespace list for this clause.

C - False : This clause can be used to specify user tablespaces when cloning, creating, or relocating a PDB D - True : For example, when you move a non-CDB to a PDB, and the non-CDB had several schemas that each supported a different application, you can use this clause to separate the data belonging to each schema into a separate PDB. This technique assumes that each schema used a separate tablespace in the non-CDB.

F - True : The USER\_TABLESPACES clause of the CREATE PLUGGABLE DATABASE statement specifies which tablespaces are available in the new PDB. List one or more tablespaces to include.

#### NEW QUESTION # 192

Which three actions are performed by Database Upgrade Assistant (DBUA)? (Choose three.)

- A. It performs prerequisite checks to verify if the Oracle database is ready for upgrade.
- B. It empties the RECYCLE BIN.
- C. It increases tablespace size, if required, to meet upgrade requirements.
- D. It recompiles all stored PL/SQL code by using utlsp.sql.
- E. It removes the AUDSYS schema and the AUDIT\_ADMIN and AUDIT\_VIEWER roles
- F. It sets all user tablespaces to "read-only" before starting the upgrade.

**Answer: A,B,C**
