CompTIA PK0-005 Exam covers various aspects of project management, including project initiation, planning, execution, monitoring and control, and project closure. It also includes topics such as risk management, quality management, team management, and communication management. PK0-005 exam consists of 90 multiple-choice and performance-based questions that must be completed within 90 minutes. It is recommended that candidates have at least one year of project management experience before taking the exam, although it is not a mandatory requirement. Upon passing the exam, individuals will earn the CompTIA Project+ Certification, which is valid for three years and can be renewed by completing continuing education activities.

CompTIA Project+ Certification Exam Sample Questions (Q272-Q277):

NEW QUESTION # 272

During a complex, multiyear project, a PM must discern which project tasks overlap so resources can be allocated appropriately. Which of the following is best for determining this information?

- A. Milestone chart
- B. Budget burndown chart
- **C. Gantt chart**
- D. PERT chart

Answer: C

Explanation:

A Gantt chart is a visual tool used in project management to represent the timing of tasks required to complete a project. It is particularly useful for showing the start and finish dates of elements of a project, dependencies between tasks, and the current schedule status. This makes it an ideal choice for a project manager to discern overlapping tasks and allocate resources efficiently. References = CompTIA Project+ Certification Study Guide (PK0-005)

NEW QUESTION # 273

A project manager submits a change request. The change request is rejected because of code freeze. Which of the following actions should the project manager take next?

- A. Escalate the issue for exceptional approval.
- B. Update the risk register.
- **C. Communicate to the stakeholders.**
- D. Submit a duplicate change request.

Answer: C

Explanation:

When a change request is rejected due to a code freeze, the project manager should communicate to the stakeholders to inform them of the situation. Transparent communication ensures that all parties are aware of the project's current status and any limitations affecting progress. This step is crucial for managing expectations and maintaining stakeholder trust.

This approach is supported by the CompTIA Project+ PK0-005 exam objectives, specifically under Domain

1.3: Given a scenario, apply the change control process throughout the project life cycle, which emphasizes the importance of communication in change management.

NEW QUESTION # 274

A project team was instructed to refurbish old desktops. The following provides the details of the issues observed:

□ Which of the following issues should be addressed FIRST?

- A. Replace missing peripherals because this process can be easy and less costly.
- B. An old operating system issue has the most amount of occurrences.
- C. Address each issue as discovered to avoid rework.
- D. Damage to the monitor has the highest percentage.

Answer: D

Explanation:

The project manager should address the issue of damage to the monitor first because it has the highest percentage (40%) among the issues observed. This means that it is the most frequent and severe issue that affects the quality and functionality of the refurbished desktops. Addressing this issue first can help to improve customer satisfaction, reduce rework, and avoid waste.

NEW QUESTION # 275

After a release, the project sponsor received an escalation from an executive about the extension of the downtime after the scheduled window. Which of the following should be added to the issue log?

- A. Customer notification
- B. Rollback plan
- C. Automated testing
- D. Continuous integration

Answer: A

Explanation:

Explanation

Customer notification should be added to the issue log after receiving an escalation from an executive about the extension of the downtime after the scheduled window. Customer notification is a communication activity that informs the customers about any issues or changes that may affect their satisfaction or expectations.

Customer notification can help to maintain trust, transparency, and goodwill with the customers and prevent any negative impacts on their business operations or experience.

NEW QUESTION # 276

Which of the following activities would a project manager perform during the closing phase? (Select THREE).

- A. Lessons learned
- B. Stakeholder analysis
- C. Risk analysis
- D. Removing access
- E. Acquiring resources
- F. Removing resources
- G. Statement of work sign-off

Answer: A,D,F

Explanation:

Explanation

Lessons learned, removing resources, and removing access are activities that a project manager would perform during the closing phase of a project. Lessons learned is a process of collecting and documenting the knowledge and experience gained from a project for future reference and improvement. Removing resources is a process of releasing or reallocating any human or material resources that were used for the project.

Removing access is a process of revoking any permissions or privileges that were granted to the project team members or stakeholders for accessing any systems or data related to the project. These activities can help to finalize and close a project successfully and ensure that all deliverables are transferred, all documentation is approved and archived, all contracts are closed, and all stakeholders are satisfied.
