

NCP-EUC Actual Exams | Exam NCP-EUC Registration

The image shows a table titled "NCP-EUC End User Computing Certification Details" with a purple header. The table lists various exam details in a two-column format. At the bottom, there is a yellow banner with the text "Become successful with VMEexam.com".

NCP-EUC End User Computing Certification Details	
Exam Code	NCP-EUC
Full Exam Name	Nutanix Certified Professional - End User Computing
No. of Questions	75
Online Practice Exam	Refer the Link in the Description
Sample Questions	Refer the Link in the Description
Passing Score	3000/1000-6000
Time Limit	120 minutes
Exam Fees	\$199 USD

Become successful with VMEexam.com

2026 Latest Getcertkey NCP-EUC PDF Dumps and NCP-EUC Exam Engine Free Share: https://drive.google.com/open?id=1hA_vpblm7gOvqJRin7OTxB3H0xOISHk

Many people want to find the fast way to get the NCP-EUC test pdf for immediately study. Here, NCP-EUC technical training can satisfy your needs. You will receive your NCP-EUC exam dumps in about 5-10 minutes after purchase. Then you can download the NCP-EUC prep material instantly for study. Furthermore, we offer one year free update after your purchase. Please pay attention to your payment email, if there is any update, our system will send email attached with the Nutanix NCP-EUC Updated Dumps to your email.

Nutanix NCP-EUC certification exam is designed for IT professionals who aspire to become experts in end-user computing. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification validates the skills of an individual in deploying and managing virtual desktop infrastructure (VDI) and application virtualization solutions using the Nutanix Enterprise Cloud Platform. NCP-EUC exam evaluates your knowledge of end-user computing concepts, Nutanix VDI solutions, and application virtualization.

The NCP-EUC exam is a computer-based exam that consists of 60 multiple-choice questions. Candidates have 90 minutes to complete NCP-EUC exam, and the passing score is 300 out of 500. NCP-EUC Exam is available in English and Japanese, and candidates can take NCP-EUC exam at Pearson VUE testing centers worldwide.

The NCP-EUC certification exam is intended for IT professionals who are responsible for managing EUC solutions in their organizations. This includes administrators, architects, engineers, and consultants. NCP-EUC exam covers a wide range of topics related to EUC, including virtual desktop infrastructure (VDI), desktop as a service (DaaS), application virtualization, and user experience (UX). By passing NCP-EUC exam, you can demonstrate your expertise in these areas and enhance your career prospects.

Free PDF Quiz Nutanix - NCP-EUC - Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Latest Actual Exams

Our company has occupied large market shares because of our consistent renovating on the NCP-EUC exam questions. We have built a powerful research center and owned a strong team to do a better job on the NCP-EUC training guide. Up to now, we have got a lot of patents about our NCP-EUC Study Materials. On the one hand, our company has benefited a lot from renovation. Customers are more likely to choose our products. On the other hand, the money we have invested is meaningful, which helps to renovate new learning style of the NCP-EUC exam.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q136-Q141):

NEW QUESTION # 136

A company is deploying a Nutanix VDI solution across multiple data centers and will be using Files for their profile\home directories. The company requires that users be able to access profile\home from a local Files cluster at the designated data center they will be

logging into, based on the location they are working out of that day.
How can the administrator ensure that the solution meets the stated requirements?

- A. use Nutanix Advanced File Replication
- B. use PeerSync software to replicate.
- C. use Zetro software to replicate
- D. use Nutanix Protection Domains for replication.

Answer: A

Explanation:

Nutanix Files offers a feature called Smart DR, which enables share-level replication between active file server instances for disaster recovery.

Smart DR allows administrators to configure replication policies for each share, such as replication interval, retention period, and bandwidth limit.

Smart DR also supports failover and failback operations between source and target file servers in case of a disaster.

According to Nutanix best practices¹, Smart DR is suitable for scenarios where users need to access their files from different locations or data centers.

NEW QUESTION # 137

An administrator is looking in Capacity Runway and noticed that a cluster supporting EUC profiles doesn't display CPU and memory information. This cluster was deployed three months ago.

What can be the reason for this behavior?

- A. DNS setting is mismatched between PE and PC.
- B. All nodes were configured as Storage-Only nodes.
- C. NTP setting is missing on the nodes.
- D. Cluster has not been reporting data for the last 15 days.

Answer: B

Explanation:

Capacity Runway in Prism Central calculates the "Runway" (time remaining before resource exhaustion) based on the consumption of User VMs running on the cluster.

If a cluster is configured with Storage-Only nodes (often used for dedicated Nutanix Files/Unified Storage deployments for profiles), the AHV scheduler is configured to prevent user VMs from running on these nodes (reserving resources strictly for CVMs and storage services). Since there are no general compute workloads (User VMs) consuming CPU/RAM, the Capacity Runway algorithm has no relevant "Guest VM" consumption data to analyze, resulting in the CPU and Memory fields being blank or not displayed, while Storage capacity might still be visible.

NEW QUESTION # 138

A company has started planning for migration to Windows 11. An administrator is looking over the requirements for boot and security settings at the VM level to prepare to build new base images.

Which option can the administrator exclude from the requirements list for running Windows 11 VMs on AHV?

- A. vTPM
- B. UEFI
- C. Secure Boot
- D. Credential Guard

Answer: D

Explanation:

According to Nutanix AHV support documentation for Windows 11, the operating system enforces strict hardware requirements for installation and booting. These mandatory requirements include:

- * UEFI firmware (Legacy BIOS is not supported).
- * Secure Boot enabled.

* vTPM (Virtual Trusted Platform Module) version 2.0.

Credential Guard is a security feature (Virtualization-Based Security) available in Windows 11 that protects credentials, but it is not a mandatory requirement to successfully install or boot the operating system. While Nutanix AHV supports Credential Guard, an administrator can validly exclude it from the minimum requirements list needed just to get the VMs running, whereas excluding vTPM, UEFI, or Secure Boot would cause the OS installation or boot process to fail.

NEW QUESTION # 139

An administrator is using Citrix Studio to configure policies for their existing CVAD environment on to a Nutanix Files share. The administrator would like to use Citrix Director to reset user profiles.

How should the user profiles be configured?

- A. Redirect user's Desktop, Documents and Favorites to a Nutanix Files home share.
- B. Redirect user's Desktop, Documents and Favorites to a Nutanix Files general share.
- **C. use Nutanix Files distributed shares. Deploy Citrix Profile Management user stores inside the user's top-level directory.**
- D. use Nutanix Files standard shares
Deploy Citrix Profile Management user stores inside the user's top-level directory

Answer: C

Explanation:

This is because this option will allow the administrator to use Citrix Director to reset user profiles on a Nutanix Files share that provides high performance, scalability, and resilience³.

Citrix Profile Management is a solution that allows administrators to manage user profiles and settings across different devices and sessions¹². Nutanix Files is a software-defined file storage solution that provides high performance and scalability for file data¹². Nutanix Files supports all forms of profile management with efficient metadata caching techniques that optimize for faster VDI login times¹². Nutanix Files offers two types of shares: standard shares and distributed shares³. Standard shares are hosted on a single file server, while distributed shares are hosted on multiple file servers for load balancing and high availability³.

NEW QUESTION # 140

An administrator has a VDI environment of 1400 VMs running on a cluster of six hosts. On average there are about 800 powered-on VDIs at the same time.

During a maintenance window, all VMs are set to be powered on to ensure they boot on the updated configuration. Looking in Citrix Studio, the administrator notices that not all VDIs are powered on.

What can most likely explain this?

- **A. Cluster memory capacity has been exceeded.**
- B. Maximum allowed powered-on VDI VMs have been exceeded.
- C. The Citrix directory server has network issues.
- D. The Citrix storefront server has network issues.

Answer: A

Explanation:

In a Nutanix AHV cluster, resource management and Admission Control ensure that VMs are only powered on if there are sufficient physical resources (specifically Memory) available to back them.

A cluster designed to run an "average" of 800 VMs likely has its physical memory sized to accommodate that workload plus some buffer (HA). Attempting to power on 1400 VMs simultaneously (almost double the average load) on the same 6-node cluster will likely exhaust the available physical RAM. Once the cluster memory capacity is full, AHV will refuse to power on additional VMs, resulting in the state observed in Citrix Studio where many VMs remain off. Citrix network issues (Directory/Storefront) would typically result in registration failures or connection errors, not the inability of the hypervisor to power on the VM.

NEW QUESTION # 141

.....

Our Getcertkey's NCP-EUC test training materials can test your knowledge, when you prepare for NCP-EUC test; and can also evaluate your performance at the appointed time. Our NCP-EUC exam training materials is the result of Getcertkey's experienced

IT experts with constant exploration, practice and research for many years. Its authority is undeniable. If you have any concerns, you can first try NCP-EUC PDF VCE free demo and answers, and then make a decision whether to choose our NCP-EUC dumps or not.
