The PL-300 is a fantastic choice for absolutely everyone looking to increase their profession with the PL-300 certification. Purchase Now.

Microsoft Power BI Data Analyst Sample Questions (Q56-Q61):

NEW QUESTION # 56

You have a Microsoft Excel workbook that contains two tables.

From Power BI, you create a dashboard that displays data from the tables.

You update the tables each day.

You need to ensure that the virtualizations in the dashboard are updated daily.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

Graphical user interface, text, application, email Description automatically generated

NEW QUESTION # 57

You are building a data model for a Power BI report. You have data formatted as shown in the following table.

You need to create a clustered bar chart as shown in the following exhibit.

What should you do?

- A. In a DAX function, create two calculated columns named Machine and User by using the substitute function.
- **B. From Power Query Editor, split the Machine-User column by using a delimiter.**
- C. From Power Query Editor, create a column that contains the last three digits of the Machine-User column.
- D. In a DAX function, create two measures named Machine and User by using the substitute function.

Answer: B

NEW QUESTION # 58

You need to create a DAX measure in the data model that only allows users to see projections at the appropriate levels of granularity.

How should you complete the measure? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

NEW QUESTION # 59

You have a Power BI report that contains the table shown in the following exhibit.

The table contains conditional formatting that shows which stores are above, near, or below the monthly quota for returns.

You need to ensure that the table is accessible to consumers of reports who have color vision deficiency.

What should you do?

- A. Remove the icons and use red, yellow, and green background colors instead.
- **B. Change the icons to use a different shape for each color.**
- C. Move the conditional formatting icons to a tooltip report.
- D. Add alt text that lists the values in the table.

Answer: B

NEW QUESTION # 60

Note: This question is a part of a series of questions that present the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.

Start of repeated scenario

You have a Microsoft SQL Server database that has the tables shown in the Database Diagram exhibit. (Click the Exhibit.)

You plan to develop a Power BI model as shown in the Power BI Model exhibit. (Click the Exhibit).

You plan to use Power BI to import data from 2013 to 2015.

Product Subcategory [Subcategory] contains NULL values.

End of repeated scenario.

You implement the Power BI model.

You need to edit the Product Category table query to match the desired Power BI model.

How should you complete the advanced query? To answer, drag the appropriate values to the correct targets.

Each value may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:
